 Society is full of would-be 'change agents'-campaigners, government officials, enlightened business people, engaged intellectuals-set on improving public services, reforming laws and regulations, guaranteeing human rights, achieving a fairer deal for those on the sharp end, and greater recognition for any number of issues. Drawing on many first-hand examples and numerous new case studies and interviews with grassroots activists and organizations around the world, as well as Oxfam's unrivalled global experience, this important book answers the question: how does change happen and how can we-governments, organizations, businesses, leaders, campaigners, employees, and ordinary citizens-make a difference?

As part of Motown's legendary songwriting and production team of Holland-Dozier-Holland, Lamont Dozier is responsible for such classics as "Baby I Need Your Loving," "You Can't Hurry Love," "I Can't Help Myself (Sugar Pie, Honey Bunch)," "Stop! In the Name of Love," "Heat Wave," "Baby Love," "It's the Same Old Song," "Nowhere to Run," "You Keep Me Hanging On," "Reach Out I'll Be There," "How Sweet It Is (To Be Loved by You)," and many more. After leaving Motown, he continued to make his mark as an influential songwriter, artist, and producer with hits such as "Give Me Just a Little More Time," "Band of Gold," and "Two Hearts," a chart-topping Phil Collins single that earned the pair an Academy Award nomination and a Grammy win. In *How Sweet It Is* Lamont takes us behind the scenes of the Motown machine, sharing personal stories of his encounters with such icons as Diana Ross, Marvin Gaye, Stevie Wonder, Smokey Robinson, and Berry Gordy. He reveals the moments that inspired some of his timeless songs—and pulls back the curtain on the studio secrets that helped him and his colleagues create "the sound of young America." From his early years of struggle growing up in Detroit to the triumphs and tragedies that have marked his personal and professional path, at the center of Lamont's story is the heart of a true songwriter. Though he's racked up well over 100 Top 10 singles on the Billboard charts, been inducted into Songwriters Hall of Fame and the Rock & Roll Hall of Fame, and has been named among Rolling Stone magazine's "100 Greatest Songwriters of All Time," Lamont continues to write music every day. Having pursued the mystery of the songwriting muse for many years, his stories are interwoven with invaluable insights and wisdom on the art and craft of songwriting that will inspire the creative spark in all of us.

Historic England  
 In the beginning, there was the river — before the beach, before the drain, before the dredging, before the dams, before numerous other actions that altered the stream. *River Dreams* reveals the complex history of the Cooks River in south-eastern Sydney — a river renowned as Australia's most

altered and polluted. While nineteenth century developers called it 'improvement', the sugar mill, tanneries, and factories that lined the banks of Sydney's Cooks River had drastic consequences for the health of the river. Local Aboriginal people became fringe dwellers, and over time the river became severely compromised, with many ecosystems damaged or destroyed. Later, a large section was turned into a concrete canal, and in the late 1940s the river was rerouted for the expansion of Sydney Airport. While much of the river has been rehabilitated in recent decades by passionate local groups and through government initiatives, it continues to be a source of controversy with rapid apartment development placing new stresses on the region. *River Dreams* is a timely reminder of the need to tread cautiously in seeking to dominate, or ignore, our environment. A beautiful book that reminds us that Australians are river people as much as we are bush or coast dwellers.' — IAN HOSKINS

CFA Institute Research Foundation  
 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Written for Glasgow Unity in 1947, this extraordinarily moving play of women surviving in the east end of Glasgow of the 1930s was revived by 7:84 Company to tremendous critical acclaim. It finds in the lives of Maggie, her family and her neighbours not only all the tragedy that appalling housing, massive unemployment and grinding poverty can produce, but also a rich vein of comedy - the sense of the ridiculous, the need for a good laugh.

Amid the increased use of the notion of cultural capital as a theoretical or analytical tool in educational research remain many different definitions, misconceptions, and appropriations of the concept. Cultural capital—the cultural relevant knowledge, competencies, skills, or abilities valued in a particular context—acts as a form of social currency in educational settings. This monograph extensively reviews the past thirty years of research, investigating the strengths and weaknesses regarding the widely varying uses of cultural capital in educational research. Although the concept of cultural capital holds great promise for explaining the perpetuation of power and privilege, unfulfilled hopes remain. The use of the economic metaphor implied by cultural capital, the lack of attention to race and gender inequalities, the possibility for misunderstanding in transferring the concept between countries and a general implied deficiency model present limitations in many studies of cultural capital. An understanding of cultural capital, if appropriately theorized about and applied to research, has the promise of helping to understand and transform educational inequalities. This is Volume 36 Issue 1 of the Jossey-Bass publication ASHE Higher Education Report. Each monograph in the series is the definitive analysis of a tough higher education problem, based on thorough research of pertinent literature and institutional experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write the reports, with experts providing critical reviews of each manuscript before publication.

