**Algebra 1 / 2** Cambridge University Press

The answer key is an answer overprint for the sixteen English 4 chapter tests; test packet English 4 Test Packet is packaged separately. This test packet includes one test for each chapter, as well as suggestions for grading. Each test includes application of the concepts and skills from the chapter. Tests for the writing chapters may include the use of graphic organizers and proofreading skills. Also coordinates with English 4 Teacher's Edition and Toolkit CD (2nd ed.) and English 4 Student Worktext.

*The Best Test Preparation for the College Board Achievement Test in Chemistry* Cambridge Key English Test Extra Student's Book with Answers and CD-ROM

Corresponds with student text, student notebook, tests  
*Heritage Studies Answer Key Grade 1 3rd Edition* Saxon  
Advanced Math

This edition of practice tests has been written to closely replicate the Cambridge exam experience, although it is also suitable for any English language student working at CEFR B2 level. Each of

its 200 exam-styled, single-sentence Key Word Transformation (Part 4) assessments carries a lexico-grammatical focus, testing lexis, grammar and vocabulary. The content in this volume is also available in the English Master B2 mobile app, part of a suite of critically acclaimed, test-practice learning tools geared towards the Cambridge B2 First and C1 Advanced Use of English and Listening exams. Laura Broadbent is an educational materials writer currently based in the UK. She previously taught Cambridge exam courses in Spain and has published learning and assessment resources with Oxford University Press, Cambridge University Press, Pearson Education and National Geographic.

Class 11-12 Chemistry MCQ with Answers PDF book covers basic concepts, analytical and practical assessment tests. "Class 11-12 Chemistry MCQ" Book PDF helps to practice test questions from exam prep notes. The eBook Class 11-12 Chemistry MCQs with Answers PDF includes revision guide with verbal, quantitative, and analytical past papers, solved MCQs. Class 11-12 Chemistry Multiple Choice Questions and Answers (MCQs) PDF Download, an eBook covers solved quiz questions and answers on chapters: atomic structure, basic chemistry, chemical bonding: chemistry, experimental techniques, gases, liquids and solids tests for college and university revision guide. Class 11-12 Chemistry Quiz Questions and Answers PDF Download, free eBook's sample covers beginner's solved questions, textbook's study notes to practice online tests. The Book Grade 11-12 Chemistry MCQs Chapter 1-6 PDF includes college question papers to review practice tests for exams. Class 11-12 Chemistry Multiple Choice Questions (MCQ) with Answers PDF digital edition eBook, a study guide with textbook chapters' tests for NEET/MCAT/GRE/GMAT/SAT/ACT competitive exam. College Chemistry Practice Tests Chapter 1-6 eBook covers problem solving exam tests from chemistry textbook and practical eBook chapter wise as: Chapter 1: Atomic Structure MCQ Chapter 2: Basic Chemistry MCQ Chapter 3: Chemical Bonding MCQ Chapter 4: Experimental Techniques MCQ Chapter 5: Gases MCQ Chapter 6: Liquids and Solids MCQ The e-Book Atomic Structure MCQs PDF, chapter 1 practice test to solve MCQ questions: Atoms, atomic spectrum, atomic absorption spectrum, atomic emission spectrum, molecules, azimuthal quantum number, Bohr's model, Bohr's atomic model defects, charge to mass ratio of electron, discovery of electron, discovery of neutron, discovery of proton, dual nature of matter, electron charge, electron distribution, electron radius and energy derivation, electron velocity, electronic configuration of elements, energy of revolving electron, fundamental particles, Heisenberg's uncertainty principle, hydrogen spectrum, magnetic quantum number, mass of electron, metallic crystals properties, Moseley law, neutron properties, orbital concept, photons wave number, Planck's quantum theory, properties of cathode rays, properties of positive rays, quantum numbers, quantum theory, Rutherford model of atom, shapes of orbitals, spin quantum number, what is spectrum, x rays, and atomic number. The e-Book Basic Chemistry MCQs PDF, chapter 2 practice test to solve MCQ questions: Basic chemistry, atomic mass, atoms, molecules, Avogadro's law, combustion analysis, empirical formula, isotopes, mass spectrometer, molar volume, molecular ions, moles, positive and negative ions, relative abundance, spectrometer, and stoichiometry. The e-Book Chemical Bonding MCQs PDF, chapter 3 practice test to solve MCQ questions: Chemical bonding, chemical combinations, atomic radii, atomic radius periodic table, atomic, ionic and covalent radii, atoms and molecules, bond formation, covalent radius, electron affinity,

