#### Parachuting Skydiving

World famous competitive skydiver and coach Dan Brodsky-Chenfeld presents proven tools and techniques for success and explains how they can be used in everyday life. Dan survived a plane crash from which sixteen of the twenty-two people on board were killed. He was left critically injured and woke up from a six-week-long coma with a broken neck, broken skull, severe head trauma, a collapsed lung, and other serious internal injuries. Against all odds, Dan recovered and went on to become one of the greatest competitive skydiver in the world. With the love and support of friends and family, Dan was able not only to resurrect his life but return to skydiving to achieve greater heights than he could have ever imagined. His techniques and methods for excelling are applicable to all people, no matter their goals. Dan uses his experiences to teach the lessons he's learned—as a competitor, coach, business owner, father, and husband—to help others achieve their dreams, overcome obstacles, and reach their peak performance.

It's hard to imagine there's a more extreme sport than skydiving. Jumping from a plane at 13,000 feet (3,962 m) or higher seems crazy to some, but those who try it are often hooked for life.

Readers of this book step off the plane and into the high-flying world of skydiving, including tandem skydiving, accelerated free fall, BASE jumping, and competitive skydiving. The history and hazards of the sport are also considered, with midair photographs adding an even greater sense of amazement to this high-interest topic.

Two friends, Jens and Gary, both Dutch, travel in 1992 to California for a sports training camp and are involved in a devastating plane crash. They barely survive; out of the twenty-two people on board sixteen are killed, including two of their Dutch team mates. A young Dutch woman, who unknowingly belongs to a subculture guided by underground powers, is indirectly involved in the accident. Back home she tries to find the Dutch survivors. Jens and Gary experience the most difficult period of their life; having to deal with the grief of losing their friends and recovering from severe injuries. In the period after the accident, their lives start changing. They are caught up in events they never thought possible. Jens and Gary meet occasionally. In intense discussions they discover that not all is what it seems. Twelve years after the accident, several striking signs draw Jens' attention. "Too many to be just coincidental", he decides. "Is someone trying to tell me something? Does Gary have a point after all?", he wonders. In 2012, a remembrance day is organized at the crash site. Back in California Jens meets a presumed lost friend. This event explains to him why things have happened, and why certain people have played a part in his life. He is shocked by what he hears about mysterious tribes and clans who guide and influence us earthly inhabitants. It all unfolds in a thrilling vision on the origin of mankind, the society and our greatest threat. BY SHEER ACCIDENT is based on many true events experienced by the writers themselves.

Ever since the days of the pioneers, skydiving and parachuting have been viewed with suspicion by public and press who would have us believe that only some kind of superhuman can survive each time they dive through the door of an aircraft. Skydive sets out to debunk these myths and explain the skills required for training and progression. Topics include: what to expect on your first-jump course; how to fly a modern sport parachute; more techniques as you climb the progression ladder and introductions to formation skydiving, freestyle, freeflying and skysurfing. Illustrated throughout with photographs and line art, this book is for anyone who wants to get involved in this most exciting and stimulating of airsports. AUTHOR: Chris Donaldson made his first jump in 1977 and has been skydiving ever since. He has competed in formation skydiving at national level, and was a member of the sixty-person formation that broke the British record in 1989. He is an advanced instructor/examiner for the British Parachute Association. 8 pages of colour + 77 b/w photos

**JUMP!** Para Pub

An action-packed day of adventure involving parachutes often ends with pumped-up jumpers exchanging stories at the bar or around a bonfire. When the tales they tell each other begin with "NSTIW", they may or may not include "TIWGD", but they'll always have everyone within earshot leaning closer, waiting to hear the tale of near death, hilarity and/or mishaps their friend experienced. These stories are written by the people who lived them. Most of one's jumps tend to fade over time, but those jumps where something went wrong are forever etched in our memories. The reader will find tales that begin up there--in the bright blue yonder--and end on terra firma, usually happily and without injury or death. In-between are the moments of terror, self-doubt, triumph, and Adrenalin-pumping action that define a jumper's world. They are part of the history of the sport called skydiving, and around the world, at parachute centers and drop zones everywhere, their telling and retelling--often with embellishment--is part of our ritual. Even if you've never thought you'd want to strap on a rig and jump from an airplane, you can laugh, sweat, and shake your head in wonder along with the rest of us who enjoy a good story. Most of these stories happened in the 1960s to the '80s--the early days of skydiving--when sex was safe, and skydiving

