This volume contributes to closing the unfortunate divide that still exists today between the so-called 'practical' and 'classical' disciplines in seminary curricula. It builds a bridge across a chasm that should not

exist. The chapters reflect 'working on the bridge' through a collegial model of sustained conversation out of the contributors' different disciplines within Bible and Practical Theology. The authors in this volume desire to break out of academic silos that too often lead to fragmented student learning and disjointed ministry practices, in the hope that the imaginations of students, scholars, and ministers

may be stimulated in the service of holistic ministry. The book is divided into two sections, I: Theoretical Frameworks, in which the authors invite the reader to look more broadly at issues of method, context, geography, and culture as biblical texts and practical theology are brought into dialog, and II: Reading Biblical Texts, which explores biblical books or texts while wearing the lenses of practical

theology to mine the intersections and complexities of the encounter across disciplines. Whether singly or jointly authored, these essays model a dynamic, interactive reading of human situations and biblical texts in order to reveal their multivalent complexities.

Great Pages in History from the Wisconsin State Journal,

From the concert stage to the dressing room, from

the recording studio to the digital realm, SPIN surveys the modern musical landscape and the culture around it with authoritative reporting, provocative interviews, and a discerning critical ear. With dynamic photography, bold graphic design, and informed irreverence, the pages of SPIN pulsate with the energy of today's most innovative sounds. Whether covering what's new or what's next, SPIN is your monthly VIP pass to all that rocks.
Index Medicus Routledge

Over the last two decades Oprah Winfrey's journey has taken her from talk show queen to-as Time Magazine has asserted-"one of the most important figures in popular culture." Through her talk show, magazine, website, seminars, charity work, and public appearances, her influence in the social, economic, and political arenas of American life is considerable and until now, largely unexamined. In *The Age of Oprah*, media scholar and journalist Janice Peck

traces Winfrey's growing cultural impact and illustrates the fascinating parallels between her road to fame and fortune and the political-economic rise of neoliberalism in this country. While seeking to understand Oprah's ascent to the near- iconic status that she enjoys today, Peck's book provides a fascinating window into the intersection of American politics and culture over the past quarter century.

Vols. for 1963- include as pt. 2 of the Jan. issue: Medical subject headings. *Pro-justice Ethics* Sports Publishing LLC
This engaging volume presents the exciting new technology of additive manufacturing (AM) of metal objects for a broad audience of academic and industry researchers, manufacturing professionals, undergraduate and graduate students, hobbyists, and artists. Innovative applications ranging from rocket nozzles to custom jewelry

to medical implants illustrate a new world of freedom in design and fabrication, creating objects otherwise not possible by conventional means. The author describes the various methods and advanced metals used to create high value components, enabling readers to choose which process is best for them. Of particular interest is how harnessing the power of lasers, electron beams, and electric arcs, as directed by advanced computer models, robots,

and 3D printing systems, can create otherwise unattainable objects. A timeline depicting the evolution of metalworking, accelerated by the computer and information age, ties AM metal technology to the rapid evolution of global technology trends. Charts, diagrams, and illustrations complement the text to describe the diverse set of technologies brought together in the AM processing of metal. Extensive listing of terms, definitions, and acronyms provides the reader with a

quick reference guide to the language of AM metal processing. The book directs the reader to a wealth of internet sites providing further reading and resources, such as vendors and service providers, to jump start those interested in taking the first steps to establishing AM metal capability on whatever scale. The appendix provides hands-on example exercises for those ready to engage in experiential self-directed learning.

Psychology Press

"Pro-Justice Ethics: From Lament to Nonviolence is an original work within Christian social ethics and is based upon the civil rights movement, the philosophy of nonviolence, and the biblical lament tradition. The author formulates the justice imperative as an

ethic of duty and defines justice as an act of protesting, preventing, and remedying injustices that cause human suffering. Formally, injustice is the violation of fairness, equality, and dignity, but in its primal form injustice is child abuse. Birth and death are discussed from a justice perspective beyond the dichotomy of pro-life and pro-choice. Special attention is devoted to the injustices of globalization, international human rights abuses, and

corporate violations of the natural rights of water in the earth commons." -- Book Jacket.