*Decisions and Orders of the National Labor Relations Board, V. 352* The Lamont CaseHow Sweet It Is In Members Only Diana Kendall shows how the upper classes use exclusive clubs as their private domain for conducting business, fostering social networks, and launching the next generation of elites - all beyond the view of outsiders and the media. In her research, Kendall explains how and why club members routinely engage in exclusionary practices that help them accumulate personal power and social capital that is unavailable to outsiders. Members Only addresses how exclusive private clubs maintain and perpetuate class-based privilege and racial/ethnic and religious segregation, and how such patterns of social exclusion heighten social inequality. This book continues Kendall's study of the upper classes, which began with *The Power of Good Deeds*, and *Framing Class*.

Since its first publication more than twenty-five years ago, *How to Build a Habitable Planet* has established a legendary reputation as an accessible yet scientifically impeccable introduction to the origin and evolution of Earth, from the Big Bang through the rise of human civilization. This classic account of how our habitable planet was assembled from the stuff of stars introduced readers to planetary, Earth, and climate science by way of a fascinating narrative. Now this great book has been made even better. Harvard geochemist Charles Langmuir has worked closely with the original author, Wally Broecker, one of the world's leading Earth scientists, to revise and expand the book for a new generation of readers for whom active planetary stewardship is becoming imperative. Interweaving physics, astronomy, chemistry, geology, and biology, this sweeping account tells Earth's complete story, from the synthesis of chemical elements in stars, to the formation of the Solar System, to the evolution of a habitable climate on Earth, to the origin of life and humankind. The book also addresses the search for other habitable worlds in the Milky Way and contemplates whether Earth will remain habitable as our influence on global climate grows. It concludes by considering the ways in which humankind can sustain Earth's habitability and perhaps even participate in further planetary evolution. Like no other book, *How to Build a Habitable Planet* provides an understanding of Earth in its broadest context, as well as a greater appreciation of its possibly rare ability to sustain life over geologic time. At a time when many boys are in crisis, a much-needed roadmap for helping boys grow into strong and compassionate men Over the past two decades there has been an explosion of new studies that have expanded our knowledge of how boys think and feel. In *How to Raise a Boy*, psychologist Michael Reichert draws on his decades of research to challenge age-old conventions about how boys become men. Reichert explains how the paradigms about boys needing to be stoic and "man like" can actually cause them to shut down, leading to anger, isolation, and disrespectful or even destructive behaviors. The key to changing the culture lies in how parents, educators, and mentors help boys develop socially and emotionally. Reichert offers readers step-by-step guidance in doing just this by:

- Listening and observing, without judgment, so that boys know they're being heard.
- Helping them develop strong connections with teachers, coaches, and other role models
- Encouraging them to talk about their feelings about the opposite sex and stressing the importance of respecting women
- Letting them know that they don't have to "be a man" or "suck it up," when they are experiencing physical or emotional pain.

Featuring the latest insights from psychology and neuroscience, *How to Raise a Boy* will help those who care for young boys and teenagers build a

boyhood that will enable them to grow into confident, accomplished and kind men.

UPDATED FOR 2020 WITH A NEW PREFACE BY NATE SILVER "One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the "prediction paradox": The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an essential read.

The advent of Court TV and the increasing news coverage of high-profile trials have pushed legal proceedings to the forefront of public interest today. Jon L. Breen has answered a growing demand for information with a second edition of *Novel Verdicts: A Guide to Courtroom Fiction*, a critical bibliography of courtroom fiction. This new edition not only updates old annotations, but explores the literary response to new areas of focus and development that have emerged in the law since 1984. The original 421 entries have been retained among the 790 in the present volume, and Breen's guide also highlights a number of specialists who have recently emerged, including John Grisham, Steve Martini, William Bernhardt, Paul Levine, and Richard North Patterson. Annotations provide general information about the author and indicate the proportion of trial action included in each book. A critical bibliography for librarians, lawyers and courtroom enthusiasts alike, *Novel Verdicts* is a useful and easy-to-use reference tool that captures the changes in the law as depicted in courtroom fiction.

Nikolaus Pevsner described Berwick-upon-Tweed as 'one of the most exciting towns in England' [Nikolaus Pevsner, *Buildings of England: Northumberland* (1957), 88] - a place where an absorbing historical tale can still be read in the dense fabric of its old streets and buildings. It attracts not only day-trippers and holidaymakers but also new residents who have learnt to appreciate the spirit of the place. But outsiders all too easily confine their attention to the space within the impressive Elizabethan ramparts, while local people are sometimes unaware or dismissive of the wider significance of the very things that they know so intimately. Berwick deserves to be known better, and to be celebrated not just as a vivid reminder of what many other towns were once like, but more especially as something unique and distinctive, shaped by a peculiar combination of historical and geographical circumstances. This distinctiveness is acutely apparent as one passes between Berwick and the contrasting, but historically intertwined, settlements of Tweedmouth and Spittal. This book presents something of the wealth of historic interest encapsulated in Berwick, Tweedmouth and Spittal, and explains how these places came to assume such varied and distinctive forms. Above all, it urges that a town anxious for stability and prosperity in the future must know where it has come from as well as where it is going.
