Working Papers for use with Financial Accounting McGraw-Hill/Irwin

Financial Accounting, 10e, by Meigs/Williams/Haka/Betner will gain support in traditional accounting departments where instructors expect students to not only understand the concepts of accounting, but to be able to apply and perform accounting processes. Truly a revision based on users needs and market feedback, the tenth edition of *Financial Accounting* offers increased end-of-chapter material, and a new student CD-ROM including GLAS, SPATS, and student tutorial. Chapters 6-10 are reorganized to be more consistent with the structure of a balance sheet, making the accounting process much clearer for the student. Finally, by providing a stronger foundation, Meigs better

prepares students to apply concepts such as the Statement of Cash Flows and Financial Statement Analysis in later chapters. These changes and others have made an already proven financial accounting text even stronger.
