A behind-the-scenes look at the firm behind WordPress.com and the unique work culture that contributes to its phenomenal success 50 million websites, or twenty percent of the entire web, use WordPress software. The force behind WordPress.com is a convention-defying company called Automattic, Inc., whose 120 employees work from anywhere in the world they wish, barely use email, and launch improvements to their products dozens of times a day. With a fraction of the resources of Google, Amazon, or Facebook, they have a similar impact on the future of the Internet. How is this possible? What's different about how they work, and what can other companies learn from their methods? To find out, former Microsoft veteran Scott Berkun worked as a manager at WordPress.com, leading a team of young programmers developing new ideas. The Year Without Pants shares the secrets of WordPress.com's phenomenal success from the inside. Berkun's story reveals insights on creativity, productivity, and leadership from the kind of workplace that might be in everyone's future. Offers a fast-paced and entertaining insider's account of how an amazing, powerful organization achieves impressive results Includes vital lessons about work culture and managing creativity Written by author and popular blogger Scott Berkun ([scottberkun.com](#)) The Year Without Pants shares what every organization can learn from the world-changing ideas for the future of

work at the heart of Automattic's success.

Why is the sea salty? How far away is space? Why can't I tickle myself? Why can't we live forever? Children ask the most interesting and challenging questions. But how are we supposed to answer them...? At last! Expert answers to those big questions children ask, with help from: Sir David Attenborough Heston Blumenthal Kate Humble Alain de Botton Philip Pullman Dr Richard Dawkins Bear Grylls Dame Jacqueline Wilson Jarvis Cocker Dame Kelly Holmes Noam Chomsky Jessica Ennis Derren Brown Miranda Hart Tracey Emin Harry Hill A C Grayling Dr Christian Jessen and many more! *You Are an Artist* Profile Books

The creator of the popular webcomic "xkcd" uses line drawings and just ten hundred common words to provide simple explanations for how things work, including microwaves, bridges, tectonic plates, the solar system, the periodic table, helicopters, and other essential concepts.

Big Ideas for Little Philosophers: Equality with Simone de Beauvoir School of Life Press

Answering life's big questions for little children, this board book explains Simone de Beauvoir's beliefs about equality and respect in a simple, accessible way. Even little children can become philosophers by asking big questions about the world around them. Simone de Beauvoir believed that everybody should have the same opportunities to be happy, and to be themselves. In *Equality with Simone de Beauvoir*, this idea is explained for the youngest thinkers, from treating people with respect to listening to who you are on the inside. This book will inspire little ones to have exciting

thoughts and conversations about these big ideas. 'A philosopher is a person who loves wisdom. Wisdom means knowing things that help you live better and be happy.'

Franklin and Luna Go to the Moon Routledge

In this book from the critically acclaimed Little People, BIG DREAMS series, discover the life of David Attenborough, the inspiring broadcaster and conservationist. Little David grew up in Leicester on the campus of a university, where his father was a professor. As a child, he spent hours in the science library, collating his own specimens and creating a mini animal museum. When he was old enough to go to university, he studied science and zoology--but what he wanted most of all was to be close to the animals he was studying. So, he started working in television, visiting animals in their natural habitats, and telling the world the untold stories of these animals. This moving book features stylish and quirky illustrations and extra facts at the back, including a biographical timeline with historical photos and a detailed profile of the broadcaster's life. Little People, BIG DREAMS is a best-selling series of books and educational games that explore the lives of outstanding people, from designers and artists to scientists and activists. All of them achieved incredible things, yet each began life as a child with a dream. This empowering series offers inspiring messages to children of all ages, in a range of formats. The board books are told in simple sentences, perfect for reading aloud to babies and toddlers. The hardcover versions present expanded stories for beginning readers. Boxed gift sets allow you to collect a selection of the books by theme. Paper dolls, learning cards, matching games, and other fun learning tools provide even more ways to make the lives of these role models accessible to children. Inspire the next generation of outstanding people who will change the world with Little People, BIG DREAMS!

The Book of What If...? Routledge

An essential guide to help children become more aware of their emotional needs. This book examines a range of everyday topics that might give children's minds difficulties, for example: when parents don't seem to understand us; when we fall out with friends; when school feels boring or difficult; when we're too busy and get overwhelmed; when our phones create trouble; when we feel sad, bored, anxious or fed up with things. As an atlas to a child's mind, we explore a range of common scenarios encountered by young children and talk about some of the very best ideas to help deal with them. By offering a sympathetic and supportive framework, we encourage children to open up, explore their own feelings and face the dilemmas of growing up armed with emotional intelligence.