electronegativity, electronegativity periodic table, higher ionization energies, ionic radius, ionization energies, ionization energy periodic table, Lewis concept, and modern periodic table. The e-Book Experimental Techniques MCQs PDF, chapter 4 practice test to solve MCQ questions: Experimental techniques, chromatography, crystallization, filter paper filtration, filtration crucibles, solvent extraction, and sublimation. The e-Book Gases MCQs PDF, chapter 5 practice test to solve MCQ questions: Gas laws, gas properties, kinetic molecular theory of gases, ideal gas constant, ideal gas density, liquefaction of gases, absolute zero derivation, applications of Daltons law, Avogadro's law, Boyle's law, Charles law, Daltons law, diffusion and effusion, Graham's law of diffusion, ideality deviations, kinetic interpretation of temperature, liquids properties, non-ideal behavior of gases, partial pressure calculations, plasma state, pressure units, solid's properties, states of matter, thermometry scales, and van der Waals equation. The e-Book Liquids and Solids MCQs PDF, chapter 6 practice test to solve MCQ questions: Liquid crystals, types of solids, classification of solids, comparison in solids, covalent solids, properties of crystalline solids, Avogadro number determination, boiling point, external pressure, boiling points, crystal lattice, crystals and classification, cubic close packing, diamond structure, dipole-dipole forces, dipole induced dipole forces, dynamic equilibrium, energy changes, intermolecular attractions, hexagonal close packing, hydrogen bonding, intermolecular forces, London dispersion forces, metallic crystals properties, metallic solids, metal's structure, molecular solids, phase changes energies, properties of covalent crystals, solid iodine structure, unit cell, and vapor pressure.

Master the SAT II Math Level IC Subject Test and score higher... Our test experts show you the right way to prepare for this important college exam. REA's SAT II Math Level IC test prep covers all Math Level IC topics to appear on the actual exam including in-depth coverage of geometry, trigonometry, algebraic

laws, and more. The book features 6 full-length practice SAT II Math Level IC exams. Each practice exam question is fully explained to help you better understand the subject material. Follow up your study with REA's proven test-taking strategies, powerhouse drills and study schedule that get you ready for test day. DETAILS - Comprehensive review of every Math Level IC topic to appear on the SAT II subject test - Flexible study schedule tailored to your needs - Packed with proven test tips, strategies and advice to help you master the test - 6 full-length practice SAT II Math Level IC Subject tests. Each test question is answered in complete detail with easy-to-follow, easy-to-grasp explanations. TABLE OF CONTENTS About Research and Education Association Independent Study Schedule CHAPTER 1 - About the SAT II: Math Level IC Subject Test About This Book About The Test How To Use This Book Format of the SAT II: Math Level IC Scoring the SAT II: Math Level IC Studying for the SAT II: Math Level IC Test-Taking Tips CHAPTER 2 - Subject Review Algebraic Laws and Operations Polynomials Equations of Higher Degrees Plane Geometry Solid Geometry Coordinate Geometry Trigonometry Elementary Functions Miscellaneous Topics SIX PRACTICE EXAMS Practice Test 1 Answer Key Detailed Explanations of Answers Practice Test 2 Answer Key Detailed Explanations of Answers Practice Test 3 Answer Key Detailed Explanations of Answers Practice Test 4 Answer Key Detailed Explanations of Answers Practice Test 5 Answer Key Detailed Explanations of Answers Practice Test 6 Answer Key Detailed Explanations of Answers EXCERPT About Research & Education Association Research & Education Association (REA) is an organization of educators, scientists, and engineers specializing in various academic fields. Founded in 1959 with the purpose of disseminating the most recently developed scientific information to groups in industry, government, high schools, and universities, REA has since become a successful and highly respected publisher of study aids, test preps, handbooks, and reference works. REA's Test Preparation series includes study guides for all academic levels in almost all disciplines. Research & Education Association publishes test preps for students who have not yet completed high school, as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada. CHAPTER 1 - ABOUT THE SAT II: MATH LEVEL IC SUBJECT TEST ABOUT THIS BOOK This book provides you with an accurate and complete representation of the SAT II: Math Level IC Subject Test. Inside you will find a complete course review designed to provide you with the information and strategies needed to do well on the exam, as well as six practice tests based on the actual exam. The

