Ship Construction Sketches and Notes
 Butterworth-Heinemann
 The Kemp and Young series is designed to provide an introduction to the topic covered that will be suitable and useful for both those who are newly at sea and those whose practical experience is limited to narrow areas and wish to expand their knowledge. The concise presentation of the subject matter is made possible by the reduction of the work to its simplest terms. This is generally achieved through the omission of unnecessary mathematics or mathematical concepts, and the generous use of diagrams and illustrations. Where appropriate, worked examples are used to reiterate the points being made in the text and will be found useful in furthering the

reader's knowledge of the subject and familiarity with the contents. Rapid reference to the substance of each topic can be made by use of a carefully constructed index.

 Winner of the Booker Prize A historical novel set in the eighteenth century, *Sacred Hunger* is a stunning, engrossing exploration of power, domination, and greed in the British Empire as it entered fully into the slave trade and spread it throughout its colonies. Barry Unsworth follows the failing fortunes of William Kemp, a merchant pinning his last chance to a slave ship; his son who needs a fortune because he is in love with an upper-class woman; and his nephew who sails on the ship as its doctor because he has lost all he has loved. The voyage meets its demise when disease spreads

among the slaves and the captain's drastic response provokes a mutiny. Joining together, the sailors and the slaves set up a secret, utopian society in the wilderness of Florida, only to await the vengeance of the single-minded, young Kemp.
