In the current educational environment, there has been a shift towards online learning as a replacement for the traditional in-person classroom experience. With this new environment comes new technologies, benefits, and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning, motivation, and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques, and new models for student assessment and evaluation. Information on how to create valuable

online course content, engaging lesson plans for the digital space, and meaningful student activities online are only a few of many current topics of interest for promoting student achievement through online learning. The Research Anthology on Developing Effective Online Learning Courses provides multiple perspectives on how to develop engaging and effective online learning courses in the wake of the rapid digitalization of education. This book includes topics focused on online learners, online course content, effective online instruction strategies, and instructional design for the online environment. This reference work is ideal for curriculum developers, instructional designers, IT consultants, deans, chairs, teachers, administrators, academicians, researchers, and students interested in the latest research on how to create online learning courses that promote student success.

This annual volume, conveniently organized by state, offers the most complete and current listings of the requirements for certification of a wide range of educational professionals at the elementary and secondary levels.

Changes to requirements resulting from the federal No Child Left Behind Act, paired with state budget deficits and understaffed certification offices, have made it especially difficult to access this information. Now more than ever, Requirements for Certification is a valuable resource, making much-needed knowledge available in one straightforward volume.

School leadership internships are the bridge between classroom teachers and first-time leadership positions. Research shows that quality internships are equally as important as the graduate programs themselves in establishing leadership practices that improve teaching, learning, and school

conditions. This book was written as a stand-alone graduate textbook and serves as a guide and support for creating and managing quality school leader internship programs. It provides step-by-step guidance for interns, their supervisors, and their faculty on how to initiate an internship and evaluate interns' work. In this updated third edition, the authors have aligned the internship to the revised ISLLC standards, making this book critical for the over 500 leadership preparation programs nationwide and the thousands of school districts that support leadership candidates.

Teaching in Lifelong Learning 3e A guide to theory and practice Hand Book and Curriculum for the Md Dermatology Sarah Lange examines the effectiveness of cascade training, which constitutes a cost-effective training model in teacher training. In development cooperation countries, teaching quality is expected to improve with teacher professional development; for this purpose, she explores the effectiveness of training multipliers in schools in Cameroon. This research question is analysed with a design,

which encompasses a questionnaire survey provided to teachers, students and principals as well as a teacher video survey and a student achievement test. The empirical results show the effects of cascade training on the learner-oriented teaching practice, if the trained teachers are supported in their role as change agents. Among the conditions for the conceptual quality and the implementation of cascade training, the continuity of school-based professional development is particularly emphasized in light of the results.

 This book focuses on the challenges of teaching in diversely multilingual classrooms, discussing how these challenges and complexities interact in the preparation of teachers (language & content areas) in and for multilingual settings, and how they impact on educational processes, developments, and outcomes. Teacher education in multilingual contexts is a key topic and occupies an important position in efforts to improve

educational outcomes and quality for all stakeholders. It is seen as essential for competitive participation in global economic activity and for providing opportunities to enjoy the benefits of increased prosperity. Teacher education is generally expected to address both the demand for multilingualism and the challenges of teaching in diversely multilingual classrooms, which are important foci at policy and institutional levels. For example, the demand for quality outcomes is manifested in state-administered standards and performance cultures that regulate entry and practices, and poses ethical and pedagogic dilemmas for teachers. This book presents high-quality empirical research on education in multilingual societies, highlighting findings that, in addition to providing descriptions of language learning, development, and use in language contact and multilingual contexts, will help shape future language education policy and practices in multilingual societies.
