The Adult Learner A&C Black

In a time of globally changing environments and economic challenges, many institutions of higher education are attempting to reform by promoting standardization approaches. Meaning-Centered Education explores the counter-tide for an alternative vision of education, where students and instructors engage in open meaning-making processes and self-organizing educational practices. In one contributed volume, Meaning-Centered Education provides a comprehensive introduction to current scholarship and pedagogical practice on meaning-centered education. International contributors explore how modern educational scholars and practitioners all around the world are implementing a comprehensive framework that supports meaning making in a classroom. This edited collection is a valuable resource for higher education faculty and scholars interested in renewing the deep purposes of higher education.

 Key Ideas in Linguistics and the Philosophy of Language

This book provides a philosophical, socio-political and theoretical understanding of the notion of Becoming in the context of the related concepts, and in contemplation of the notion of Being. Deriving from different traditions from various countries, these concepts act as windows on contemporary early years settings and communities around the world where adults map out infant becomings. This book is a valuable resource for early childhood educators, students, professionals, researchers, and policy makers around the globe who seek to understand the locatedness of infant becomings in space and time.

Women, Crime and Punishment in Ancient Law and Society Springer Nature

Historical panorama of views about the state of political science as a discipline

Whitewashing War Ignatius Press

In this probing exploration of what it means to be deaf, Brenda Brueggemann goes beyond any simple notion of identity politics to explore the very nature of identity itself. Looking at a variety of cultural texts, she brings her fascination with borders and between-places to expose and enrich our understanding of how deafness embodies itself in the world, in the visual, and in language. Taking on the creation of the modern deaf subject, Brueggemann ranges from the intersections of gender and deafness in the work of photographers Mary and Frances Allen at the turn of the last century, to the state of the field of Deaf Studies at the beginning of our new century. She explores the power and potential of American Sign Language—wedged, as she sees it, between letter-bound language and visual ways of learning—and argues for a rhetorical approach and digital future for ASL literature. The narration of deaf lives through writing becomes a pivot around which to imagine how digital media and documentary can be used to convey deaf life stories. Finally, she expands our notion of diversity within the deaf identity itself, takes on the complex relationship between deaf and hearing people, and offers compelling illustrations of the intertwined, and sometimes knotted, nature of individual and collective identities within Deaf culture.

[The Politics of Ethics](#) Jones & Bartlett Learning

Abbott Gleason's insightful memoir of the generation that came of age in the late fifties.

[A Liberal Education](#) Springer Nature

This book offers introductory entries on 80 ideas that have shaped the study of language up to the present day. Entries are written by experts in the fields of linguistics and the philosophy of language to reflect the full range of approaches and modes of thought. Each entry includes a brief description of the idea, an account of its development, and its impact on the field of language study. The book is written in an accessible style with clear descriptions of technical terms, guides to further reading,

and extensive cross-referencing between entries. A useful additional feature of this book is that it is cross-referenced throughout with Key Thinkers in Linguistics and the Philosophy of Language (Edinburgh, 2005), revealing significant connections and continuities in the two related disciplines. Ideas covered range from Sense Data, Artificial Intelligence, and Logic, through Generative Semantics, Cognitivism, and Conversation Analysis, to Political Correctness, Deconstruction, and Corpora.

The fifth edition of Nursing Ethics has been revised to reflect the most current issues in healthcare ethics including new cases, laws, and policies. The text continues to be divided into three sections: Foundational Theories, Concepts and Professional Issues; Moving Into Ethics Across the Lifespan; and Ethics Related to Special Issues focused on specific populations and nursing roles.

[Meaning-Centered Education](#) Hachette UK

The ancient period of Greek history, to which this volume is devoted, began in late Bronze Age in the second millennium and lasted almost to the end of the first century BCE, when the last remnant of the Hellenistic empire created by Alexander the Great was conquered by the Romans. Extant texts of law of actual laws are few and often found embedded in other sources, such as the works of orators and historians. Greek literature, from the epics of Homer to the classical dramas, provides a valuable source of information. However, since literary sources are fictional portrayals and often reflect the times and biases of the authors, other more concrete evidence from archaeology has been used throughout the volume to confirm and contextualize the literary evidence about women, crime, and punishment in ancient Greece. The volume is divided into three parts: (I) Mykenean and Archaic Greece, (II) Classical Greece, and (III) the Hellenistic Period. The book includes illustrations, maps, lists of Hellenistic dynasties, and Indices of Persons, Place and Subjects. Crime and punishment, criminal law and its administration, are areas of ancient history that have been explored less than many other aspects of ancient civilizations. Throughout history women have been affected by crime both as victims and as offenders. In the ancient world, customary laws were created by men, formal laws were written by men, and both were interpreted and enforced by men. This two-volume work explores the role of gender in the formation and administration of ancient law and examines the many gender categories and relationships established in ancient law, including legal personhood, access to courts, citizenship, political office, religious office, professions, marriage, inheritance, and property ownership. Thus it focuses on women and crime within the context of women in the society.

