Assessment in Geographical Education: An International Perspective Hodder Education
Seminar paper from the year 2002 in the subject English Language and Literature Studies - Linguistics, grade: 2,3 (B), University of Heidelberg (Anglistics Seminar), course: Hauptseminar: Language in Social and Geographical Space, language: English, abstract: Dialect topography was invented by J. K.

Chambers. He used this method in the Golden Horseshoe (v. 4.3 Survey area: The Golden Horseshoe) for the first time. "Intended as an alternative to dialect geography" (CHAMBERS 1994:35), dialect topography contains - like dialect geography - methods for surveying dialect variants in a region. In its basics dialect topography accords with dialect geography. "Both provide a macro-level perspective on linguistic variation. Both survey people in a continuous area, making it possible to identify and isolate gross linguistic differences among speakers from region to region. They can

also provide the basis for charting linguistic change in subsequent surveys" (CHAMBERS 1994:35-36). Although both methods are very similar, there are two important differences which will be discussed in the following passages. In order to investigate the influence of non-native speakers on language use in the community, J. K. Chambers invented the Regionality Index (RI). This mechanism allows to identify and compare the languages of different test persons. The relationship between the subjects' link to the region can be investigated as well as to which extent the subject talks like a

local. This method will be discussed in the second part of this study.

In recent years there has been increased attention paid to the importance of

assessment in Geographical Education, the chosen subject for this book.

Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare.

This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student's knowledge and skills.

On the train, on the beach, on the sofa ... many people in all parts of the world enjoy doing wordsearches. If you are studying English and want to learn and practise vocabulary related to various topics, then this book is for you! The topics reflect the kinds of everyday conversations that you might have both with native and non-native speakers of English. The topics are also those that are typically tested in English examinations e.g. TOEFL, Cambridge (First Certificate, Advanced), IELTS, and Trinity. Each chapter begins with a list of questions to enable you to have a conversation about a particular topic in various situations: on a social occasion (e.g. a work dinner, a conference lunch, a party); in the classroom during an English lesson; when chatting, either face to face or online; and during an English oral exam. After the list of questions, you will find a Word List associated with the topic and exercises to test your knowledge of less common words. The final aim is then to find the words from the Word List in the related Wordsearch. Easy English! is a series of books to help you learn and revise your English with minimal effort. You can improve your English by: reading

texts in English that you might normally read in your own language e.g. jokes, personality tests, lateral thinking games, and wordsearches; doing short exercises to improve specific areas grammar and vocabulary, i.e. the areas that tend to lead to the most mistakes - the aim is just to focus on what you really need rather than overwhelming yourself with a mass of rules, many of which may have no practical daily value. Other books in the Easy English! series include:

[The Impact of Immigration on the Urbanization Process of the Global City Buenos Aires](#) TeacherNI

Seminar paper from the year 2018 in the subject Geography / Earth Science - Demographics, Urban Management, Planning, grade: 2,0, Austral University of

Chile, language: English, abstract: When thinking about diverse melting pots on the American continent, people tend to think about diverse global cities such as New York and Toronto. However, in terms of cultural diversity, Buenos Aires is equally strong. The city's diversity can be seen when looking at the population and what the city has to offer. Not only are urban buildings, the food, the music and the tango influenced by immigrants who entered the country. Also many events the city of Buenos Aires hosts acknowledges the many immigrants who have shaped this city and the entire country until today. One of these events is the "Buenos Aires celebra ..." program which was founded in 2009 to support the celebration of foreign countries whose people have immigrated to Argentina. Communities as diverse as Austria, Basque, Croatia, Poland, Paraguay and Peru take part, offering a bit of their culture on Avenida de Mayo, in the historic center of this intercultural South American capital. How diverse the city is can be derived from the numbers: 4 out of 10 inhabitants of the City of Buenos Aires were born outside of the capital and even 12, 8% were born outside of the country of

Argentina. Needless to say, that a population as high as 13.000.000 in agglomerations and a high degree of diverse brings opportunity as well as it creates challenges. This essay will examine the impact immigration had on the urbanization process of Buenos Aires into becoming a diverse megacity. One of the first factors was the sharp increase of the population due to the European immigration wave of the 19th century, so the reasons and effects of European immigration will be outlined. As in the 20th century the immigrants' origins shifted from Europe to South American countries, this second major immigration wave will be discussed. Based on these
