Not everyone is a friend of the manifold abbreviations that have by now become a part of the scientific language of medicine. In order to avoid misunderstanding these abbreviations, it is wise to refer to a reliable dictionary, such as this one prepared by Heister. The abbreviation ED means, for instance, effective dose to the pharmacologist. However, it might also stand for emetic dose. Radiologists use the same abbreviation for erythema dose, and ED could also mean ethyl dichlorarsine. A common meaning of ECU is European currency unit, a meaning that might not be very often in scientific medical publications. ECU, however, also means environmental control unit or European Chiropractic Union. Hopefully, those making inventions and discoveries will make use of Heister's dictionary before creating new abbreviations when preparing manuscripts for scientific publications. It is a very worthwhile goal not to use the same abbreviation for several different terms, especially if it is already widely accepted to mean only one of them. It may be impossible, however, to achieve this goal in different scientific disciplines. Therefore, although it is wise for the abbreviations used in a publication to be defined, it is also very helpful for readers and writers to use a dictionary such as this one. The author deserves our warmest thanks since we know that compiling such a comprehensive dictionary is based upon incredibly hard effort.

Religion and Power Springer Science & Business Media

Surrealist Women displays the range and significance of women's contributions to surrealism. Penelope Rosemont, affiliated with the Paris Surrealist Group in the 1960s and now a Chicago poet and painter, has assembled nearly three hundred texts by ninety-six women from twenty-eight countries. She opens the book with a succinct summary of surrealism's basic aims and principles, followed by a discussion of the place of gender in the origins of the movement. The texts are organised into historical periods

ranging from the 1920s to the present, with introductions describing trends in the movement for each period; and each surrealist's work is prefaced by a brief biographical statement. Authors include El Allailly, Bruna, Cunard, Carrington, Cesaire, Gauthier, Giovanna, van Hirtum, Kahlo, Levy, Mansour, Mitrani, Pailthorpe, Joyce Peters, Rahon, Svanmajerova, Taub, Zangana *The Early Neolithic on the Great Hungarian Plain* BRILL
This book approaches witchcraft and demonology through literary records. The works discussed deal with the contemporary theories propounded by those who sought either to justify, or to refute persecution. Eight contributors of differing interests, and with different approaches to their subject, examine a selection of important, representative witchcraft texts - published in England, France, Germany, Italy and America - setting them within their intellectual context and analysing both their style and argument. Hizbullah's Identity Construction Macmillan
The central idea developed by the contributions to this book is that the split between analytic philosophy and phenomenology - perhaps the most important schism in twentieth-century philosophy - resulted from a radicalization of reciprocal partialities. Both schools of thought share, in fact, the same cultural background and their same initial stimulus in the thought of Franz Brentano. And one outcome of the subsequent rift between them was the oblivion into which the figure and thought of Brentano have fallen. The first step to take in remedying this split is to return to Brentano and to reconstruct the 'map' of Brentanism. The second task (which has been addressed by this book) is to revive interest in the theoretical complexity of Brentano's thought and of his pupils and to revitalize those aspects that have been neglected by subsequent debate within the various movements of Brentanian inspiration. We have accordingly decided to organize the book into two introductory essays followed by two sections (Parts 1 and 2) which systematically examine Brentano's thought and that of his followers. The two introductory essays reconstruct the reasons for the 'invisibility', so to speak, of Brentano and set out of his philosophical doctrine. Part 1 of the book then examines the essential features of six of Brentano's most outstanding pupils (Marty, Stumpf, Meinong,

Ehrenfels, Husserl and Twardowski). Part 2 contains nine essays concentrating on the principal topics addressed by the Brentanians.

The School of Franz Brentano Harvard University Press

Foreign Groups in Rome During the First Centuries of the Empire Institute for the Study of Ancient Cultures

Who invented national literature? What is the relationship between script, identity, and history? This volume contains papers from a symposium, which brought leading philologists together with anthropologists and historians to connect theories of writing, language, and identity with the results of ancient Near Eastern scholarship.