was dangerous. When the rules were just rough guidelines and the sport went from round canopies and style/accuracy practice to squares and relative work (today's formation skydiving). From the joy of seeing a friend survive disaster to taking part in a DZ prank or two, these stories bring back that era like none other. This compilation of stories (150pp) was first published in late 2015 to entertain their fellow skydivers and friends, and is a labor of love by its collaborators--Tim Long, Doug Garr, Michael Kearns and Jan Works. Profits from the book's sale will be donated to building and maintaining the International Skydiving Museum & Hall of Fame.

It's official. Ditch is obsessed with skydiving. His girlfriend may have left him, but he's found a new love - jumping out of planes. To top it off, the crazy skydiving chick who's been tormenting him for months just adds a new dimension to his passion. Life couldn't be better. Every week is a new thrill, a new challenge, a new formation. Work is just something to do before heading to the drop zone on the weekends. Then, a week spent at the World Freefall Convention puts Ditch's world in a bit of a tailspin. There he finds an entire community of souls who are just as passionate about skydiving as he is - including the hottest girl he's ever seen in a jumpsuit. When temptation and tragedy combine, Ditch is left reeling and wondering if flying without a net is all it's cracked up to be. In this conclusion to the Life is a Beech adrenaline ride, Brian Cook shows his trademark humor and his love for the sport of skydiving in a book that will give readers a better understanding of those nuts who jump out of planes for fun.

Skydiving, as the word implies, is an activity in which you'll be literally diving down from the sky

with some safety measures, of course. It's done from an airplane or a helicopter which takes off from a drop zone, which is like a small airbase. A Bird's Eye View Of SkydivingIf you're planning to do this breathtaking activity, then you should be prepared to know that skydivers would usually exit their airplane at the height of 4000 metres or 13,000 feet. After doing so, you would have to do a freefall for a period of time and then you could open your parachute to slow down your descent until you reach a safe and slow landing speed.Generally, the chute should be fully inflated by the height of around 2,500 ft. In fact it is part of the law that skydivers should jump with two chutes. One would be the main chute and the other would be the reserve, just in case the main parachute would fail.Once your parachute is in its full inflation, you now have the ability to control your speed and direction using your chute's steering lines. With that, technical manoeuvres could be executed by experienced skydivers giving them the ability to land with great accuracy. In fact, there are even some competitions held on being able to land in a specific spot with the most precision and style.Other than bundling yourself out of the plane, opening a parachute and floating your way down to Earth, skydiving also have some specialization areas, and here are some of them.Formaton Skydiving: Creating Art While You FallDuring the freefall period of the jump, some experienced skydivers would combine to create and hold different formations before they breaking off and open up their parachutes and float down to earth as normal skydiving does. In fact, the world record for this kind of skydiving is actually a 400 man dive. The formation was maintained for 4.25 seconds from the altitude of 25,000 ft. in Udon Thai, Thailand.Freestyle Skydiving: A Solo Performance This kind of diving can be a very entertaining one. It is where the skydiver would perform some acrobatic manoeuvres and stunts, such as rolls, tumbles and graceful Skydiving 101.formations by himself throughout the freefall period and before he opens his parachute. Freestyle dives would also need the participation of another skydiver.The second diver on the other hand would not do any kind of stunts. However, he would be the one to film his partners' performance through a camera that is mounted on his helmet. This kind of dive is actually a registered competitive sport that was declared in 1996 by the FAI. Free Flying: Do It Your WayThis is considered to be the art of controlling your body and having the ability to move through different static positions while you are in the freefall period of your jump, before you open your parachute. If you'll be doing dives like this, you would have to do some manoeuvres like Sit Flying, Back Flying, and Head Down. These would allow you to have more control on your speed and trajectory. You also have to do some exit rolls or tumbles at the end of your freefall stage so that you can safely deploy your parachute by the time you reach the right altitude.
