LUCIANO MORRIS

Resum de geografia de Catalunya
Springer Nature
Llibre i mapa que comprenen quasi
enterament les serralades
prepirinenques del Cadí, Port del Comte,
Serra del Verd, Pedraforca i Serra
d'Ensiya. Bona part d'aquest territori
està inclòs dins del Parc Natural del

Cadí-Moixeró. El seu relleu accidentat i la gran varietat de substrats i de condicions climàtiques originen un paisatge vegetal força divers que aquí s'examina exhaustivament.

Memòria Sociedad Geologica de Espana
A resource book covering the finest walks, treks and climbs in the High Pyrenees for 400km between France and Spain, from the Cirque de Lescun, on the edge of the Basque country in the west, to the Carlit massif and the Cerdagne to

the east of Andorra. The book is divided into five regional chapters: the Western Valleys; Cirques and Canyons; the Central Pyrenees; Enchanted Mountains; and Andorra and the Eastern High Pyrenees. Intended as a resource book for those planning a range of mountain activities in the Pyrenees, the guide describes each area valley by valley, and provides information on access and accommodation, as well as recommended maps and guidebooks. Unlike a conventional walking book, detailed route descriptions are not included; the guide does, however, direct the reader to the finest walks, treks and climbs in the area and provide an outline of specially selected routes. An extensive introduction gives all the practical advice and information needed

for planning a trip. It offers a background to the mountains and their exploration, and provides a snapshot of the range with sections that help the reader focus on specific areas of activity, and suggests where best to exercise that activity.

Mapa de Vegetació de Catalunya
1:50.000.: Gósol 254 (35-11) Geological Society of London

This book provides a synthesis of the physiography and geodynamics of the entire Pyrenean orogen and its foreland basins, providing the "big picture" (structure of the orogen and chronology of its formation, overview of its post-orogenic evolution, and Quaternary and recent landscape history). One part of the book proposes a 6-7 day itinerary across the eastern and east-central

Pyrenees, two areas that currently provide the richest, best-documented, and most carefully curated database on the post-orogenic evolution of the mountain belt. The book deals with three complementary topics: (i) geodynamics, i.e. the long-term post-orogenic evolution of the Pyrenees since the declining stages of tectonic collision ca. 30 million years ago, and within the wider reference frame of Iberia, the Western Mediterranean, and the Atlantic margin; (ii) geomorphological processes and landforms that have conspired to shape the eastern part of the French and Spanish Pyrenees in response to base-level and climate-related changes over than same time period; (iii) geoheritage, i.e. educational vignettes of the flagship landscape units and typical geological

sections of the study area. Written as a field guide, it is designed to help readers to construct discovery-based itineraries through the region (with options and variants depending on time and physical ability), allowing them to appreciate the key landscape and geoheritage features over the course of 1 week, with potential for much more. This GeoGuide is primarily aimed at confirmed geoscientists from most disciplines in Earth science, at postgraduate students engaged in field studies, and at curiosity-driven, educated amateurs keen to enhance their understanding of spectacular or enigmatic features encountered on their travels.

resultats d'aquestes eleccions, les segones en la història del Parlament de Catalunya.

Congrés Internacional de Toponímia i Onomàstica Catalanes World Health Organization

This book is an attempt to inform the debate that is already taking place between Europe's policy-makers, looking at a series of case studies that illustrate the different aspects of patient mobility within the European Union and how Europe's health systems have responded to them. Most of the case studies presented in this book have been analysed within a project funded by the European Union's Sixth Framework Programme - Europe for Patients (e4p).

Aquest vintè volum recull diversos treballs arqueològics realitzats a Llúvia, la Julia Lybica capital de la Ceretània romana i visigòtica, entre 1974 i 1984. Aquestes excavacions han permès documentar importants restes del passat romà i medieval de la població. La monografia inclou també dos estudis sobre els conjunts ceràmics romà i medieval d'aquesta vila.

Estudios sobre Cuaternario Institut d'Estudis Catalans

The morphology of Earth's surface reflects the interaction of climate, tectonics and denudational processes operating over a wide range of spatial and temporal scales. These processes can be considered catastrophic or continuous; depending on the timescale of observation or interest. Recent

research had required integration of historically distinct subjects such as geomorphology, sedimentology, climatology and tectonics. Together, these have provided new insights into absolute and relative rates of denudation, and the factors that control the many dynamic processes involved. Specific subject areas covered are sediment transport processes and the timescales of competing processes, the role of the geological record and landscapes in constraining different processes, the nature of landscape evolution at different spatial scales and in contrasting geological environments. Conjunt de mapa i llibre que presenta una explicació del medi físic de la zona i del paisatge vegetal, descriu les unitats

cartografiades, un índex de noms i bibliografia. El text està resumit a l'anglès. *Geological Field Trips to the Lacustrine Deposits of the Northeast of Spain* Cicerone Press Limited

An endless cycle of festivals, with extraordinary architecture and a good climate as a backdrop, make Barcelona an exuberant city. It has something for everyone, from world-class restaurants, museums and beaches to a lively street-life. This guide provides an in-depth view of Barcelona and advises on where to stay, where to eat, where to shop and what to see. *Comptes rendus des séances de l'Académie des sciences* Institut d'Estudis Catalans
