This is the first general introduction to Pliny's Letters published in any language, combining close readings with broader context and adopting a fresh and innovative approach to reading the letters as an artistically structured collection. Chapter 1 traces Pliny's autobiographical narrative throughout the Letters; Chapter 2 undertakes detailed study of Book 6 as an artistic entity; while Chapter 3 sets Pliny's letters within a Roman epistolographical tradition dominated by Cicero and Seneca. Chapters 4 to 7 study thematic letter cycles within the collection, including those on Pliny's famous country villas and his relationships with Pliny the Elder and Tacitus. The final chapter focuses on the 'grand design' which unifies and structures the collection. Four detailed appendices give invaluable historical and scholarly context, including a helpful timeline for Pliny's life and career, detailed bibliographical help on over 30 popular topics in Pliny's letters

and a summary of the main characters mentioned in the Letters. The Greatest Country Legare Street Press

In 1983 the three authors of this book undertook a journey into Roebuck Plains, an area in the north of Western Australia which takes its name from a ship which was sailed into the region in 1699 by the European explorer, William Dampier. It was then, and until less than a century ago, inhabited by Aboriginal people. Today the plains form part of a pastoral lease, and no Aboriginals live there.

The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

Elements of Elocution; Or, an Introduction to Pronunciation and Reading A&C Black

As major political and social changes continue to sweep through the countries of the world, and more and more nations move toward forms of social democracy, the importance of being able to read has taken on a new urgency. The burden of government,

commerce, education, and social welfare is moving increasingly toward the individual, and with it the need to turn basic reading skills into the sophisticated ability to analyze, comprehend, and debate the whole world of language in front of him. This book offers an opportunity to see how the process of learning to read is being handled in a broad cross-section of countries in the world, representing the First, Second, and Third Worlds. Each of the twenty-six country surveys has been written by an international scholar indigenous to that land and follows the same basic pattern in examining reading education. Following a brief introduction to the nation and its particular educational characteristics, ten reading-associated factors are fully discussed and analyzed. These factors include the language of the country in question, its reading policy, the goals of reading, illiteracy, issues pertaining to the rate and diagnosis of reading disabilities, reading readiness programs, the teacher qualification procedure, the source and availability of materials in reading, the financing of reading education, and research thrusts in the field of reading. Each chapter then concludes with a summary and brief bibliography of important reference sources within that country. This unique study will be an essential reference tool for students and practitioners in the fields of education and reading literacy, as well as a valuable addition to both public and academic libraries.

'I'm looking for two really trustworthy rabbits and six sensible clear-speaking frogs!' Young Anna Lacey has spent most of her life on a farm in Essex. But her first teaching position carries her to an unattractive, newly constructed suburb where she has to adjust to cramped lodgings, a skinflint landlady, overcrowded classrooms, and eccentric colleagues ('a rum lot'). She must also adapt some of her idealistic theories of teaching to the realities of her energetic, exuberant pupils. Fans of Miss Read's much-loved Thrush Green and Fairacre novels will be delighted with this tale of a young woman's first year of teaching, and perhaps also surprised by its sharp, funny portrayals of the foibles of human nature. Anna experiences some disappointments and uncertainties, but her practicality, determination and sense of humour see her through. This new edition of Fresh from the Country features an introduction by Jill Saint, the author's

daughter. 'A delightful book full of accurate detail about school life, the children who are taught and the people who teach.' Daily Telegraph

Steeped in story-telling and endlessly curious, Reading the Country: An Introduction to Nomadology (1984) was the product of Paddy Roe, Stephen Muecke and Krim Benterrak, experimenting with what it might be like to think together about country. In the process a senior traditional owner, a cultural theorist and a painter produced a text unlike any other. Reading the Country: 30 Years On is a celebration of one of the great twentieth-century books of intercultural dialogue. Recalling a spirit of intellectual risk and respect, in this collection, Indigenous and non-Indigenous scholars, poets, writers and publishers both acknowledge the past and look, with hope, to future transformations of culture and country.

Introduction to English as a Second Language Teacher's Book LernerClassroom

While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do

not read well enough to meet the demands of our competitive, technology-driven society. This book explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn to read. Implications for parents, teachers, schools, communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, *Preventing Reading Difficulties in Young Children* examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading.

Readers new to ancient epic are hampered in two ways: they do not know the ancient languages, and they are unfamiliar with the ancient world. This survey addresses the needs of these readers

by offering guidance through the major classical writers of epic: it begins with Homer and concludes with an overview of the development of late ancient epic and of the interface between the epic and the novel.