This book is designed to introduce doctoral and graduate students to the process of conducting scientific research in the social sciences, business, education, public health, and related disciplines. It is a one-stop, comprehensive, and compact source for foundational concepts in behavioral research, and can serve as a stand-alone text or as a supplement to research readings in any doctoral seminar or research methods class. This book is currently used as a research text at universities on six continents and will shortly be available in nine different languages.

[Christian Register and Boston Observer...](#) Elsevier

This open access book critiques real world learning across both the curriculum and extracurricular activities. Drawing on disciplines as diverse as business, health, fashion, sociology and geography, the editors and authors employ a cross-disciplinary approach to examine how this concept is being

applied in higher education. Divided into three parts, the authors and contributors analyse broader applications of real world learning, student experience of practicing in a real world setting, and how learning strategies can be employed to engage students in real world learning. The editors and contributors provide up-to-date, cross-disciplinary and international insights into how real world learning could be integrated into the higher education curriculum to support effective, relevant and life-long learning for 21st century students.

The First 1000 Days of Early Childhood Teachers College Press

How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

History and Philosophy of Sport and Physical Activity University of Michigan Press

Whitewashing War explores perhaps the most critical issue social studies educators presently face: How do we teach our students about war? In this timely book, Christopher Leahey investigates how the political struggles over the social studies curriculum, the corporate domination of the textbook and testing industry, and the curricular constraints of the No Child Left Behind Act combine to stifle historical inquiry and deprive students of meaningful social studies instruction. Using the controversial Vietnam War as a case study, Leahey holds textbook narratives up to the light, illuminating how the adoption process, interpretive framework, and selection of evidence combine to transform the past into thinly veiled historical myths. By attending to questions traditionally ignored in history education, this dynamic book challenges educators to rethink their pedagogical approaches to military conflict, American and otherwise. It calls on teachers to develop students' critical sensibilities to ask questions, conduct research, evaluate evidence, and make meaning of the past, and provides classroom lessons for history educators and students to engage in rich, intellectual encounters with the historical record.

News Bulletin of the Institute of International Education ASCD

In this stimulating and readable book, educators--most of whom have long been involved in computer-based literacy research efforts--provide up-to-date information on computer-based activities in reading and language arts. These experts offer valuable goals and strategies for integrating computer technology into the reading/language arts curriculum, including suggestions for activities that should and should not be used. They also address the basics of developing, evaluating, and using computer-based reading instruction programs. The unique benefits of computer technology to teach English as a second language, writing skills, and the reading process to early readers are thoroughly explored. *Innovative Uses of the Computer in the Language Arts Classroom* Computerized readability assessment Reinforcement and instructional objectives Student interest profiles Class book files This exciting book--in a broader sense--corrects the failure by many to consider the literacy issues that invariably surround and govern computer use. While the types of computer-literacy environments differ, the literacy requirements are still the same--the computer and the user must communicate through text. Thus, *The Computer in Reading and Language Arts*

provides essential understanding of the literacy requirements and environments involved in computer use.

IRE Transactions on Education Key Ideas in Linguistics and the Philosophy of Language Edinburgh University Press

South African Journal of Science Edinburgh University Press

This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education institutions and education stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of libraries in the digital age, global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are preparing their populations for significant shifts in labour market demands - shifts that are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to understand how the world should respond to the radical technological shifts underway on the frontline of higher education.

Originally published in French as "La Philosophie, une Ecole de la Liberte. Enseignement de la philosophie et apprentissage du philosophe : Etat des lieux et regards pour l'avenir." - This study is dedicated to all those who engaged themselves, with vigour and conviction, in the defence of the teaching of philosophy a fertile guarantor of liberty and autonomy. This publication is also dedicated to the young spirits of today, bound to become the active citizens of tomorrow.

Deaf Subjects NYU Press

In this much needed resource, Maryellen Weimer-one of the nation's most highly regarded authorities on effective college teaching-offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. *Learner-Centered Teaching* shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

Philosophy, a School of Freedom John Wiley & Sons

Forging closer links between university research and teaching has become an important way to enhance the quality of higher education across the world. As student engagement takes centre stage in academic life, how can academics and university leaders engage with their students to connect research and teaching more effectively? In this highly accessible book, the contributors show how students and academics can work in partnership to shape research-based education. Featuring student perspectives, it offers academics and university leaders practical suggestions and inspiring ideas on higher education pedagogy, including principles of working with students as partners in higher education, connecting students with real-world outputs, transcending disciplinary boundaries in student research activities, connecting students with the workplace, and innovative assessment and teaching practices. Written and edited in full collaboration with students and leading educator-researchers from a wide spectrum of academic disciplines, this book poses fundamental questions about learning and learning communities in contemporary higher education.
