A revelatory account of Tony Blair's tumultuous leadership, *The Blair Years* gathers extracts from the diaries of the man who knew him best: Alastair Campbell—Blair's spokesman from 1994 to 2003, his press secretary, strategist, and closest confidant. It is a compelling chronicle of contemporary British politics and the rise of New Labour, providing the first important record of a remarkable

decade in Britain's history. Here are the defining events of the time, from the Labour Party's new dawn to the war on terror; from the death of Princess Diana to negotiations for peace in Northern Ireland; from Kosovo, Afghanistan, and Iraq to the Hutton Inquiry of 2003, the year Campbell resigned his position. Here also are Blair's relationships with world leaders and heads of state, including presidents Bill Clinton and George W. Bush. But above all, here is Tony Blair up close and personal, making the decisions that affected the lives of millions, under relentless and frequently hostile pressure. Often described as the second most powerful figure in Britain, Alastair Campbell is no stranger to controversy. Feared and admired in equal measure, hated by some, he was pivotal to the founding of New Labour and the sensational election victory of 1997. Campbell spent more waking hours alongside the prime minister than anyone, and his diaries—at times brutally frank, often funny, always engrossing—take the reader right to the heart of government. The Blair Years is a story of politics in the raw, of progress and setback, of reputations made and destroyed, under

the relentless scrutiny of a 24-hour media. Unflinchingly told, it covers the crises and scandals, the rows and resignations, the ups and downs at No. 10 Downing Street. But amid the landmark events are insights and observations that make this a remarkably human portrayal of some of the most influential people in the world. A completely riveting book about life at the very top, told by a man who saw it all.

**A Thousand Lies** Taylor & Francis

The true-life story of Fiona who always felt displaced, a girl looking for belonging and security. This is Me No Darkness Too Deep, explores the ups and downs when as a young woman she roller-coasted, travelling from city to city and meeting trouble at every stop. Fiona spent many years in the depths of dark and desolate places, emotionally, physically, and spiritually. She was beaten, she slept rough and was used and abused and endured the horrors of rape. Carrying the weight of being an adoptee meant that she struggled through abandonment and rejection issues. The author is not ashamed and embarrassed of many of the lifestyle choices she made in her past, she

declares "I came to my faith an absolute mess." Thinking that she was not good enough to be a Christian, her outlook on life changed when she accepted Jesus Christ as her Saviour. Through her story Fiona smashes the myth that to be a Christian you have to be a perfect person. "I want to smash the myth that we have to be all twinkly lights and fairy dust to be any use as a Christian." What is the political allure, value and currency of emotions within contemporary cultures of governance? What does it mean to govern more humanely? Since the emergence of an emotional turn in human geography over the last decade, the notion that our emotions matter in understanding an array of social practices, spatial formations and aspects of everyday life is no longer seen as controversial. This book brings recent developments in emotional geography into dialogue with social policy concerns and contemporary issues of governance. It sets the intellectual scene for research into the geographical dimensions of the emotionalized states of the citizen, policy maker and public service worker, and highlights new research on the emotional forms of governance which now characterise public life. An international

range of empirical field studies are used to examine issues of regulation, modification, governance and potential manipulation of emotional affects, professional and personal identities and political technologies. Contributors provide analysis of the role of emotional entanglements in policy strategy, policy implementation, service delivery, citizenship and participation as well as considering the emotional nature of the research process itself. It will be of interest to researchers and students within social policy, human geography, politics and related disciplines.

How does music reflect the key moments in our lives? How do we choose the works that inspire, delight, comfort or console? Fiona Maddocks selects 100 classical works from across nine centuries, arguing passionately, persuasively and at times obstinately for their inclusion, putting each work in its cultural and musical context, discussing omissions, suggesting alternatives and always putting the music first.

*Fiona Lowe's Weddings* Harlequin  
"Lollard" is the name given to followers of John Wyclif, the English dissident theologian who was dismissed from Oxford University in 1381 for his arguments regarding the eucharist. A forceful and influential critic of the ecclesiastical status quo in the late fourteenth century, Wyclif's

thought was condemned at the Council of Constance in 1415. While lollardy has attracted much attention in recent years, much of what we think we know about this English religious movement is based on records of heresy trials and anti-lollard chroniclers. In *Feeling Like Saints*, Fiona Somerset demonstrates that this approach has limitations. A better basis is the five hundred or so manuscript books from the period (1375–1530) containing materials translated, composed, or adapted by lollard writers themselves. These writings provide rich evidence for how lollard writers collaborated with one another and with their readers to produce a distinctive religious identity based around structures of feeling. Lollards wanted to feel like saints. From Wyclif they drew an extraordinarily rigorous ethic of mutual responsibility that disregarded both social status and personal risk. They recalled their commitment to this ethic by reading narratives of physical suffering and vindication, metaphorically martyring themselves by inviting scorn for their zeal, and enclosing themselves in the virtues rather than the religious cloister. Yet in many ways they were not that different

from their contemporaries, especially those with similar impulses to exceptional holiness.

INSTANT NEW YORK TIMES BESTSELLER!  
Fiona Davis, New York Times bestselling author of *The Lions of Fifth Avenue*, returns with a tantalizing novel about the secrets, betrayal, and murder within one of New York City's most impressive Gilded Age mansions. Eight months since losing her mother in the Spanish flu outbreak of 1919, twenty-one-year-old Lillian Carter's life has completely fallen apart. For the past six years, under the moniker Angelica, Lillian was one of the most sought-after artists' models in New York City, with statues based on her figure gracing landmarks from the Plaza Hotel to the Brooklyn Bridge. But with her mother gone, a grieving Lillian is rudderless and desperate—the work has dried up and a looming scandal has left her entirely without a safe haven. So when she stumbles upon an employment opportunity at the Frick mansion—a building that, ironically, bears her own visage—Lillian jumps at the chance. But the longer she works as a private

secretary to the imperious and demanding Helen Frick, the daughter and heiress of industrialist and art patron Henry Clay Frick, the more deeply her life gets intertwined with that of the family—pulling her into a tangled web of romantic trysts, stolen jewels, and family drama that runs so deep, the stakes just may be life or death. Nearly fifty years later, mod English model Veronica Weber has her own chance to make her career—and with it, earn the money she needs to support her family back home—within the walls of the former Frick residence, now converted into one of New York City's most impressive museums. But when she—along with a charming intern/budding art curator named Joshua—is dismissed from the Vogue shoot taking place at the Frick Collection, she chances upon a series of hidden messages in the museum: messages that will lead her and Joshua on a hunt that could not only solve Veronica's financial woes, but could finally reveal the truth behind a decades-old murder in the infamous Frick family.

The crisis around teaching and learning of mathematics and its use in everyday life and work relate to a number of issues.

These include: The doubtful transferability of school maths to real life contexts, the

declining participation in A level and higher education maths courses, the apparent exclusion of some groups, such as women and the aversion of many people to maths. This book addresses these issues by considering a number of key problems in maths education and numeracy: \*differences among social groups, especially those related to gender and social class \*the inseparability of

cognition and emotion in mathematical activity \*the understanding of maths anxiety in traditional psychological, psychoanalytical and feminist theories \*how adults' numerate thinking and performance must be understood in context. The author's findings have practical applications in education and training, such as clarifying problems of the transfer of learning, and of countering maths anxiety.