The Political Works of James I Springer Science & Business Media

From ancient cave paintings of honey bee nests to modern science's richly diversified investigation of honey bee biology and its applications, the human imagination has long been captivated by the mysterious and highly sophisticated behavior of this paragon among insect societies. In the first broad treatment of honey bee biology to appear in decades, Mark Winston provides rare access to the world of this extraordinary insect. In a bright and engaging style, Winston probes the dynamics of the honey bee's social organization. He recreates for us the complex infrastructure of the nest, describes the highly specialized behavior of workers, queens, and drones, and examines in detail the remarkable ability of the honey bee colony to regulate its functions according to events within and outside the nest. Winston integrates into his discussion the results of recent studies, bringing into sharp focus topics of current bee research. These include the exquisite architecture of the nest and its relation to bee physiology; the intricate division of labor and the relevance of a temporal caste structure to efficient functioning of the colony; and, finally, the life-death struggles of swarming, superseding, and mating that mark the reproductive cycle of the honey bee. *The Biology of the Honey Bee* not only reviews the

basic aspects of social behavior, ecology, anatomy, physiology, and genetics, it also summarizes major controversies in contemporary honey bee research, such as the importance of kin recognition in the evolution of social behavior and the role of the well-known dance language in honey bee communication. Thorough, well-illustrated, and lucidly written, this book will for many years be a valuable resource for scholars, students, and beekeepers alike.

Great Britain's Solomon Institute for the Study of Ancient Cultures

This volume discusses the vaccine development process and the role delivery concepts contribute to a global goal of effective health outcomes. The chapters in this book cover a wide range of topics such as antigen discovery methods; genetic and protein antigen preparation; preparation of viral vaccines as VLPs; viral and non-viral gene delivery; needle-less or non-invasive delivery technology; vaccine storage; and vaccine administration and assessment. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics; lists of the necessary materials and reagents; step-by-step, readily reproducible laboratory protocols; and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and practical, *Vaccine Delivery Technology: Methods and Protocols* is a valuable resource for both novice and expert researchers, in and outside the field, who would like to gain insight into the impactful field of vaccines. Chapter 7 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Dictionary of Abbreviations in Medical Sciences Princeton University Press

One of the greatest unanswered questions after the massive and violent changes that hit the Middle East in 2011, known to some as the "Arab Spring" and to others as the "Islamist Winter," is how the West failed to predict both cataclysmic seasons in world affairs and to meet their challenges. The so-called spring didn't last long, quickly unraveling into a collection of civil wars, civil unrest, and secessions. Phares argues that Washington is too hesitant to take action when necessary, that US policy is highly disoriented on counter terrorism efforts, and that the effects of these errors have already proven costly. In Benghazi, US foreign policy failed to see the explosions coming, didn't meet the

challenges of political transformation where and with whom it should, and failed in isolating the jihadi terrorists worldwide. Too many strategic errors were committed. In this fascinating new book, Phares, the only expert who accurately predicted the Arab Spring, will foretell a major demise in US and Western policies in the Middle East, unless a deep change in strategies and policies are made in Washington and around the world.

Dictionary of Deities and Demons in the Bible Springer Science & Business Media

This review gathers astronomers, geologists, biologists, and chemists around a common question: how did life emerge on Earth? The ultimate goal is to probe an even more demanding question: is life universal? This not-so linear account highlights problems, gaps, and controversies. Discussion covers the formation of the solar system; the building of a habitable planet; prebiotic chemistry, biochemistry, and the emergence of life; the early Earth environment, and much more.

From Suns to Life: A Chronological Approach to the History of Life on Earth Wm. B. Eerdmans Publishing

This book offers comparative ontologies of both Islam and liberalism as discourses more broadly construed. The author argues that, despite recent efforts to speak of overlapping consensus and discursive congruence, the fundamental categories that constitute "Islam" and "Liberalism" remain very different, and that these differences should be taken seriously. Thus far, no recent scholarly works have explicitly or meticulously broken down where these differences lie. The author rigorously explores questions related to rights, moral epistemologies, the role of religion in the public sphere, and more general approaches to legal discourse, via primary and canonical sources constitutive of both Islam and liberalism. He then goes on to articulate why communitarian modes of thought are better suited for engaging with Islam and contemporary socio-political modes of organization than liberalism is. This book will be of great interest to students and scholars of politics and international relations, Islam, liberalism, and communitarianism.