practice tests contain every type of question that you can expect to appear on the SAT II: Math Level IC Subject Test. Following each test you will find an answer key with detailed explanations designed to help you master the test material. ABOUT THE TEST Who Takes the Test and What Is It Used For? Students planning to attend college take the SAT II: Math Level IC Subject Test for one of two reasons: (1) Because it is an admission requirement of the college or university to which they are applying; OR (2) To demonstrate proficiency in Mathematics. The SAT II: Math Level IC exam is designed for students who have taken more than three years of college preparatory mathematics (two years of algebra and one year of geometry). Who Administers The Test? The SAT II: Math Level IC Subject Test is developed by the College Board and administered by Educational Testing Service (ETS). The test development process involves the assistance of educators throughout the country, and is designed and implemented to ensure that the content and difficulty level of the test are appropriate. When Should the SAT II: Math Level IC be Taken? If you are applying to a college that requires Subject Test scores as part of the admissions process, you should take the SAT II: Math Level IC Subject Test by November or January of your senior year. If your scores are being used only for placement purposes, you may be able to take the test in the spring. For more information, be sure to contact the colleges to which you are applying. When and Where is the Test Given? The SAT II: Math Level IC Subject Test is administered five times a year at many locations throughout the country; mostly high schools. The test is given in November, December, January, May, and June. To receive information on upcoming administrations of the exam, consult the publication Taking the SAT II: Subject Tests, which may be obtained from your guidance counselor or by contacting: College Board SAT Program P.O. Box 6200 Princeton, NJ 08541-6200 Phone: (609) 771-7600 Website: <http://www.collegeboard.com> Is There a Registration Fee? You must pay a registration fee to take the SAT II: Math Level IC. Consult the publication Taking the SAT II: Subject Tests for information on the fee structure. Financial assistance may be granted in certain situations. To find out if you qualify and to register for assistance, contact your academic advisor. What Kind of Calculator Can I Use? Your calculator should be, at the minimum, a scientific calculator. It can be programmable or non-programmable. Bear in mind, however, that for perhaps 60 percent of the test items, the calculator will afford you no advantage and, moreover, may actually work against you. No pocket organizers, hand-held minicomputers, paper tape, or noisy calculators may be used. In addition, no calculator requiring an external power source will be allowed. Finally, no sharing of calculators will be permitted - you must bring your own. Make sure you are thoroughly familiar with the operation of your calculator before the test. Your performance on the test could suffer if you spend too much time searching for the correct function on your calculator. HOW TO USE THIS BOOK What Do I Study First? Remember that the SAT II: Math Level IC Subject Test is designed to test knowledge that has been acquired throughout your education. Therefore, the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book. They will familiarize you with the types of questions, directions, and format of the SAT II: Math Level IC Subject Test. To begin your studies, read over the review and the suggestions for test-taking, take one of the practice tests to determine your area(s) of weakness, and then restudy the review material, focusing on your specific problem areas. The course review includes the information you need to know when taking the exam. Be sure to take the remaining practice tests to further test yourself and become

familiar with the format of the SAT II: Math Level IC Subject Test. When Should I Start Studying? It is never too early to start studying for the SAT II: Math Level IC test. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate! Cramming is not an effective way to study, since it does not allow you the time needed to learn the test material.

The sooner you learn the format of the exam, the more comfortable you will be when you take the exam. **FORMAT OF THE SAT II: MATH LEVEL IC** The SAT II: Math Level IC is a one-hour exam consisting of 50 multiple-choice questions. Material Tested The follo

