Washing machines and kettles make everyday life much easier, but when they go wrong they can leave you baffled and out of pocket. This invaluable maintenance and repair manual reveals the hidden workings of common household appliances and systems, shows you how to look after them, and lists common faults. From toasters and washing machines to central heating and toilets, the book gets down to the nuts and bolts of the machines, gadgets and household systems in your home. If it's basic, the book shows you how to mend it. If it's more complex, it will tell you what a repairer is likely to do - and whether it's worth the cost. Whatever the solution, you will save yourself time, money and stress.

Portelli offers a new and challenging approach to oral history, with an interdisciplinary and

multicultural perspective. Examining cultural conflict and communication between social groups and classes in industrial societies, he identifies the way individuals strive to create memories in order to make sense of their lives, and evaluates the impact of the fieldwork experience on the consciousness of the researcher. By recovering the value of the story-telling experience, Portelli's work makes delightful reading for the specialist and non-specialist alike.

The Death of Luigi Trastulli and Other Stories Haynes Manuals

Late Capitalism is the first major synthesis to have been produced by the contemporary revival of Marxist economics. It represents, in fact, the only systematic attempt so far ever made to combine the general theory of the "laws of motion" of the capitalist mode of production developed by Marx, with the concrete history of capitalism in the twentieth century. Mandel's book starts with a challenging discussion of the appropriate methods for studying the capitalist economies. He seeks to show why the classical approaches of Luxemburg, Bukharin, Bauer and Grossman failed to accomplish the further development of Marxist theory whose urgency became evident after Marx's death. He then sketches the structure of the world market and the variant types of surplus-profit that have characterized its successive stages. On these foundations Late Capitalism proceeds to advance an extremely bold schema of the "long waves" of expansion and contraction in the history of capitalism, from the Napoleonic Wars to the present. Mandel criticizes and refines Kondratieff's famous use of the notion. Mandel's book surveys in turn the main economic characteristics of late capitalism as it has emerged in the contemporary period. The last expansionary long wave, it argues, started with the victory of fascism on the European continent and the advent of the war

economies in the US and UK during the 1940s, and produced the record world boom of 1947-72. Mandel discusses the reasons why the dynamic upswing of growth in this period was bound to reach its limits at the turn of the 1970s, and why a long wave of economic stagnation and intensified class struggle has set in today. Late Capitalism is a landmark in Marxist economic literature. Specifically designed to explain the international recession of the 1970s, it is a central guide to understanding the nature of the world economic crisis today.

Succinct and concise, this textbook covers all the procedural and substantive aspects of EU competition law. It explores primary and secondary law through the prism of ECJ case law. Abuse

of a dominant position and merger control are discussed and a separate chapter on cartels ensures the student receives the broadest possible perspective on the subject. In addition, the book's consistent structure aids understanding: section summaries underline key principles, questions reinforce learning and essay discussion topics encourage further exploration. By setting out the economic principles which underpin the subject, the author allows the student to engage with the complexity of competition law with confidence. Integrated examples and an uncluttered writing style make this required reading for all students of the subject.