History of the Akkadian Language (2 vols) Springer Science & Business Media

"This is a translation of 11 traditional texts of Iranian Islam from the 12th century to the present, with 100 pages of introduction by Professor Corbin. . . . Reading this book is an adventure in a

beautiful alien land, again and again experiencing sudden pangs of recognition of the deeply familiar among the totally exotic".-- "The Journal of Analytical Psychology". *Lightning Print On Demand Title

Minor Prose Works of King James VI and I French & European Publications

This book offers a comprehensive account of the audiovisual translation (AVT) of humour, bringing together insights from translation studies and humour studies to outline the key theories underpinning this growing area of study and their applications to case studies from television and film. The volume outlines the ways in which the myriad linguistic manifestations and functions of humour make it difficult for scholars to provide a unified definition for it, an issue made more complex in the transfer of humour to audiovisual works and their translations as well as their ongoing changes in technology. Dore brings together relevant theories from both translation studies and humour studies toward advancing research in both disciplines. Each chapter explores a key dimension of humour as it unfolds in AVT, offering brief theoretical discussions of wordplay, culture-specific references, and captioning in AVT as applied to case studies from Modern Family. A dedicated chapter to audio description, which allows the visually impaired or blind to assess a film's non-verbal content, using examples from the 2017 film *the Big Sick*, outlines existing research to date on this under-explored line of research and opens avenues for future study within the audiovisual translation of humour. This book is key reading for students and scholars in translation studies and humour studies.

Nomenclator of Bivalve Families Routledge

"This volume covers the period from the end of the Neolithic era to the beginning of the seventh century of our era. This lengthy period includes the civilization of Ancient Egypt, the history of Nubia, Ethiopia, North Africa and the Sahara, as well as of the other regions of the continent and its islands."--Publisher's description

Critical Dictionary of Marxism Univ of California Press

The *Dictionary of Deities and Demons in the Bible* (DDD) is the single major reference work on the gods, angels, demons, spirits, and semidivine heroes whose names occur in the biblical books. Book jacket.

The Church of St. Panteleimon at Nerezi Longman Scientific and

Technical

This book offers a comprehensive study of species- and genus-level diversity and chorology of the global freshwater fauna to date. It gives a state of the art assessment of the diversity and distribution of Metazoa in the continental waters of the world.

An Introduction to Vulgar Latin Humana

The church of St. Panteleimon at Nerezi is one of the major surviving monuments of twelfth-century Byzantium. Commonly referred to simply as Nerezi, the church is distinguished as a foundation built by a member of the imperial family, decorated by some of the best artists of the period, and crowned by five domes in emulation of famous buildings of the Byzantine capital, Constantinople. Thus, although located on the Byzantine periphery, in what is now the Former Yugoslav Republic of Macedonia, Nerezi stands as an important testimony to twelfth-century Constantinopolitan artistic and architectural trends. Its significance becomes even greater considering that, uniquely among its contemporaries, Nerezi is preserved virtually intact. Although Nerezi is recognized by scholars as one of the major surviving monuments of Byzantine art, it lacks a scholarly monograph, and large portions of its architecture and ornament remain unknown and inaccessible even to scholars. This book represents the first effort to study Nerezi comprehensively. In six

successive chapters it examines different aspects of the building: its historical and social context, its architectural design, its sculpture, and its cycle of mural painting. In addressing these varied facets, the book attempts to relate the different components of the building both to one another, and to the relevant contemporary Byzantine monuments. The book does it with two goals. First, as the pioneering study of this major document, it seeks to provide clear data on it: its measurements, materials, inscriptions, furnishings, and imaginery. Second, the book uses these data as a way to gain access to the figure of the patron, the Komnenian aristocrat Alexios Angelos Komnenos. Reading in its structural, programmatic, and aesthetic choices the characteristics of the building's patron, the book raises broader questions about the role which a Komnenian aristocrat and his church played at Nerezi's provincial setting. Thus, in its scope, the book extends the boundaries of a traditional monograph and encompasses both the study of the church and a contextual analysis of the historic, social and cultural trends of the period. In addition, this study introduces the complete visual documentation of the church. A series of architectural monuments, drawings and photographs of the decoration, as well as documentary evidence related to the restoration of Nerezi, are presented here for the first time.
