This book is
designed for
directors,
visual
designers and
outside staff
in order for

them to better understand their percussion section. The book teaches these staff members how to go about working with the percussionists and composing drill for them. The book's goal is to allow the full ensemble to benefit more from their percussion section as led by their staff. When everyone is on the same page the percussion section can reach its full potential.

Sound Innovations - Conductor's Score (Concert Band), Book 1
Alfred Music
The Encyclopedia of Percussion is an extensive guide to percussion instruments, organized for research as well as general knowledge. Focusing on idiophones and membranophones, it covers in detail both Western and non-Western percussive instruments. These include not only instruments

whose usual sound is produced percussively (like snare drums and triangles), but those whose usual sound is produced concussively (like castanets and claves) or by friction (like the cuíca and the lion's roar). The expertise of contributors have been used to produce a wide-ranging list of percussion topics. The volume includes: (1) an alphabetical listing of percussion

instruments and terms from around the world; (2) an extensive section of illustrations of percussion instruments; (3) thirty-five articles covering topics from Basel drumming to the xylophone; (4) a list of percussion symbols; (5) a table of percussion instruments and terms in English, French, German, and Italian; and (6) an updated section of published writings on

methods for percussion.
