How well do you know our closest neighbour? Featured on BBC Radio 4 Saturday Live and BBC Breakfast The moon has fascinated humankind since the beginning of history. But far from being just a big rock out in space, the Moon has a phenomenal power over the earth, with its ability to create great waves, dictate

the length of the day and summon the seasons. It is a key player in the story of our planet. In this unique celebration of the Moon, lunar expert and space scientist Dr Maggie Aderin Pocock takes readers on a journey through the Moon's past, present and future. She uncovers the way the Moon has captured our imaginations, contemplates how it was formed, and uncovers why we need the Moon to protect our fragile earth. Drawing on the latest scientific research, she then looks forward to what might be to come - will we return to the moon or will it become a

launch pad to go into the great unknown? Filled with fascinating facts and anecdotes, and written with warmth and passion, *The Book of the Moon* is for scientists and stargazers alike. You'll never look at our closest neighbour in the same way again.

The Moon's Time to Shine Writers Republic LLC

"A brave and moving novel [that] has a tender empathy with the natural world."
—Hermione Lee, *The New York Review of Books*
From the two-time Booker Prize finalist author of *Days Without End* comes

a dazzling companion novel about memory and identity, set in Tennessee in the aftermath of the Civil War Winona Cole, an orphaned child of the Lakota Indians, finds herself growing up in an unconventional household on a farm in west Tennessee. Raised by her adoptive parents John Cole and Thomas McNulty, whose story Barry told in his acclaimed previous novel *Days Without End*, she forges a life for herself beyond the violence and dispossession of her past. Tennessee is a state still riven by the bitter legacy of the Civil War, and the fragile harmony of her family is soon threatened by a further traumatic event, one which Winona struggles to confront, let alone understand. Exquisitely written, *A Thousand Moons* is a stirring, poignant story of love and redemption, of one woman's journey and her determination to write her own future.

From author and illustrator Tom Percival, creator of the bestselling *Big Bright Feelings* series: A magical, reassuring picture book about moving house, to soothe even the biggest worries! Ivan's old house had always been so warm and friendly. This new one was NOT. Ivan finds

his new house strange and can't sleep. He lies awake and then sees a shimmering light come down. The light turns into a creature called a Moji, and it takes him on a fabulous night-time adventure, up high into space, bounding through starlit forests and down deep into the oceans. Ivan has never had so much fun! And the magical Moji shows him that soon the new house will feel like home. A gently emotional story to reassure fears about moving house, with stunning artwork and a wonderful magical element. The author/illustrator of *Herman's Letter* has shown his breadth of talent with this new direction.

This beautifully illustrated children's book tells the story of the Apollo Missions, when incredible intelligence, engineering, and bravery allowed humans to stand on the surface of something other than Earth for the very first time. "When I first looked back at the Earth, standing on the surface of the Moon, I cried." From the 1969 first moon landing to the amazing rescue of Apollo 13, each chapter tells the story of a different mission. Humorous details bring the astronauts to life: discover how the astronauts of Apollo 12 were so over-excited when they stepped onto the Moon that Mission Control had to tell them to quiet down, and Shepard (Apollo 14) somehow managed to smuggle a golf club onto his spacecraft! Published to celebrate the 50th anniversary of the first moon landing, this is the perfect book for any child who has ever looked up at the moon and wondered what it might be like to go there.

Gardens of the Moon Random House
A terrifying thriller for young adult fans of *The Martian* and paranormal space adventure that will be devoured in one heart-pounding sitting. It's been decades since anyone set foot on the moon. Now three ordinary teenagers, the winners of NASA's unprecedented, worldwide lottery, are about to become the first young people in space--and change their lives forever. It's the opportunity of a lifetime, but little do the teenagers know that something sinister is waiting for them on the desolate surface of the moon. And in the black vacuum of space...no one is coming to save them. In this chilling adventure set in the most brutal landscape known to man, highly acclaimed Norwegian novelist Johan Harstad creates a vivid and frightening world of possibilities we can only hope never come true.

This book is a night time story. It's about a little girl named Shelly discovering the

moon for her first time with her mother.

50 Things to See on the Moon U of Nebraska Press

With hand-colored woodcuts and lyrical poems, *When the Moon is Full* portrays the twelve full moons of the year. Traditional Native American names, from the Wolf Moon to the Long Night Moon, follow the monthly path of the moon in all its wonder. A question-and-answer section provides moon gazers old and new with information about the moon's surface, lunar eclipses, and the true meaning of a blue moon.

