A growing body of research is showing that mindfulness can reduce stress, improve physical health, and improve one's overall quality of life. Jan Chozen Bays,

MD—physician and Zen teacher—has developed a series of simple practices to help us cultivate mindfulness as we go about our ordinary, daily lives. Exercises include: taking three deep breaths before answering the phone, noticing and adjusting your posture throughout the day, eating mindfully, and leaving no trace of yourself after using the kitchen or bathroom. Each exercise is presented with tips on how to remind yourself and a short life lesson connected with it.

Would an Elephant Enjoy the Seaside?

Farrar, Straus & Giroux (BYR)

The savanna is not an easy place to live, even for African elephants, the largest land animals on earth. If it's

a challenge for these 7,000-pound giants, what's it like for their newborn babies? An infant elephant has precious little time to learn the incredible array of skills that are necessary to keep up, from projecting her voice across a 10-octave range to using the 100,000 muscles in her trunk to stay hydrated. But this giant-to-be has the perfect classroom--a family herd made up of her mother, sisters, cousins, and aunts. With their help and protection, she'll learn how to survive, how to thrive, and how to be an elephant. Award-winning author-illustrator Katherine Roy's *How to Be an Elephant* delves into the intricate family dynamics at play in a typical African herd.

Drawing upon the latest scientific research and Roy's own expedition to Kenya, and brimming with lush watercolor illustrations and detailed diagrams, this book vividly portrays the life and development of an elephant from an uncertain newborn into a majestic adult. As informative as it is beautiful, Roy's unique portrait of an elephant's life will captivate young explorers and animal lovers alike. David Macaulay Studio This title has Common Core connections. Don't Think of An Elephant is the antidote to decades of conservative strategising and the right's stranglehold on political dialogue. More specifically, it is the definitive handbook for understanding and communicating effectively about key social and political issues. George Lakoff explains in detail exactly how the right has managed to co-opt traditional values in order to popularise its political agenda. He also provides examples of how the centre-left can address the community's core values and re-frame political debate to establish a civil discourse that reinforces progressive positions. Don't Think

of An Elephant provides a compelling linguistic analysis of political campaigning. But, more importantly, it demonstrates that real political values and ideas must provide the foundation for political progress by the centre-left.

Up close with the ocean's most fearsome and famous predator and the scientists who study them—just twenty-six miles from the Golden Gate Bridge! A few miles from San Francisco lives a population of the ocean's largest and most famous predators. Each fall, while the city's inhabitants dine on steaks, salads, and sandwiches, the great white sharks return to California's Farallon Islands to dine on their favorite meal: the seals that live on the island's rocky coasts. Massive,

fast, and perfectly adapted to hunting after 11 million years of evolution, the great whites are among the planet's most fearsome, fascinating, and least understood animals. In the fall of 2012, Katherine Roy visited the Farallons with the scientists who study the islands' shark population. She witnessed seal attacks, observed sharks being tagged in the wild, and got an up close look at the dramatic Farallons—a wildlife refuge that is strictly off-limits to all but the scientists who work there. *Neighborhood Sharks* is an intimate portrait of the life cycle, biology, and habitat of the great white shark, based on the latest research and an up-close visit with these amazing

animals.

Françoise Malby-Anthony never expected to find herself responsible for a herd of elephants

with a troubled past. A chic Parisienne, her life changed forever when she fell in love with South African conservationist Lawrence Anthony. Together they founded a game reserve but after Lawrence's death, Françoise faced the daunting responsibility of running Thula Thula without him. Poachers attacked their rhinos, their security team wouldn't take orders from a woman and the authorities were threatening to cull their beloved elephant family. On top of that, the herd's feisty new matriarch Frankie didn't like her. In this heart-warming and moving book, Françoise describes how she fought to protect the herd and to make her dream of building a wildlife

rescue centre a reality. She found herself caring for a lost baby elephant who turned up at her house, and offering refuge to traumatized orphaned rhinos, and a hippo called Charlie who was scared of water. As she learned to trust herself, she discovered she'd had Frankie wrong all along . . . Filled with extraordinary animals and the humans who dedicate their lives to saving them, *An Elephant in My Kitchen* by Françoise Malby-Anthony is a captivating and gripping read.
