Choose your answer to the question and click 'Continue' to see how you did. Then click 'Next Question' to answer the next question.Geometry: High School - Practice Test ... - Study.com1. E. The vertex is the point, formed by the two rays of an angle. Thus, H is the vertex of the angle. 2. C. $C = \pi d$. Substituting 8 for d gives $C = 8\pi$, where C is approximately 25.13. 3. B. The area of a triangle may be found by using the formula, $A = 1/2bh$, where b represents the base and h represents the height. Thus, the area may be written as $A = 1/2(11)(6)$, or $A = 33$.Geometry Practice Test 1The complement is the amount you must add to something to make it "whole". For example, in geometry, two angles are said to be complementary when they add up to 90°. One angle is said to be the complement of the other. In the figure below, angles PQR and RQS are complementary. RQS is the complement of PQR.7TH GRADE MATH-MIDTERM REVIEW SHEET` (Your Guide to ...Start studying 9th Grade Math Midterm.
