Transforming History examines the profound transformation of historical thought and practice of writing history from the late Qing through the midtwentieth century. The authors devote extensive analysis to the common set of intellectual and political forces that shaped the study of history, from the ideas

of evolution, positivism, nationalism, historicism, and Marxism, to political processes such as revolution, imperialism, and modernization. Also discussed are the impact and problems associated with the nationstate as the subject of history, the linear model of historical time, and the spatial system of nationstates. The result is a convincing study that illustrates how history has transformed into a modern academic discipline in China.

Ernest Renan was one of the leading lights of the Parisian intellectual scene in the second half of the nineteenth century. A philologist, historian, and biblical scholar, he was a prominent voice of French liberalism and secularism. Today most familiar in the English-speaking world for his 1882 lecture "What Is a Nation?" and its definition of a nation as an "everyday plebiscite," Renan was a major figure in the debates surrounding the Franco-Prussian War, the Paris Commune, and the birth of the Third Republic and had a profound influence on thinkers across the political spectrum who grappled with the problem of authority and social organization in the new world wrought by the forces of modernization. What Is a Nation? and Other Political Writings is the first English-language anthology of

Renan's political thought. Offering a broad selection of Renan's writings from several periods of his public life, most previously untranslated, it restores Renan to his place as one of France's major liberal thinkers and gives vital critical context to his views on nationalism. The anthology illuminates the characteristics that distinguished nineteenth-century French liberalism from its English and American counterparts as well as the more controversial parts of Renan's legacy, including his analysis of colonial expansion, his views on Islam and Judaism, and the role of race in his thought. The volume contains a critical introduction to Renan's life and work as well as detailed annotations that assist in recovering the wealth and complexity of his thought.

Troubling Images New Africa Books
Troubling Images explores how art and visual culture helped to secure hegemonic claims to the nation-state via the construction of a unified Afrikaner imaginary Emerging in the late nineteenth century and gaining currency in the 1930s and 1940s, Afrikaner nationalist fervour underpinned the establishment of white

Afrikaner political and cultural domination during South Africa's apartheid years. Focusing on manifestations of Afrikaner nationalism in paintings, sculptures, monuments, buildings, cartoons, photographs, illustrations and exhibitions, *Troubling Images* offers a critical account of the role of art and visual culture in the construction of a unified Afrikaner imaginary, which helped secure hegemonic claims to the nation-state. This insightful volume examines the implications of metaphors and styles deployed in visual culture, and considers how the design, production, collecting and commissioning of objects, images and architecture were informed by Afrikaner nationalist imperatives and ideals. While some chapters focus only on instances of adherence to Afrikaner nationalism, others consider articulations of dissent and criticism. By 'troubling' these images: looking at them, teasing out their meanings, and connecting them to a political and social project that still has a major impact on the present moment, the authors engage with the ways in which an Afrikaner nationalist inheritance is understood and negotiated in

contemporary South Africa. They examine the management of its material effects in contemporary art, in archives, the commemorative landscape and the built environment. *Troubling Images* adds to current debates about the histories and ideological underpinnings of nationalism and is particularly relevant in the current context of globalism and diaspora, resurgent nationalisms and calls for decolonisation.

Native Life in South Africa Routledge
It is one of our most honored clichés that America is an idea and not a nation. This is false. America is indisputably a nation, and one that desperately needs to protect its interests, its borders, and its identity. The Brexit vote and the election of Donald Trump swept nationalism to the forefront of the political debate. This is a good thing. Nationalism is usually assumed to be a dirty word, but it is a foundation of democratic self-government and of international peace. National Review editor Rich Lowry refutes critics on left and the right, reclaiming the term “nationalism” from those who equate it with racism, militarism and fascism. He explains how nationalism is an American tradition, a thread that runs through such diverse leaders as Alexander Hamilton, Teddy Roosevelt, Martin Luther King, Jr., and Ronald Reagan. In *The Case for Nationalism*, Lowry explains how nationalism was central to the American Project. It fueled the American Revolution and the ratification of the Constitution. It preserved the country during the Civil War. It led to the expansion of the American nation’s territory and power, and

eventually to our invaluable contribution to creating an international system of self-governing nations. It’s time to recover a healthy American nationalism, and especially a cultural nationalism that insists on the assimilation of immigrants and that protects our history, civic rituals and traditions, which are under constant threat. At a time in which our nation is plagued by self-doubt and self-criticism, *The Case for Nationalism* offers a path for America to regain its national self-confidence and achieve continued greatness.

