The Heir 9th Cinebook

Darryl is one of the most popular journalists in Openworld thanks to his power to travel between realities. His adventures are legendary, but he takes his role as a reporter seriously. When he investigates the disappearance of a Giant, he uncovers a conspiracy by a mysterious individual who would exploit magic for unknown purposes. Based on the popular European YA novel series by Olivier Peru, DARRYL OPENWORLD is an imaginative adventure through a magic-filled world of anachronistic beauty and intrigue, like a steampunk Harry Potter.

Ce nouvel opus de la série poursuit avec brio le récit des démêlés de Largo Winch avec les pires crapules de l'époque contemporaine. India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River and in farming communities in the southern lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

Crusade Largo Winch - Tome 17 - Mer noire

April 26, 1986, Chernobyl: the reactor core of the nuclear power plant begins to melt. It is the greatest nuclear disaster of the twentieth century. A cloud laden with radionuclides travels thousands of miles in every direction, contaminating a populace unaware of its danger and who cannot protect themselves. At that time, Emmanuel Lepage was 19 years old, watching and listening, incredulous, to the news on television. 22 years later, April 2008: Lepage travels to Chernobyl to report, both in writing and drawings, about the lives of the survivors and their children living on the highly contaminated land. Upon making the decision to travel there, Emmanuel has the feeling that he is defying death, and when he finds himself on a train to Ukraine, where the old power station is located, a question keeps popping up in his mind: What am I doing here?

This book presents a new way for educators at all levels - from early years to university - to think about curriculum priorities. It focuses on the curriculum as a form of specialised knowledge, optimally designed to enable students to gain access to the best knowledge available in any field. Papers jointly written by the authors over the last eight years are revised for this volume. It draws on the sociology of knowledge and in particular the work of Emile Durkheim and Basil Bernstein, opening up the possibilities for collaborative inter-disciplinary enquiry with historians, philosophers and psychologists. Although primarily directed to researchers, university teachers and graduate students, its arguments about specialised knowledge have profound implications for policy makers. But that help came with a price, and the triad will one day call in their favour...