Grade 3 Science Multiple Choice Questions and Answers (MCQs): Quizzes & Practice Tests with Answer Key provides mock tests for competitive exams to solve 300 MCQs. "Grade 3 Science MCQ" with answers helps with theoretical, conceptual, and analytical study for self-assessment, career tests. "Grade 3 Science Quizzes", a quick study guide can help to learn and practice questions for placement test preparation. Grade 3 Science Multiple Choice Questions and Answers (MCQs) is a revision guide with a collection of trivia quiz questions and answers on topics: air, earth and moon, force, gravity, heat, matter, other sources of heat and light, sun, water, what is alive to enhance teaching and learning. Grade 3 Science Quiz Questions and Answers also covers the syllabus of many competitive papers for admission exams of different schools from science textbooks on chapters: Air Multiple Choice Questions: 22 MCQs Earth and Moon Multiple Choice Questions: 47 MCQs Force Multiple Choice Questions: 36 MCQs Gravity Multiple Choice Questions: 33 MCQs Heat Multiple Choice Questions: 19 MCQs Matter Multiple Choice Questions: 19 MCQs Other Sources of Heat and Light Multiple Choice Questions: 19 MCQs Sun Multiple Choice Questions: 21 MCQs Water Multiple Choice Questions: 15 MCQs What is Alive Multiple Choice Questions: 68 MCQs "Air MCQ" chapter covers quiz about air particles, air pressure, anemometer, atmosphere, breathing, carbon dioxide, exchange of gases, gases, hurricane, importance of oxygen, oxygen, temperature of air, warm air, and wind vane. "Earth and Moon MCQ" chapter covers quiz about an orbit, appearance of earth and moon, appearance of stars, brightness of moon, brightness of sun, craters, description of moon, disappearance of sun, earth's rotation, glowing of moon, how life would be like without sun, moon's surface, movement of earth, reflection of sunlight, rotation, rotation of earth, rotation of moon, rotation of sun, shape of earth, shape of sun, size of moon, solar system, sun's light, sun's superpower, sunlight, and sunset. "Force MCQ" chapter covers quiz about a force, an activity, direction, distance, force, force and mass, force and motion simulation, forces, gravity, heavy objects, kinds of energy, light object, motion, push and pull, simple machine, speed, weight, what other forces can move an object. "Gravity MCQ" chapter covers quiz about air resistance, direction, force, forward motion, friction, gravity, less surface area, mass, mass and work, motion, pulling force of gravity, speed, weight, weight and mass, and

working against gravity. "Heat MCQ" chapter covers quiz about body temperature, electrical heat and light, electrical machines, friction, heating process, importance of heat, kinds of energy, lubricant, machines, measurement of heat, mechanical energy, mechanical heat, molecules, non-lubricated, solar energy, source of heat, state of substance, thermometer, tools for producing mechanical energy, and work. "Matter MCQ" chapter covers quiz about gaseous molecules, gases, liquid, liquid state, matter, molecules and movement, shape of solid, solid, solid-state, and state of matter. "Other Sources of Heat and Light MCQ" chapter covers quiz about body temperature, electrical heat and light, electrical machines, friction, lubricant, machines, mechanical energy, mechanical heat, non-lubricated, solar energy, and tools for producing mechanical energy. "Sun MCQ" chapter covers quiz about body temperature, environment, sun as a source of heat and light. "Water MCQ" chapter covers quiz about crystals, fog, water forms, groundwater, spring, state of water, vapors, and well. "What is Alive MCQ" chapter covers quiz about adapt, aquarium, desert, environment.

 PERIODIC TABLE EXCERPT About Research & Education  
 Association Research & Education Association (REA) is an  
 organization of educators, scientists, and engineers specializing  
 in various academic fields. Founded in 1959 with the purpose of  
 disseminating the most recently developed scientific information  
 to groups in industry, government, high schools, and universities,  
 REA has since become a successful and highly respected  
 publisher of study aids, test preps, handbooks, and reference  
 works. REA's Test Preparation series includes study guides for all  
 academic levels in almost all disciplines. Research & Education  
 Association publishes test preps for students who have not yet  
 completed high school, as well as high school students preparing  
 to enter college. Students from countries around the world  
 seeking to attend college in the United States will find the  
 assistance they need in REA's publications. For college students  
 seeking advanced degrees, REA publishes test preps for many  
 major graduate school admission examinations in a wide variety  
 of disciplines, including engineering, law, and medicine. Students  
 at every level, in every field, with every ambition can find what  
 they are looking for among REA's publications. While most test  
 preparation books present practice tests that bear little  
 resemblance to the actual exams, REA's series presents tests  
 that accurately depict the official exams in both degree of  
 difficulty and types of questions. REA's practice tests are always  
 based upon the most recently administered exams, and include  
 every type of question that can be expected on the actual exams.  
 REA's publications and educational materials are highly regarded  
 and continually receive an unprecedented amount of praise from  
 professionals, instructors, librarians, parents, and students. Our  
 authors are as diverse as the fields represented in the books we  
 publish. They are well-known in their respective disciplines and  
 serve on the faculties of prestigious high schools, colleges, and  
 universities throughout the United States and Canada. CHAPTER  
 1 - ABOUT THE SAT II: CHEMISTRY SUBJECT TEST ABOUT THIS  
 BOOK This book provides you with an accurate and complete  
 representation of the SAT II: Chemistry Subject Test. Inside you  
 will find a complete course review designed to provide you with  
 the information and strategies needed to do well on the exam, as  
 well as six practice tests based on the actual exam. The practice  
 tests contain every type of question that you can expect to  
 appear on the SAT II: Chemistry test. Following each test you will  
 find an answer key with detailed explanations designed to help  
 you master the test material. ABOUT THE TEST Who Takes the  
 Test and What Is It Used For? Students planning to attend college

