The objective of the first chapter is to deal with some theoretical reasons of the decline of democracy such as lack of</p>
--	---	---

holistic approach, omission of civil society and varied forms of democracy. Out of many theoretical defects the book especially highlights the problem of precision regarding the meaning and nature of democracy and omission of civil society in democracy. Omission of civil society in democratic discourses has been a direct cause of the decline of democracy. That the people are

ignored in practical democracy is due to the fact that civil society is absolutely omitted from the democratic narratives. The book also highlights some of major practical problems that are downgrading the importance, implication and relevance of democracy today in reality. Such practical problems are corruption, rule of the elites in lieu of rule of the people,

inequality of race, gender and religion and lack of leadership. Under this perspective, it is necessary to have an open look towards the positive points of democracy. Since, there is no much better alternative than democracy we must have to highlight its strong points such as scope of debate, discussion, participation and formation of opinion by which democracy can be a people-

friendly political system as well as an ideology and a cultural practice. Thus, this book is not only a criticism of democracy, but also a call for revisiting its strength by which democracy can still claim to be a suitable alternative of all types of statecraft, political systems and social and cultural pattern of life.

It is based on the "19th National Conference of the Input- Output Research Association of India (IORA)", held in 2017 in Mumbai, India. The conference
---	---	--

promoted the exchange of ideas on input-output analysis and related methods among economists, government officials, policymakers, academicians and industrialists. The book captures the unique ideas of prominent scholars, extends the basic "input-output framework," analytical tool, outlines the possible impacts of some major policy decisions adopted by

the Government of India, and puts forward concrete policy suggestions. In addition, it highlights the versatility of the Leontief model, which is currently being extended to cover a diverse spectrum of policy issues, ranging from agricultural productivity to science and technology and from carbon hotspots to energy and environmental consequences . A perfect blend of

theory and application, the book provides a realistic outlook on sensitive economies and interdependencies between sectors.
