### **PAMELA TIANA**

**Encyclopedia of Aircraft** Elsevier

Taiwan's economic growth since the 1970s has roots in its pre-war development and post-war formation of the Pacific trade triangle. By highlighting the historical perspective of the Japanese linkages and the geographic vantage point of Taiwan-Japan-USA trade triangle, Economic Development of Taiwan features a collection of papers by Frank S T Hsiao and Mei-Chu Wang Hsiao. Published mostly between 1989 and 2002, their analyses on Taiwan's pre-war and post-war early economic history debunk the myth of the country's post-war rags to riches story and revalue the myth of 'wise' government policy. Timely and accessible, this unique volume shows how early Taiwanese experiences of economic development can be valuable paradigms for emerging economies of Asian, African and Latin American countries in this age of globalization.

**Air Pictorial** World Scientific

SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 95,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD.

Veronico explores the romantic era of World War II warbirds and the stories of some of its most famous wrecks, including the "Swamp Ghost" (a B-17E which crashed in New Guinea in the early days of World War II and which was only recently recovered), and "Glacier Girl" (a P-38, part of "The Lost Squadron," which crashed in a large ice sheet in Greenland in 1942). Throughout, Veronico provides a history of the aircraft, as well as the unique story behind each discovery and recovery with ample illustrations.

*A Compendium of Armaments and Military Hardware (Routledge Revivals)* Routledge

An informative text explains the history, merits, and unusual features of each design of modern military aircraft. Each entry is illustrated with several

color photographs and full-color cutaway artwork of the most important types. 300 illustrations.

**Spoils of War** Erin, Ont. : Boston Mills Press

Examines the developments of combat aircraft and their weapons in the context of the changing role of air power in the 1980s and beyond.

*War & Peace in the Air* Smithmark Publishers

While a large number of books have dealt with the navies and war at sea during the World Wars, the immediate aftermaths have generally received only minimal coverage. However, the fates of defeated navies are of enormous interest from a number of perspectives. These include the relative priorities of the victorious powers, acquisition and testing of ex-enemy materiel and the intended future capabilities of those ex-enemy navies that were to be allowed to continue to exist. This new book traces the histories of navies and ships of the defeated powers from the months leading up to the relevant armistices or surrenders through to the final execution of the appropriate post-war settlements. In doing so, it discusses the way in which the victorious powers reached their final demands, how these were implemented, and to what effect. The later histories of ships that saw subsequent service, either in their original navies or in those navies which acquired them, are also described. In doing this, much use is made of material drawn from archival, and in some cases archaeological, sources, some of which has never previously been used. Through these, a wide range of long-standing myths are busted, and some badly distorted modern views and assessments of events in the wake of the conflicts put right. The fascinating narrative will be accompanied by tabulated lists of all major navy-built (and certain significant ex-mercantile) enemy ships in commission at the relevant date of the armistice or surrender, or whose hulks were specifically listed for attention in post-Second World War allied agreements. These will include key dates in their careers and their ultimate fates. This highly original book, drawing on archaeological evidence as well as archival sources, and including numerous photographs will become an essential reference tool for all those interested in the naval history of the two World Wars.

The military balance. 1987-1988 (1987) BRILL

Looks at the first four decades of manned flight, covering the rise of military and commercial aviation while charting the progress of such companies as Santos-Dumont, Farman, and Curtiss in advancing aviation and aviation technology.

**Jane's All the World's Aircraft, 1999-2000** Putnam Publishing Group

This is a pictorial history and technical encyclopedia of Hitler's air power in WW II.

Air Warfare Zenith Press

History of aviation from its earliest days to the present.

*Journal of the United States Artillery* Seaforth Publishing

The Dragon Takes Flight: China's Aviation Policy, Achievements, and International Implications analyzes China's journey toward the development of its C-919 large passenger aircraft. Through the use of primary sources in English and Chinese, including interviews with important players in China's aviation industry, Levine builds on Michael Porter's Diamond Model to explore the underlying question of whether or not China will successfully

develop a competitive large passenger aircraft. The model serves as a blueprint for determining what China is doing right and what areas need to improve. This study also looks at the potential implications the success of the C-919 may have on Boeing and Airbus and the ways in which both companies might prepare to meet the challenges they face.

**Motor** Lloyd's Register

The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

Lloyd Register of Shipping 1940 Sailing Vessels Howell Press

This book provides a reference source for vital military and defence information.

**Air Forces of the World** Lulu.com

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

**Pacific Defence Reporter** Arco

In addition to those aircraft built in Eastern European nations for domestic use and export, warplanes of the non-aligned nations are also described and illustrated. Descriptions are complimented by high-quality three-view drawings and large photographs, assisting positive identification.

*Official Gazette of the United States Patent and Trademark Office* Surplus Record

The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

Encyclopedia of Modern Military Aircraft Surplus Record

First published in 1987, The Compendium of Armaments and Military Hardware provides, within a single volume, the salient technical and operational details of the most important weapons. The complete range of hardware used in land, sea and air forces throughout the world at the time of publication is covered, from tanks to rocket systems, helicopters to cruise missiles, alongside full details of size, weight and operational range. The book's main strength lies in the detail it gives of armament and associated ammunition capabilities, and of the sensors and other electronics required for the weapons to be used effectively. A key title amongst Routledge reference reissues, Christopher Chant's important work will be of great value to students and professionals requiring a comprehensive and accessible reference guide, as well as to weapons 'buffs'.

*Indonesia Air Force Handbook Volume 1 Strategic Information and Weapon Systems*

"An information-packed handbook covering some 180 of the major military aircraft in service with the air forces of today ... Each aircraft is covered by text detailing its origins, history and variants, followed by a full technical specification; and each type is additionally illustrated in color and with a three-view diagram"--Jacket.

*Hidden Warbirds*

Measures how the world has been changed by the first human flight, examining military aviation after World War II, the safety of flight, the future of aviation, and centenary attempts to recreate the Wright brothers' first flights.