take the SAT II: Chemistry Subject Test for one of two reasons: (1)  
 Because it is an admission requirement of the college or  
 university to which they are applying; "OR" (2) To demonstrate  
 proficiency in Chemistry. The SAT II: Chemistry exam is designed  
 for students who have taken one year of college preparatory  
 chemistry. Who Administers The Test? The SAT II: Chemistry  
 Subject Test is developed by the College Board and administered  
 by Educational Testing Service (ETS). The test development  
 process involves the assistance of educators throughout the  
 country, and is designed and implemented to ensure that the  
 content and difficulty level of the test are appropriate. When  
 Should the SAT II: Chemistry be Taken? If you are applying to a  
 college that requires Subject Test scores as part of the  
 admissions process, you should take the SAT II: Chemistry  
 Subject Test toward the end of your junior year or at the  
 beginning of your senior year. If your scores are being used only  
 for placement purposes, you may be able to take the test in the  
 spring of your senior year. For more information, be sure to  
 contact the colleges to which you are applying. When and Where  
 is the Test Given? The SAT II: Chemistry Subject Test is  
 administered five times a year at many locations throughout the  
 country; mostly high schools. To receive information on upcoming  
 administrations of the exam, consult the publication Taking the  
 SAT II: Subject Tests, which may be obtained from your guidance  
 counselor or by contacting: College Board SAT Program P.O. Box  
 6200 Princeton, NJ 08541-6200 Phone: (609) 771-7600 Website:  
<http://www.collegeboard.com> Is There a Registration Fee? Yes.  
 There is a registration fee to take the SAT II: Chemistry. Consult  
 the publication Taking the SAT II: Subject Tests for information on  
 the fee structure. Financial assistance may be granted in certain  
 situations. To find out if you qualify and to register for assistance,  
 contact your academic advisor. HOW TO USE THIS BOOK What Do  
 I Study First? Remember that the SAT II: Chemistry Subject Test  
 is designed to test knowledge that has been acquired throughout  
 your education. Therefore, the best way to prepare for the exam  
 is to refresh yourself by thoroughly studying our review material  
 and taking the sample tests provided in this book. They will  
 familiarize you with the types of questions, directions, and format  
 of the SAT II: Chemistry Subject Test. To begin your studies, read  
 over the review and the suggestions for test-taking, take one of  
 the practice tests to determine your area(s) of weakness, and  
 then restudy the review material, focusing on your specific  
 problem areas. The course review includes the information you  
 need to know when taking the exam. Be sure to take the  
 remaining practice tests to further test yourself and become  
 familiar with the format of the SAT II: Chemistry Subject Test.  
 When Should I Start Studying? It is never too early to start  
 studying for the SAT II: Chemistry test. The earlier you begin, the  
 more time you will have to sharpen your skills. Do not  
 procrastinate! Cramming is not an effective way to study, since it  
 does not allow you the time needed to learn the test material.  
 The sooner you learn the format of the exam, the more  
 comfortable you will be when you take the exam. FORMAT OF  
 THE SAT II: CHEMISTRY The SAT II: Chemistry is a one-hour exam  
 consisting of 85 multiple-choice questions. The first part of the  
 exam consists of classification questions. This question type  
 presents a list of statements or questions that you must match  
 up with a group of choices lettered (A) through (E). Each choice  
 may be used once, more than once, or not at all. The exam then  
 shifts to relationship analysis questions which you will answer in a  
 specially numbered section of your answer sheet. You will have to  
 determine if each of two statements is true or false and if the  
 second statement is a correct explanation of the first. The last  
 section is composed strictly of multiple-choice questions with  
 choices lettered (A) through (E). Material Tested The following

chart summarizes the distribution of topics covered on the SAT II: Chemistry Subject Test. Topic / Percentage / Number of Questions  
 Atomic & Molecular Structure / 25% / 21 questions  
 States of Matter / 15% / 13 questions  
 Reaction Types / 14% / 12 questions  
 Stoichiometry / 12% / 10 questions  
 Equilibrium & Reaction Times / 7% / 6 questions  
 Thermodynamics / 6% / 5 questions  
 Descriptive Chemistry / 13% / 11 questions  
 Laboratory / 8% / 7 questions

