Navigation of the Pacific Ocean

Springer

The Wind Is Not a River is Brian Payton's gripping tale of survival and an epic love story in which a husband and wife—separated by the only battle of World War II to take place on American soil—fight to reunite in Alaska's starkly beautiful Aleutian Islands. Following the

death of his younger brother in Europe, journalist John Easley is determined to find meaning in his loss. Leaving behind his beloved wife, Helen, he heads north to investigate the Japanese invasion of Alaska's Aleutian Islands, a story censored by the U.S. government. While John is accompanying a crew on a bombing run, his plane is shot down over the island of Attu. He survives only to find himself exposed to a harsh and unforgiving wilderness, known as “the birthplace of winds.” There, John must battle the elements, starvation, and his own remorse

while evading discovery by the Japanese. Alone at home, Helen struggles with the burden of her husband's disappearance. Caught in extraordinary circumstances, in this new world of the missing, she is forced to reimagine who she is—and what she is capable of doing. Somehow, she must find John and bring him home, a quest that takes her into the farthest reaches of the war, beyond the safety of everything she knows.

Shipwrecked and cast adrift, Lemuel

Gulliver wakes to find himself on Lilliput, an island inhabited by little people, whose height makes their quarrels over fashion and fame seem ridiculous. His subsequent encounters - with the crude giants of Brobdingnag, the philosophical Houyhnhnms and the brutish Yahoos give Gulliver new, bitter insights into human behavior. Swift's savage satire view mankind in a distorted hall of mirrors as a diminished, magnified and finally bestial species, presenting us with an uncompromising reflection of ourselves.

Reprint of the original, first published in 1875.

The Life and Voyages of Christopher Columbus e-artnow

This book focuses on the highly touristed, but surprisingly under-researched Lesser Antilles region. After offering a brief overview of the region's geologic and tectonic history, as well as its basic

climatology, subsequent chapters then discuss each island's (or island set's) geomorphology and geology, and how the settlement history, tourism, and hazards have affected their individual landscapes. Written by regional experts and replete with up-to-date information, stunning color imagery, and beautiful cartography (maps), it is the only comprehensive, scientific evaluation of the Lesser Antilles, and serves as the region's definitive reference resource. Accessible to non-experts and amateur explorers, the book includes in-depth discussions and reference sections for each island/island set. Usable as both a textbook and guidebook, it offers readers a straightforward yet detailed assessment of an interesting and intriguing - but often-overlooked and under-appreciated - locale.

Meteorological Observations Macmillan Prepare yourself for discoveries and new adventures with this incredible book about the true origin of wanderlust. This edition forms a complete history of the earliest start and progress of navigation, discovery, and commerce, by sea and land, from the earliest ages to the early

19th century. First part of the work covers voyages and travels of discovery in the middle ages; from the era of Alfred, King of England, in the ninth century to that of Don Henry of Portugal at the commencement of the fourteenth century. Second part deals with general voyages and travels chiefly of discovery; from the era of Don Henry, in 1412, to that of George III. in 1760. The rest of the work has some particular voyages and travels arranged in systematic order, Geographical and Chronological, and studies voyages during the era of George III conducted upon scientific principles, by which the Geography of the globe has been nearly perfected.

Margo T Krasne's Say It With Confidence gathers her observations, exercises, tips, and teaching in a form that is indeed the

next best thing to being at one of her highly successful presentation skills seminars. It's also a great refresher course if you have been lucky enough to attend one. Examples and anecdotes amply illustrate Krasne's points and the prose is clear and fast paced. Say it With Confidence delves into the common misconceptions most of us have about public speaking and shows us how to overcome them and the fear of speaking they produce. The books lasting benefits: the exercises Krasne has developed to help you overcome your weakness and develop your strengths. And filling out her presentation analysis form is bound to improve any argument whether you're trying to get your family to go with you on an outing or pitching a \$50 million dollar account.

Island of the Wind Harper Collins

In recent years, several major natural and man-made hazards have challenged scientists, government officials and the public in general: earthquakes, major volcanic and other seismic eruptions in Mount St. Helens, El Chichon, Mexico city, Nevado del Ruiz, Japan, Italy, Greece, Cameroon and many other places on our globe; Tsunami in the Pacific Ocean and deadly storm surges along the coasts of India, Bangladesh and Japan; Cyclones, floods, thunderstorms, snow storms, tornadoes, drought, desertification and other climatic catastrophes; Amoco-Cadiz oil spill accident (France), Three-Mile Island (U. S. A.) and Chernobyl (U. S. S. R.) nuclear accidents, Bhopal chemical accident (India), acid rain (Canada, U. S. A.) and other technological disasters. Such hazards have snuffed out millions of lives, infli

Sailing Directions to Accompany the Gulf and River St. Lawrence Chart

Tells how the people of Danish island of Samsø decided to use wind energy to power their lives and became the "Energy Island."

The American Journal of Science

In January 2015 I flew to Fuerteventura in the Canary Islands, I had three interwoven aims in this trip. The treatment of my Psoriasis, the writing of my novel away from all distractions and lastly to be on my own to mourn and remember my mother who passed away very unexpectedly a year ago. This is an account of my experiences not a travel guide.
