### CFP Board Financial Planning Competency Handbook Career Examination

Introduction to Policing, Third Edition continues to focus on the thought-provoking, contemporary issues that underscore the challenging and rewarding world of policing. Steven M. Cox, Susan Marchionna, and experienced law enforcement officer Brian D. Fitch balance theory, research, and practice to give students a comprehensive, yet concise, overview of both the foundations of policing and the expanded role of today's police officers. The accessible and engaging writing style, combined with stories from the field, make policing concepts and practices easy for students to understand and analyze. Unique coverage of policing in multicultural communities, the impact of technology on policing, and extensive coverage of policing strategies and procedures — such as those that detail the use of force — make this bestselling book a must-have for policing courses.

### Our Future Van Schaik Publishers

Throughout Africa, growing numbers of women are coming together and making their voices heard, mobilising around causes ranging from democracy and land rights to campaigns against domestic violence. In Tanzania and Tunisia, women have made major gains in their struggle for equal political rights, and in Sierra Leone and Liberia women have been at the forefront of efforts to promote peace and reconciliation. While some of these

movements have been influenced by international feminism and external donors, increasingly it is African women who are shaping the global struggle for women's rights. Bringing together African authors who themselves are part of the activist groups, this collection represents the only comprehensive and up-to-date overview of women's movements in contemporary Africa. Drawing on case studies and fresh empirical material from across the continent, the authors challenge the prevailing assumption that notions of women's rights have trickled down from the global north to the south, showing instead that these movements have been shaped by above all the unique experiences and concerns of the local women involved.

Twenty Years of Education Transformation in Gauteng 1994 to 2014: An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994. These essays talk to what a provincial education department does and how and why it does these things - whether it be about policy, resourcing or implementing projects. Each essay is written by one or more specialist in the relevant focus area. The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader. It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years, both nationally and provincially. There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm, and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past. We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years.

When a beacon was detected in a distant solar system Gerry Handley assumed, along with every other employee involved, that an automated probe had malfunctioned. There would be a simple

explanation, definitely human involvement. However, there was something else. Events Gerry and his crew could not explain. Something that would strip him of his old life forever. A discovery that would make him dangerous. And as his knowledge grew, so did the gulf between himself and humanity.

Student attrition has been a perennial theme in South African higher education throughout the decade. In its National Plan for Higher Education (2001), the Department of Education attributed high dropout rates primarily to financial and/or academic exclusions. Four years later, it reported that 30% of students dropped out in their first year of study and a further 20% during their second and third years. Against this backdrop, the erstwhile research programme on Human Resources Development initiated a research project to investigate more thoroughly why students dropped out, what led them to persist in higher education to graduation, and what made for a successful transition to the labour market. The chapters in this volume address these issues in relation to one or more of seven institutional case studies conducted in 2005.

In comparing one public school to another, discussions frequently include talk concerning the socioeconomics of a school or district,

which then leads to talk about the advantages that one socioeconomic setting has over another. Educators tend to agree that low academic achievement frequently associated with a low socioeconomic status is a characteristic difficult to resolve for a population of school children. *The Handbook of Research on Social Inequality and Education* is a critical reference source that provides insights into social influences on school and educational settings. Featuring an array of topics including online learning, social mobility, and teacher preparation, this book is excellent for educational leaders, educational researchers, teachers, academicians, administrators, instructional designers, and teacher preparation programs.