Philosophy for Beginners Franklin and Luna

Explore the importance of kindness with the youngest readers in a wonderfully accessible way. Even little children have big questions about life. Confucius believed always treating people with kindness can make us wise, and Kindness with Confucius brings his philosophy to the youngest thinkers. He believed we should use our own feelings as a guide to how to treat others. We feel good when people are kind to us and should want to make others feel that way. Emphasizing the importance of being in touch with your own emotions in order to be kind to others, this book will lead to inspiring conversations about human dynamics between people of all ages. Look for all six Big Ideas for Little Philosophers board books: Equality with Simone de Beauvoir, Happiness with Aristotle, Imagination with René Descartes, Kindness with Confucius, Love with Plato, and Truth with Socrates.

Principles and Big Ideas of Science Education Simon and Schuster

The Great Thinkers is a collection of some of the most important ideas of Eastern and Western culture - drawn from the works of those philosophers, political theorists, sociologists, artists and novelists whom we believe have the most to offer to us today. We've worked hard to make the thinkers in this book clear, relevant and charming, mining the history of knowledge to bring you the ideas we think have the greatest importance to our times. This 480-page book contains the canon of The School of Life, the gallery of individuals across the millennia who help to frame our intellectual project - and we have succeeded if, in the days and years ahead, you find yourself turning to our thinkers to illuminate the multiple dilemmas, joys and griefs of daily life.

This Is Not Another Maths Book Faber & Faber

New York Times Bestseller An exciting--and encouraging--exploration of creativity from the author of *When: The Scientific Secrets of Perfect Timing* The future belongs to a different kind of person with a different kind of mind: artists, inventors, storytellers-creative and holistic "right-brain" thinkers whose abilities mark the fault line between who gets ahead and who doesn't. Drawing on research from around the world, Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*) outlines the six fundamentally human abilities that are absolute essentials for professional success and personal fulfillment--and reveals how to master them. A Whole New Mind takes readers to a daring new place, and a provocative and necessary new way of thinking about a future that's already here.

Paraphernalia Oxford University Press - Children

Introduces twenty-five of history's leading figures in philosophy, including Buddha, Aristotle, René Descartes, and Friedrich Nietzsche, and how their philosophical ideas continue to matter in today's world.

Curious Minds Hachette UK

From keys and handkerchiefs to sweets and rubber bands, the curious objects we surround ourselves with, though often seemingly mundane, have a magical quality. Their surprising power to disturb, soothe, seduce or absorb give these quirky objects histories and meanings we rarely ponder. Yet we would be lost without them. Take bags, for example. Why do most women carry handbags, while men rely on pockets? Why do so many houses have bags of bags? And why do we 'let the cat out the bag' or 'give someone the sack'? What significance do our bags hold for us? In this highly imaginative and entertaining book, Steven Connor embarks on a historical, philosophical and linguistic journey that explores our relationships with the curious things with which we have a forgotten but daily intimacy.

A Degree in a Book: Philosophy Dey Street Books

Traditional Chinese edition of Big Ideas for Curious Minds

Inspiration Is in Here Penguin

This is the second title in the important new series from Oxford which provides accessible introductions to the ideas, facts, and vocabulary behind an absorbing range of subjects. Meticulously researched and authoritative but written in simple language by experts in their fields, curious young readers

will quickly get to grips with the basic principles and terminology of each subject. The Secrets of the Universe explains, in clear and interesting way, the theories of the beginning of the Universe, what it is, how it works, the lives of stars, and possible futures. The engaging design highlights the Heroes of the subject from early beginnings to modern day and explains tricky terminology in 'Speak like a Scientist' features. Comic strips and illustrations, amazing photographs, and a timeline, glossary and, index, all make this handy-sized book the perfect way to learn. If you love this title, why not collect them all? The Secrets of the Universe is part of a collectible set which will build into a diverse range of subjects.

Big Ideas For Young Thinkers MIT Press

Children love to explore, born with a boundless desire to understand the world around them. While most of the outside world has already been mapped, there's a whole other world that has yet to be discovered, one that's accessible only to them: their own minds. The Book of Me is a guided journal of self-discovery. It takes readers on a journey inside themselves, helping them explore their mind, their moods, their imagination, their conscience, and how they determine the course of their lives. Alongside wise and engaging explanations of ideas, each chapter contains a wealth of interactive exercises that together help to create a rich and unique self-portrait. Through writing, drawing, cutting out and colouring in, children can begin to untangle the mysteries of existence and work out who they really are (and who they might become...). Combining psychology, philosophy and sheer fun, The Book of Me is an introduction to the vital art of self-knowledge, showing how it can help us grow into calmer, wiser and more rounded human beings.