The questions on the SAT II: Chemistry are also grouped into three larger categories according to how they test your understanding of the subject material. Category / Definition / Approximate Percentage of Test

- 1) Factual Recall / Demonstrating a knowledge and understanding of important concepts and specific information / 20%
- 2) Application / Taking a specific principle and applying it to a practical situation / 45%
- 3) Integration / Inferring information and drawing conclusions from particular relationships / 35%

**STUDYING FOR THE SAT II: CHEMISTRY** It is very important to choose the time and place for studying that works best for you. Some students may set aside a certain number of hours every morning to study, while others may choose to study at night before going to sleep. Other students may study during the day, while waiting on line, or even while eating lunch. Only you can determine when and where your study time will be most effective. Be consistent and use your time wisely. Work out a study routine and stick to it! When you take the practice tests, try to make your testing conditions as much like the actual test as possible. Turn your television and radio off, and sit down at a quiet desk or table free from distraction. Make sure to clock yourself with a timer. As you complete each practice test, score it and thoroughly review the explanations to the questions you answered incorrectly; however, do not review too much at any one time. Concentrate on one problem area at a time by reviewing the questions and explanations, and by studying our review until you are confident you completely understand the material. Keep track of your scores. By doing so, you will be able to gauge your progress and discover general weaknesses in particular sections. You should carefully study the reviews that cover your areas of difficulty, as this will build your skills in those areas.

**TEST TAKING TIPS** Although you may be unfamiliar with standardized tests such as the SAT II: Chemistry Subject Test, there are many ways to acquaint yourself with this type of examination and help alleviate your test-taking anxieties. Become comfortable with the format of the exam. When you are practicing to take the SAT II: Chemistry Subject Test, simulate the conditions under which you will be taking the actual test. Stay calm and pace yourself. After simulating the test only a couple of times, you will boost your chances of doing well, and you will be able to sit down for the actual exam with much more confidence. Know the directions and format for each section of the test. Familiarizing yourself with the directions and format of the exam will not only save you time, but will also ensure that you are familiar enough with the SAT II: Chemistry Subject Test to avoid nervousness (and the mistakes caused by being nervous). Do your scratchwork in the margins of the test booklet. You will not be given scrap paper during the exam, and you may not perform scratchwork on your answer sheet. Space is provided in your test booklet to do any necessary work or draw diagrams. If you are unsure of an answer, guess. However, if you do guess - guess wisely. Use the process of elimination by going through each answer to a question and ruling out as many of the answer

choices as possible. By eliminating three answer choices, you give yourself a fifty-fifty chance of answering correctly since there will only be two choices left from which to make your guess. Mark your answers in the appropriate spaces on the answer sheet. Fill in the oval that corresponds to your answer darkly, completely, and neatly. You can change your answer, but remember to completely erase your old answer. Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly. When you have finished working on a section, you may want to go back and check to make sure your answers correspond to the correct questions. Marking one answer in the wrong space will throw off the rest of your test, whether it is graded by machine or by hand. You don't have to answer every question. You are not penalized if you do not answer every question. The only penalty results from answering a question incorrectly. Try to use the guessing strategy, but if you are truly stumped by a question, remember that you do not have to answer it. Work quickly and steadily. You have a limited amount of time to work on each section, so you need to work quickly and steadily. Avoid focusing on one problem for too long. Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test. On the night before the test, gather together the materials you will need the next day: - Your admission ticket - Two forms of identification (e.g., driver's license, student identification card, or current alien registration card) - Two No. 2 pencils with erasers - Directions to the test center - A watch (if you wish) but not one that makes noise, as it may disturb other test-takers On the day of the test, you should wake up early (after a good night's rest) and have breakfast. Dress comfortably, so that you are not distracted by being too hot or too cold while taking the test. Also, plan to arrive at the test center early. This will allow you to collect your thoughts and relax before the test, and will also spare you the stress of being late. If you arrive after the test begins, you will not be admitted to the test center and you will not receive a refund. During the Test When you arrive at the test center, try to find a seat where you feel most comfortable. Follow all the rules and instructions given by the test supervisor. If you do not, you risk being dismissed from the test and having your scores canceled. Once all the test materials are passed out, the test instructor will give you directions for filling out your answer sheet. Fill this sheet out carefully since this information will appear on your score report. After the Test When you have completed the SAT II: Chemistry Subject Test, you may hand in your test materials and leave. Then, go home and relax! When Will I Receive My Score Report and What Will It Look Like? You should receive your score report about five weeks after you take the test. This report will include your scores, percentile ranks, and interpretive information.
