Best Practices Guidelines and Toolkit on Engaging the Private Sector in Skills Development

John Wiley & Sons
"Best Practices Guidelines and Toolkit on Engaging the Private Sector in Skills Development", jointly developed by UNDP IICPSD and Statistical, Economic and Social Research and Training Centre for Islamic Countries (SESRI), will inspire, motivate and mobilize the private sector for its active engagement in skills training for employment. The guidelines and toolkit will help stakeholders to collaborate more closely with companies, chambers of commerce and business associations. It outlines how the private sector could contribute to the employability of

individuals through providing labour market signals, improving technical and practical skills acquisition, integrating industry know-how and expertise to every step of the trainings and help link skills to placement opportunities. These will ensure that disadvantaged youth, women and other marginalized groups are ready to enter the labour force with possessing the right skills they need to thrive. The 2030 Agenda for Sustainable Development highlights the importance of skills and lifelong learning not only to make individuals competitive in the labour market but also to empower people. Sustainable Development Goal (SDG) 4 reminds us that inclusive, quality education is critical for human development. SDG 8 reminds us that decent work and economic growth can only be achieved through productive capacities. The relationship between skills and employability is fundamental to the success of the SDGs — from

eradicating poverty to achieving gender equality to empowering women and girls. Bridging the skills mismatch for greater employability will be a huge leap forward in achieving the SDGs. This publication guarantees to guide all stakeholders in the direction of improving the existing skills and reducing the skills mismatch for greater employability of the target groups. The Guidelines and Toolkit will complement existing UNDP work on sustainable employment and inclusive growth and augments the related efforts of other international organizations.

The ASQ Certified Manager of Quality/Organizational Excellence Handbook UPTODATE EXAMS

Preparing for your SAP Activate project management exam? Make the grade with this certification study guide to C_ACTIVATE12! SAP Ariba SAP Press

Enterprise SOA is the backbone of future business processes that are being developed today. But how can you achieve visible, meaningful results, quickly? What information can you use today to convince the decision-makers in your organization? Should you start with business functionality, or is it better to first set up the

technical prerequisites with SAP NetWeaver? The answers to these questions can be elusive, which is why this book leverages several hundred existing projects as the basis for showing you how other enterprises have handled the rollout of enterprise SOA. The authors use prototypical roadmaps from selected industries together with proven recommendations and exclusive diagrams to help you pinpoint the best possible plan for your Enterprise SOA and avoid dangerous pitfalls in the implementation process. You'll benefit from numerous lessons learned at completed projects, enabling you to create your own plans in a structured manner, and ensuring that you get off to a running start with your own Enterprise SOA preparations. Highlights Include: * Enterprise SOA: Principles and benefits, challenges for IT, agility gains * Enterprise SOA Adoption Program: Prerequisites, basic conditions, potential analysis, evaluation of alternatives * Industry Reports: Automotive, high tech, chemical, retail, banking and finance, public sector * Best Practices: Technological mass adoption, SAP NetWeaver adoption, composite application adoption, Enterprise SOA adoption

SAP HANA Certification Guide SAP Press