Papuan nationalism is young, evolving, and flexible. It has adapted to and reflected the political circumstances in which it has emerged. Its evolution as a

political force is one of the crucial factors in any analysis of political and cultural change in Papua, and the development of relations between the Indonesian government and Papuan society. This study examines the development of Papuan nationalism from the Pacific War through the movement’s revival after the fall of President Suharto in 1998. The author argues that the first step in understanding Papuan nationalism is understanding Papuan history and historical consciousness. The history that so preoccupies Papuan nationalists is the history of the decolonization of the Netherlands Indies, the struggle between Indonesia and the Netherlands over the sovereignty of Papua, and Papua’s subsequent integration into Indonesia. Papuan nationalism is also about ethnicity. Many Papuan nationalists make strong distinctions between Papuans and other peoples, especially Indonesians. However, Papuan society itself is a mosaic of over three hundred small, local, and often isolated ethno-linguistic groups. Yet over the years a pan-Papuan identity has been forged from this mosaic of tribal groups. This study explores the nationalists?

argument about history and the sources of their sense of common ethnicity. It also explores the possibility that the Special Autonomy Law of 2001, if implemented fully, might provide a framework in which Papuan national aspirations might be realized. This is the fourteenth publication in Policy Studies, a peer-reviewed East-West Center Washington series that presents scholarly analysis of key contemporary domestic and international political, economic, and strategic issues affecting Asia in a policy relevant manner.

Academic Paper from the year 2020 in the

subject Communications - Media History, grade: NA, , language: English, abstract: A journalist is basically a chronicler of events as they unfold. In the process he/she makes the first draft of history, which history may come to the use of a professional historian to record the events objectively and bequeath to the future generations. New technologies have made journalist's task easy but the rise of media empires and the subsequent formation of culture industries have made his/her job complex at the same time. Since media empires or cultural industries are primarily driven by profit motive and a desire to set the agenda - economic, political, social, cultural, etc., - journalists come under increasing pressures to compromise objectivity and truth. Accordingly at times the mediated history that is produced in the newsroom is a distorted version of reality out there. This is especially so in times of conflict and war. Some media critics goes on to the extent of saying that media is also a maker of war. Media assumes the self-appointed role of actors or agents in the events and processes which they purport only to be reporting. To that extent the media themselves have

had an impact on the course of historical events, and been a significant ingredient in their development. This becomes evident when one considers carefully the major historical events of the twentieth and early twenty-first century.

The Origins of Arab Nationalism State University of New York Press

A new account of the life and policies of the first German chancellor, Otto von Bismarck, this concise historical-biography reflects, for the first time in English, the historical shift in emphasis from the traditional political-economic approach to the more complex social-economic one of post--World War II scholarship. Since the middle of the 1950s, much new material on Bismarck and nineteenth-century Germany and new interpretations of existing material have been published in Germany, Great Britain, and the United States. Professor George O. Kent's brilliant synthesis, drawing on this mass of material, examines changes in emphasis in post--World War II scholarship. The book, particularly in the historiographical notes and bibliographical essay, provides the serious student with an invaluable guide to the intricacies of recent Bismarckian

scholarship. For the general reader, the main text presents a picture of the man, the issues, and the age in the light of modern scholarship. The major shift in historical emphasis described in this new account is the importance scholars give to the period 1877-79, the years of change from free trade to protectionism, rather than to 1870-71 the founding of the Reich. Bismarck's political machinations, particularly his willingness to explore the

possibilities of a coup d'état, are more fully discussed here than in any other book.
