The report presents a comparison of the results of field in situ surface vibratory investigations with results of laboratory tests for thirteen sites within the United States and one site in the Marshall Islands. (Author).

Air University Library Index to Military Periodicals BRITISH POSTMARK SOCIETY

Collection of the monthly climatological reports of the United States by state or region, with monthly and annual national summaries.

The North-China Desk Hong List Cambridge University Press
The B-29 Superfortress was for many years a cornerstone of American military aviation. Best known as a bomber, it also

served in reconnaissance, as a tanker, and as a rescue plane. It was a crucial tool for American and Allied forces during World War II, Korea and beyond. This operational history of the B-29 gives in-depth information on the career of each plane. A list of the names and serial numbers of the planes, each plane's history from delivery date to removal from service, a description of the B-29's physical characteristics and performance parameters, and a description of the five B-29 variants are provided. Sections of the book give complete mission data for the B-29's World War II service in the China-Burma-India theater of operations, operations over Japan, aerial mining missions and test atomic bombing runs. *Königlich privilegierte Berlinische Zeitung von Staats- und gelehrten Sachen* McFarland