Stern's Performing Arts Directory Walk Through the Bible

Traces Oprah Winfrey's cultural impact and illustrates the parallels between her road to fame and fortune and the political-economic rise of neoliberalism.

The Ancient Secret of the Flower of Life, Volume 2
John Wiley & Sons

Revolutionary advances in biomedical research and information systems

technology pose new and difficult issues for American health care policy, especially in the context of managed care. Health Care Policy in an Age of New Technologies takes on this challenging array of issues, where the dignity of individual life meets the imperatives of the national-level health care system: the right to die, rationing of care, organ transplants, experiments with human embryos, genetic research, confidentiality of medical records, and other ethical dilemmas.

Chapters on a patients' bill of rights, and on medical education and physician training, link the book to policy issues of direct concern to the public and practitioners. Throughout the book, the authors place critical questions in their political, legal, social, economic, and ethical context. Each chapter ends with discussion points, and a multimedia bibliography directs readers to relevant films, documentaries, and case studies.

Popular Mechanics

University of Texas Press

Why is there such a proliferation of economic discourses in literary theory, cultural studies, anti-sweatshop debates, popular music, and other areas outside the official discipline of economics? How is the economy represented in different ways by economists and non-economists? In this volume, scholars from a wide variety of disciplines and countries, from inside and outside the academy, explore the implications of the fact that the economy is being represented in so many different ways. They

analyze what it means for scholars and activists in trying to make sense of existing representations--theories, pictures, and stories--of the economy. They also show how new representations can be produced and utilized to change how we look at and participate in current economic debates. By encouraging the mutual recognition of existing approaches and exploring the various ways economic representations function in diverse venues within and beyond mainstream economics,

Ruccio has produced a book that is relevant to subjects as diverse as economic sociology and anthropology, political economy, globalization and cultural studies.

The sacred Flower of Life pattern, the primary geometric generator of all

physical form, is explored in even more depth in this volume, the second half of the famed Flower of Life workshop. The proportions of the human body, the nuances of human consciousness, the sizes and distances of the stars, planets and moons, even the creations of humankind, are all shown to reflect their origins in this beautiful and divine image. Through an intricate and detailed geometrical mapping, Drunvalo Melchizedek shows how the seemingly simple design of the

Flower of Life contains the genesis of our entire third-dimensional existence. From the pyramids and mysteries of Egypt to the new race of Indigo children, Drunvalo presents the sacred geometries of the Reality and the subtle energies that shape our world. We are led through a divinely inspired labyrinth of science and stories, logic and coincidence, on a path of remembering where we come from and the wonder and magic of who we are. Finally, for the

first time in print, Drunvalo shares the instructions for the Mer-Ka-Ba meditation, step-by-step techniques for the re-creation of the energy field of the evolved human, which is the key to ascension and the next dimensional world. if done from love, this ancient process of breathing prana opens up for us a world of tantalizing possibility in this dimension, from protective powers to the healing of oneself, of others and even of the planet. Embrace the

expanded vision and understanding that Drunvalo offers to the world. Coincidences abound, miracles flourish and the amazing stories of mysteries unveiled arise as the author probes the Ancient Secrets of the Flower of Life.

ABA Journal M.E. Sharpe *Touched* is the story of Jerry Sandusky's life in his own words. From his childhood to his professional career, this book goes behind the scenes to explore the successes and challenges that Jerry Sandusky has faced in life, both on and off the football field. After

graduating from Penn State in 1966, Sandusky went on to coach collegiate football for 34 years. Thirty-two of those years were with Penn State, as the defensive coordinator and linebackers coach under Joe Paterno, until his retirement in 1999. The book also explores Sandusky's involvement in children's charities, including the founding of his charity, "Second Mile." **Give Sorrow Words** Univ of Wisconsin Press In its 114th year, Billboard remains the world's