An Emotional Menagerie Penguin UK

"These essays were meant to challenge minds ... a collection of previously published works ... selected for this book because they fit the theme of intelligent provocation"--Preface

The Book of Me Berkun Media

What if a book didn't just tell you how to think or what to know, but rather encouraged you to think for yourself? What if there was a book that focused on asking questions instead of just answering them? The Book of What If?? does just that! What if you lived on a floating city? What if politicians were kids? What if broccoli tasted like chocolate? What if you could explore outer space? By asking these fun, open-ended questions, this book fosters greater critical thinking skills and gives kids a space to interact by breaking out a notebook to draw or write out their personal reactions, or engage in entertaining exercises with family and friends. Plus, sidebars deepen the investigation with peer-to-peer insights, historical and current profiles, real-life examples, and more, making for unlimited learning opportunities!

The Philosophy Book School of Life

When was the last time you spoke to a stranger? In our cities, we barely acknowledge one another on public transport, even as rates of loneliness skyrocket. Online, we carefully curate who we interact with. In our politics, we are increasingly consumed by a fear of people we've never met. But what if strangers, long believed to be the cause of many of our problems, were actually the solution? In *The Power of Strangers*, Joe Keohane discovers the surprising benefits that come from talking to strangers, examining how even passing interactions can enhance empathy, happiness and cognitive development, ease loneliness and isolation, and root us in the world, deepening our sense of belonging. Warm, witty, erudite and profound, this deeply researched book will make you reconsider how you perceive and approach strangers, showing you how talking to strangers isn't just not a way to live, it's a way to survive.

Big Ideas for Little Philosophers: Happiness with Aristotle Penguin UK

Stories to spark your imagination - a celebratory collection of stories, poems and illustrations to mark Puffin's 80th birthday. Perfect for reading aloud or reading independently at bedtime, this wonderful collection features brand new stories, poems and illustrations from well-loved and exciting new Puffin talent including Jacqueline Wilson, Malorie Blackman, Anne Fine, Jamie Littler, Jeremy Strong, Tom Fletcher, Sam Copeland, Ed Vere, Nadia Shireen and many, more! Plus, rediscover carefully curated extracts from Puffin's classic family favourites like Eric Carle, Beatrix Potter, Allan Ahlberg, Michael Morpurgo, Julia Donaldson and Roald Dahl. And with quotes and motivational pieces from brilliantly inspiring leaders, scientists and actors on their own big dreams there is something magical for everyone to enjoy. 5% of the RRP from this book will go towards helping the National Literacy Trust continue their life-changing work - from carrying out vital research, to delivering transformational programmes on the ground. This includes Puffin World of Stories, a programme funded by Puffin which aims to give primary schools the tools they need to help re-vitalise their school library as a hub of creativity and imagination.

The Good Enough Parent: How to raise contented, interesting and resilient children Penguin

"The only thing better than the questions, in this delightful and informative book, is the answers." - Neil Gaiman "This book is GLORIOUS. It's heart-and-soul fabulous, page after page." - Stephen Fry "One of the best kids books I have ever had the pleasure of reading" - Pandora Sykes "This book is heaven on a stick" - Sophie Dahl A wonderful new paperback edition of 366 curious questions asked by children from around the world, based on the award-winning podcast by original QI Elf, Molly Oldfield. How much bamboo can a giant panda eat? Do aliens exist? What we would do if we didn't have a prime minister? Why do hammerhead sharks have such strange-shaped heads? Find out the answers to these curious questions and much, much more! Ponder where ideas come from with award-winning illustrator, Rob Biddulph. Find out why you taste things differently when you have a cold with Michelin star chef, Heston Blumenthal. Learn about everything from how astronauts see in the dark to what the biggest dinosaur was with experts from the Natural History Museum. Fascinating facts are accompanied by gorgeous illustrations making the perfect gift for Christmas. Whether you read a question a day, or dip into it whenever you are feeling curious, this is a book to treasure and share all year round. Illustrated by Momoko Abe, Kelsey Buzzell, Beatrice Cerocchi, Alice Courtley, Sandra de la Prada, Grace Easton, Manuela Montoya Escobar, Richard Jones, Lisa Koesterke, Gwen Millward, Sally Mullaney, and Laurie Stansfield. Praise for Everything Under the Sun: "Trivia fans will relish Everything Under the Sun" - The Guardian "A brilliant book for any child, but particularly those who don't love reading stories" - David Walliams "A wonderful gift for families" - Evening Standard "A wonderful collection of 366 curious questions about everything from science to nature, dinosaurs to space" - Scottish Sun "Simply mesmerising compendium" - Waterstones "As cute as it is educational" - Babyccino Kids "This is a book to treasure all year round" - My Baba "An absolute delight" - David Walliams
