In Jung's ideas about the "blond beast" and other "innate" characteristics of various races, McGowan detects disturbing echoes of Alfred Rosenberg, the German Nazi Party's chief ideologist; and his attitude toward women, by today's standards, is decidedly sexist - all of which makes his continuing popularity in the politically correct 1990s difficult to understand.

This volume on the Roman poet Ovid (43 BCE - 17 CE) comprises articles by an international group of fourteen scholars. Their contributions cover a wide range of topics, including a biographical essay, a survey of the major manuscripts and textual traditions, and a comprehensive discussion of Ovid's style. The remaining chapters are devoted to focused studies of each of Ovid's major works, with emphasis given where appropriate to the poet's interest in genre and narrative techniques, his engagement with the poetry that preceded his oeuvre, his response to the political, religious, and social realities of Augustan Rome, and his enduring legacy in the European literary traditions of the first 1300 years after his death. Brill's Companion to Ovid combines close analysis of each of Ovid's major works with a comprehensive overview of scholarly trends in the study of Latin poetry and Roman literary culture. It will be a valuable resource for students and scholars of Latin literature alike.

The noted archaeologist explores the varieties of prehistoric cave art across the world and offers surprising insights into its purpose and meaning. What drew our Stone Age ancestors into caves to paint in charcoal and red hematite, to watch the likenesses of lions, bison, horses, and aurochs as they flickered by firelight? Was it a creative impulse, a spiritual dawn, a shamanistic conception of the world? In this book, Jean Clottes, one of the most renowned figures in the study of cave paintings, pursues an answer to the "why" of Paleolithic art. Discussing sites and surveys across the world, Clottes offers personal reflections on how we have viewed these paintings in the past, what we learn from looking at them across geographies, and what these paintings may have meant—and what function they may have served—for their artists. Steeped in Clottes's shamanistic theories of cave painting, *What Is Paleolithic Art?* travels from well-known Ice Age sites like Chauvet, Altamira, and Lascaux to visits with contemporary aboriginal artists, evoking a continuum between the cave paintings of our prehistoric past and the living rock art of today. Clottes's work lifts us from the darkness of our Paleolithic origins to reveal surprising insights into how we think, why we create, why we believe, and who we are

This is the third in the five-yearly series of surveys of what is happening in rock art studies around the world. As always, the texts reflect something of the great differences in approach and emphasis that exist in different regions. The volume presents examples from Europe, Asia, Africa, and the New World. During the period in question, 1999 to 2004, there have been few major events, although in the field of Pleistocene art many new discoveries have been made, and a new country added to the select list of those with Ice Age cave art. Some regions such as North Africa and the former USSR have seen a tremendous amount of activity, focusing not only on recording but also on chronology, and the conservation of sites. With the global increase of tourism, the management of rock art sites that are accessible to the public is a theme of ever-growing importance.

This book is one of a series of volumes resulting from the World Archaeological Congress, September 1986 which addressed world archaeology in its widest sense, investigating how people lived in the

past and how and why changes took place to result in the forms of society and culture which exist now. The series brought together archaeologists and anthropologists from many parts of the world, academics from contingent disciplines, and also non-academics from a wide range of cultural backgrounds who could lend their own expertise to the discussions. This book is an exploration of the way in which the animal world features in the works of art of a variety of cultures of different times and places. Contributors have adopted a variety of perspectives for looking at the complex ways in which past and present humans have interrelated with beings they classify as animals. Some of the approaches are predominantly economic and ecological, some are symbolic and others philosophical or theological. All these different views are included in the interpretation of the artworks of the past, revealing some of the foci and inspirations of cultural attitudes to animals. Originally published 1989.

The melting pot is no more. Where not very long ago we sought assimilation, we now pursue multiculturalism. Nowhere has this transformation been more evident than in the public schools, where a traditional Eurocentric curriculum has yielded to diversity--and, often, to confrontation and confusion. In a book that brings clarity and reason to this highly charged issue, Nathan Glazer explores these sweeping changes. He offers an incisive account of why we all--advocates and skeptics alike--have become multiculturalists, and what this means for national unity, civil society, and the education of our youth. Focusing particularly on the impact in public schools, Glazer dissects the four issues uppermost in the minds of people on both sides of the multicultural fence: Whose "truth" do we recognize in the curriculum? Will an emphasis on ethnic roots undermine or strengthen our national unity in the face of international disorder? Will attention to social injustice, past and present, increase or decrease civil disharmony and strife? Does a multicultural curriculum enhance learning, by engaging students' interest and by raising students' self-esteem, or does it teach irrelevance at best and fantasy at worst? Glazer argues cogently that multiculturalism arose from the failure of mainstream society to assimilate African Americans; anger and frustration at their continuing separation gave black Americans the impetus for rejecting traditions that excluded them. But, willingly or not, "we are all multiculturalists now," Glazer asserts, and his book gives us the clearest picture yet of what there is to know, to fear, and to ask of ourselves in this new identity.

Gary Genosko's timely study traces McLuhan's influence on the work of Jean Baudrillard, arguing that McLuhan's ideas have been far more influential than hitherto imagined in the development of postmodern theory. Genosko explores how McLuhan's ideas persist and are distorted through Baudrillard's work. He argues that it is through Baudrillard's influence that McLuhanism has had its greatest impact on contemporary cultural thought and practice.

For many people the term rock art is full of mystery. Yet it refers to wh`t may be the oldest form of human artistic endeavor. Depictions and symbols on rock surfaces exist on all continents and from all eras. Dating back perhaps more than forty thousand years, rock paintings and engravings can be found from the Arctic Circle to the tip of South America, from the caves of southern France to the deserts of the American Southwest. Ranging from simple etchings on isolated stones to elaborate scenes in celebrated prehistoric caves, from splendid animal and human figures to sexual, religious, and geometrical forms, millions of images throughout the world testify to the worldviews of traditional peoples, many of them long vanished. World Rock Art discusses the discovery of rock art by the West, profiles important sites, explains how the art was made, and considers how it can be dated. It then explores the meanings of these often enigmatic images and discusses their significance today. A final chapter reviews initiatives underway to preserve this remarkable heritage. Book jacket.
