Revised and updated to 2006, the fourth edition of Contracting Law continues the clear explanations of contract doctrine, engaging cases, and thought-provoking cultural and historical materials that have made this casebook a favorite of students and professors. Students and faculty appreciate the fact that no separate statutory supplement

is necessary. Selected provisions from the Restatement Second of Contracts and the Uniform Commercial Code are included in the casebook as appendices. The workbook (purchased separately), complete with flow charts, vocabulary lists, problems and structured exercises, helps students understand legal doctrines, case briefing, and synthesis. Students can use the workbook independently or exercises can be used in class discussions. The fourth edition augments the cultural material with notes and questions showing the social contexts for specific contract doctrines. Many sections are shortened and reorganized for

ease of use in 3-, 4-, or 5-credit courses. At the same time, UCC coverage is expanded (including both the pre- and post-2003 versions of Article 2) for those courses designed to include sales law.

"Contracting Law is an extraordinary breakthrough in contract jurisprudence.

The overwhelming majority of my students felt the book was the most useful, comprehensive, and engaging text of their first year." -- Professor

Patricia Williams, Columbia University Law School, on the second edition [Michigan's Oil & Gas News](#) Pearson Scott Foresman

AuthorHouse  
Drawing on social justice methodologies and cultural studies scholarship, Key Theoretical Frameworks offers new curricular and pedagogical approaches to teaching technical communication.

Including original essays by emerging and established scholars, the volume educates students, teachers, and practitioners on identifying and assessing issues of social justice and globalization. The collection provides a valuable resource for teachers new to translating social justice theories to the classroom by presenting concrete examples related to technical communication. Each contribution adopts a particular theoretical approach, explains the theory, situates it within disciplinary scholarship, contextualizes the approach from the author's experience, and offers additional teaching applications.

The first volume of its kind, *Key Theoretical Frameworks* links the theoretical with the pedagogical in order to articulate, use, and assess social justice frameworks for designing and teaching courses in technical communication.

Contributors: Godwin Y. Agboka, Matthew Cox, Marcos Del Hierro, Jessica Edwards, Erin A. Frost, Elise Verzosa Hurley, Natasha N. Jones, Cruz Medina, Marie E. Moeller, Kristen R. Moore, Donnie Johnson Sackey, Gerald Savage, J. Blake Scott, Barbi Smyser-Fauble, Kenneth Walker, Rebecca Walton
