"This book examines the European Neighbourhood Policy (ENP) in the context of internal functions performed with regards to the European Union (EU) political system and its key actors. It argues that the ENP has been formulated not only in reaction to external challenges and threats, but also in response to EU internal legitimacy needs at systemic, institutional and actor level. Looking beyond governance approaches and the power of norms, this book follows a sociological approach to the politics of legitimation. Using Bourdieu's field theory, it bridges the rationalist-constructivist divide inherent in much of the ENP scholarship. While analysing articulations of EU institutions in terms of narrative production, reproduction and reconstruction, it sheds valuable light on where the conflicting goals, ambiguity and incoherence stem from. By highlighting third countries' responses and usages of ENP narratives for domestic and international legitimacy-seeking, the book calls for a more outside-in perspective on EU foreign policy. With the European integration project being increasingly contested, both internally and externally, this book provides a timely focus on the topic of legitimation and delegitimation dynamics with regards to EU foreign policy. This book is of key interest to scholars and students of European integration, EU Foreign Policy, and more broadly EU Studies and International Relations"--

Homo Ludens Council of Europe

An essential reference for all game designers, this 1938 classic is "a fascinating account of 'man the player' and the contribution of play to civilization" (Harper's). In this classic evaluation of play that has become a "must-read" for those in game design, Dutch philosopher Johan Huizinga defines play as the central activity in flourishing societies. Like civilization, play requires structure and participants willing to create within limits. Starting with Plato, Huizinga traces the contribution of Homo Ludens, or "man the player" through Medieval Times, the Renaissance, and into our modern civilization. Huizinga defines play against a rich theoretical background, using cross-cultural examples from the humanities, business, and politics. Homo Ludens defines play for generations to come.
