This new and improved 3rd edition includes material about selling on the Internet, including eBay storefronts; online marketing and customer service improvements ; and changes

in the retailing field, such as competing with big box retailers and the demise of the sales rep system.

The Social Work Ethics Audit Routledge Using examples from Indigenous community oral history projects throughout Canada and the United States, this new edition is informed by best practices to show how oral history can be done in different contexts. [Newsletter N](#) A S W Press The second book in the five-volume Community Oral History Toolkit walks you through

all the planning steps to travel from an idea to a completed collection of oral history interviews. Informed by an extensive survey of oral historians from across the country, this guide will get you started on firm ground so you don't get mired in unforeseen problems in the middle of your project. Designed especially for project administrators, it identifies participants and responsibilities

s that need to be covered, and details planning needs for everything from budgeting to technology, and from legal issues to ethics. Planning a Community Oral History Project sets the stage for the implementation steps outlined in Volume 3, *Managing a Community Oral History Project*. *The Goldilocks Challenge* Peter Lang Incorporated, International Academic Publishers Community projects often falter after the interviews are completed. This final book of the five-volume Community Oral History Toolkit explains the importance of processing and archiving oral histories and takes the reader through all the steps required for good archiving and for concluding the oral history project so that it is preserved and accessible for future generations. The authors give special attention to record-keeping systems and repositories, and provide several examples from actual projects to ground the information in practical terms. Charts, checklists, and sample forms also help the reader apply concepts to practice. Volume 5 finishes with examples of creative ways community projects have used oral histories, such as performances, exhibitions,

celebrations, websites, and more, in order to promote history and engage the community. Improving Instruction in Rational Numbers and Proportionality Taylor & Francis Helping students develop an understanding of important mathematical ideas is a persistent challenge for teachers. In this book, one of a three-volume set, well-known mathematics educators Margaret Smith, Edward

A. Silver, and Mary Kay Stein provide teachers of mathematics the support they need to improve their instruction. They focus on ways to engage upper elementary, middle school, and high school students in thinking, reasoning, and problem solving to build their mathematics understanding and proficiency. The content focus of Volume One is rational numbers and proportionality

. Using materials that were developed under the NSF-funded COMET (Cases of Mathematics to Enhance Teaching) program, each volume in the set features cases from urban, middle school classrooms with ethnically, racially, and linguistically diverse student populations. Each case illustrates an instructional episode in the classroom of a teacher who is implementing

standards-based instruction, the teachers' perspective, including their thoughts and actions as they interact with students and with key aspects of mathematical content, cognitively challenging mathematics activities that are built around samples of authentic classroom practice., and facilitation chapters to help professional developers "teach" the cases, including

specific guidelines for facilitating discussions and suggestions for connecting the ideas presented in the cases to a teacher's own practice. As a complete set, this resource provides a basis on which to build a comprehensive professional development program to improve mathematics instruction and student learning.