The First Men in the Moon St. Martin's Essentials

Reprinted in 1994. This vol. presents tables giving the dates of all new & full moons during an historical era when these data were of considerable interest & importance. To make them more useful the longitudes of the moon at each of these times is also given, as is a consecutive enumeration of the conjunctions & a similar one of the oppositions. All dates are reckoned in the Julian calendar & all times are given in hours & the nearest minute. These dates & times are calculated for an observer in

Babylon, or equivalently Baghdad, since this location is fairly centrally located for the historians of the period, exactly 3 hours west of Greenwich. Moreover, the time used is civil time & is based on a 24-hour clock with its origin at midnight; thus noon is 12 hours. Since this vol. may be considered as a supplement to Bryant Tuckerman's tables, all fundamental astronomical elements have been taken from them.

Boston was nothing like South Carolina. Up there, colored folks could go anywhere they wanted. Folks didn't wait for church to dress in their fancy clothes. Fancy was just life. Mama was a city girl . . . and now I was going to be one too. It's 1944, and in a small Southern town, eleven-year-old Ella spends her summers running wild with her cousins and friends. But life isn't always so sunny. The deep racial tension that simmers beneath their town's peaceful facade never quite goes away, and Ella misses her mama - a beautiful jazz singer, who lives in Boston. So when an invitation arrives to come to Boston for a visit Ella is ecstatic - and the trip proves life-changing in more ways than one. For

the first time, Ella sees what life outside of segregation is like, and begins to dream of a very different future. But her happiness is shattered when she returns home to the news that her classmate has been arrested for the murder of two white girls - and nothing will ever be the same again. A beautifully written and deeply moving story about finding and fighting for your place in the world.

Moon Profile Books

This space-soaring adventure lets young children glimpse what it would be like to fly into outer space, walk on the moon, and look back at Earth from a very long way away. Part of the Usborne Reading Programme developed with reading experts at the University of Roehampton, specially written for children just starting to read alone. This ebook includes audio and reading-related puzzles. "Crack reading and make confident and enthusiastic readers with this fantastic reading programme." - Julia Eccleshare Bringing Down the Moon Penguin UK Have you always wanted to explore the Moon like Neil Armstrong or the eleven other astronauts who have walked on its surface? You can tour the Moon from your

own backyard with a small telescope or binoculars. This book will point you to the Sea of Tranquility (the landing spot for Apollo 11) and many other fascinating features you can spot on the Moon's surface. Beginning with the New Moon, as each day passes, an additional slice of the Moon becomes visible. With each new slice comes new craters, lunar seas and jagged mountain ranges. This easy-to-use, illustrated reference book enables everyone, young and old, to better appreciate our nearest neighbour in space.

A Sunday Times must read book of 2019 'An out-of-this-world read ... brilliant and compelling. Morton is a high-octane British science journalist, and every chapter is littered with material that strikes, amazes or haunts ... this is a book filled not just with a lifetime's knowledge of its subject but with a lifetime's suppressed excitement.' James McConnachie, Sunday Times Every generation has looked up from the Earth and wondered at the beauty of the Moon. 50 years ago, a few Americans became the first to do the reverse - with the whole world watching through their eyes. In this short but wide-

ranging book, Oliver Morton explores the history and future of humankind's relationship with the Moon. A counterpoint in the sky, it has shaped our understanding of the Earth from Galileo to Apollo. Its gentle light has spoken of love and loneliness; its battered surface of death and the cosmic. For some, it is a future on which humankind has turned its back. For others, an adventure yet to begin. Advanced technologies, new ambitions and old dreams mean that men, women and robots now seem certain to return to the Moon. What will they learn there about the universe, the Earth-and themselves? And, this time, will they stay?

The Sky at Night: Book of the Moon - A Guide to Our Closest Neighbour

From Maya Soetoro-Ng, sister of President Obama, comes a lyrical story relaying the loving wisdom of their late mother to a young granddaughter she never met. (Ages 4-8) Features an audio read-along performed by the author! Little Suhaila wishes she could have known her grandma, who would wrap her arms around the whole world if she could, Mama says. And one night, Suhaila gets her wish when a golden ladder appears at her window, and Grandma Annie invites the girl to come along with her on a magical journey. In a rich and deeply personal

narrative, Maya Soetoro-Ng draws inspiration from her mother's love for family, her empathy for others, and her ethic of service to imagine this remarkable meeting. Evoking fantasy and folklore, the story touches on events that have affected people across the world in our time and reaffirms our common humanity. Yuyi Morales's breathtaking artwork illuminates the dreamlike tale, reminding us that loved ones lost are always with us, and that sometimes we need only look at the moon and remember.
