Saunders Comprehensive Review for the NCLEX-RN® Examination, Fourth South Asia Edition - E-Book Rex Bookstore, Inc.
 Setting standards of performance is a ubiquitous task in education licensure, certification, and credentialing. It is found in elementary schooling, the professions, commercial applications, and governmental and private organizations. It is one of the most complex, controversial, and vexing issues facing specialists and policy makers today. This second edition solidifies Setting Performance Standards as the only book providing a comprehensive profile of both the issues and the "how-to" methods that define this thorny field. Four chapters have been removed; 11 chapters have been added; 2 chapters have major revisions; and all chapters have been updated. Comprehensive – Part I provides a conceptual overview of standard setting and its overarching issues; Part II provides practical (how-to) information on the newest standard setting methods; Part III provides information and advice on persistent and potential challenges in standard setting. Practical – Part II (the heart of the book) reviews 16 of the newest standard setting methods, far more than any other book. Expertise – Most of the well-known authors from the 1st edition return, with authors of equal stature contributing new chapters.

Examining the Validity Evidence for California Teacher Licensure Exams Rex Bookstore, Inc.
 Americans have adopted a reform agenda for their schools that calls for excellence in teaching and learning. School officials across the nation are hard at work targeting instruction at high levels for all students. Gaps remain, however, between the nation's educational aspirations and student achievement. To address these gaps, policy makers have recently focused on the qualifications of teachers and the preparation of teacher candidates. This book examines the appropriateness and technical quality of teacher licensure tests currently in use, evaluates the merits of using licensure test results to hold states and institutions of higher education accountable for the quality of teacher preparation and licensure, and suggests alternatives for developing and assessing beginning teacher competence. Teaching is a complex activity. Definitions of quality teaching have changed and will continue to change over time as society's values change. This book provides policy makers, teacher testers, and teacher educators with advice on how to use current tests to assess teacher candidates and evaluate teacher preparation, ensuring that America's youth are being taught by the most qualified candidates.

Teachers of Color and Indigenous Teachers are underrepresented in public schools across the United States of America, with Black, Indigenous, and People of Color making up roughly 37% of the adult population and 50% of children, but just 19% of the teaching force. Yet research over decades has indicated their positive impact on student learning and social and emotional development, particularly for Students of Color and Indigenous Students. A first of its kind, the Handbook of Research on Teachers of Color and Indigenous Teachers addresses key issues and obstacles to ethnoracial diversity across the life course of teachers' careers, such as recruitment and retention, professional development, and the role of minority-serving institutions. Including chapters from leading researchers and policy makers, the Handbook is designed to be an important resource to help bridge the gap between scholars, practitioners, and policy makers. In doing so, this research will serve as a launching pad for discussion and change at this critical moment in our country's history. The volume's goal is to drive conversations around the issue of ethnoracial teacher diversity and to provide concrete practices for policy makers and practitioners to enable them to make evidence-based decisions for supporting an ethnoracially diverse educator workforce, now and in the future.

Licensure examination is a tool used to determine who among the examinees is equipped with the minimum knowledge or expertise to competently carry out the functions of a teacher. While studies on licensure examination for teachers (LET) are available, synthesis using scoping reviews has not yet been conducted. Using Arksey and O'Malley's (2005) scoping review framework, results indicate that (1) descriptive-correlational method and documentary analysis were commonly used to study the LET, (2) the trends in the scope focus on finding the relationship or correlation of potential predictive factors of the performance of BEd and BSEd graduates, (3) the bulk of the research focused on academic achievement as a major predictive factor for LET performance, and 4) studies proposed suggestions or interventions to boost licensure performance of the teaching education institutions. Recommendations are given based on the themes uncovered from included studies, particularly the utilization of other research methodologies to further study and analyze LET results.
