This book, "Pearl Harbor to Guadalcanal: History of U. S. Marine Corps Operations in World War II, Volume I," covers Marine Corps participation through the first precarious year of World War II, when disaster piled on disaster and there seemed no way to check Japanese aggression. Advanced bases and garrisons were isolated and destroyed; Guam, Wake, and the Philippines. The sneak attack on Pearl Harbor, "day that will live in infamy," seriously crippled the U. S. Pacific Fleet; yet that cripple rose to turn the tide of the

entire war at Midway. Shortly thereafter, the U. S. Marines launched on Guadalcanal an offensive which was destined to end only on the home islands of the Empire. The country in general, and the Marine Corps in particular, entered World War II in a better state of preparedness than had been the case in any other previous conflict. But that is a comparative term and does not merit mention in the same sentence with the degree of Japanese preparedness. What the Marine Corps did bring into the way, however, was the priceless ingredient developed during the years of pence: the amphibious doctrines and techniques that made possible the trans-Pacific advance - and, for that matter, the invasion of North Africa and the European continent. By publishing this operations history in a durable form, it is hoped to make the Marine Corps record permanently available for the study of military personnel, the edification of the general public, and the contemplation of serious scholars of military history.

As Fowler holds a flame to the wax, the missing fragment of an ancient map that uncovers the location of the Ten Commandments given to Moses is revealed. Soon Fowler is involved in an expedition to Jordan set up by a reclusive billionaire. Leading clinical psychologist Lisa Damour identifies the seven key phases marking the journey from girlhood to womanhood, and offers practical advice for those raising teenage girls. We expect an enormous amount from our teenage girls in a world where they are bombarded with messages about how they should look, behave, succeed. Yet we also speak as though adolescence is a nightmare rollercoaster ride for both parent and child, to be endured rather than enjoyed. In *Untangled*, world authority and clinical psychologist Lisa Damour provides an accessible, detailed, comprehensive guide to parenting teenage girls. She believes there is a predictable blueprint for how girls grow; seven easily recognisable 'strands' of transition from childhood through adolescence and on to adulthood. Girls naturally develop at different rates, typically on more than one front, and the transition will be unique to every girl. Each chapter describes a phase, such as 'contending with adult authority' and 'entering the romantic world', with hints and tips for parents and daughters, and a

'when to worry' section. Damour writes sympathetically and clearly, providing a practical and helpful guide for any parent, and for teenage girls too.

In this wholly original work of film criticism, David Thomson, celebrated author of *The Biographical Dictionary of Film*, probes the many ways in which sexuality has shaped the movies—and the ways in which the movies have shaped sexuality. Exploring the tangled notions of masculinity, femininity, beauty, and sex that characterize our cinematic imagination—and drawing on examples that range from advertising to pornography, *Bonnie and Clyde* to *Call Me by Your Name*—Thomson illuminates how film as art, entertainment, and business has historically been a polite cover for a kind of erotic séance. In so doing, he casts the art and the artists we love in a new

light, and reveals how film can both expose the fault lines in conventional masculinity and point the way past it, toward a more nuanced understanding of what it means to be a person with desires.

At a time when lesbian, gay, bisexual, and transgender individuals--often referred to under the umbrella acronym LGBT--are becoming more visible in society and more socially acknowledged, clinicians and researchers are faced with incomplete information about their health status. While LGBT populations often are combined as a single entity for research and advocacy purposes, each is a distinct population group with its own specific health needs. Furthermore, the experiences of LGBT individuals are not uniform and are shaped by factors of race, ethnicity, socioeconomic status, geographical location, and age, any of which can have an effect on health-related concerns and needs. The Health of Lesbian, Gay, Bisexual, and Transgender People assesses the state of science on the health status of LGBT populations,

identifies research gaps and opportunities, and outlines a research agenda for the National Institute of Health. The report examines the health status of these populations in three life stages: childhood and adolescence, early/middle adulthood, and later adulthood. At each life stage, the committee studied mental health, physical health, risks and protective factors, health services, and contextual influences. To advance understanding of the health needs of all LGBT individuals, the report finds that researchers need more data about the demographics of these populations, improved methods for collecting and analyzing data, and an increased participation of sexual and gender minorities in research. The Health of Lesbian, Gay, Bisexual, and Transgender People is a valuable resource for policymakers, federal agencies including the National Institute of Health (NIH), LGBT advocacy groups, clinicians, and service providers.

Award-winning photographer Matt Black traveled over 100,000 miles to chronicle the reality of today's unseen and forgotten America. When Magnum photographer Matt Black began exploring his hometown in California's rural Central Valley--dubbed "the other California," where one-third of the population lives in poverty--he knew what his next project had to be. Black was inspired to create a vivid portrait of an unknown America, to photograph some of the poorest communities across the US. Traveling across forty-six states and Puerto Rico, Black visited designated "poverty areas," places with a poverty rate above 20 percent, and found that poverty areas are so numerous that they're never more than a two-hour's

drive apart, woven through the fabric of the country but cut off from “the land of opportunity.” American Geography is a visual record of this five-year, 100,000-mile road trip, which chronicles the vulnerable conditions faced by America’s poor. This compelling compilation of black-and-white photographs is accompanied by Black’s own travelogue—a collection of observations, overheard conversations in cafe’s and public transportation, diner menus, bus timetables, historical facts, and snippets from daily news reports. A future classic of photography, this monograph is supported by an international touring exhibition and is a must-have for anyone with an interest in witnessing the reality of an America that’s been excluded from the American Dream. Winner of the 2014 Nobel Peace Prize In 2009 Malala Yousafzai began writing a blog on BBC Urdu about life in the Swat Valley as the Taliban gained control, at times banning girls from attending school. When her identity was discovered, Malala began to appear in both Pakistani and international media, advocating the freedom to pursue education for all. In October 2012, gunmen boarded Malala's school bus and shot her in the face, a bullet passing through her head and into her shoulder. Remarkably, Malala survived the shooting. At a very young age, Malala Yousafzai has become a worldwide symbol of courage and hope. Her shooting has sparked a wave of solidarity across Pakistan, not to mention globally, for the right to education, freedom from terror and female emancipation.
