SYDNEE ROMAN

Machine Design CRC Press

This volume presents proceedings from the first Australian-New Zealand Geoenvironment conference. The conference provides a forum for researchers and practitioners in the region to exchange ideas, share information and discuss the effective management of the geoenvironment.

Textiles, France St Kitts Press

The "Europe against Cancer" programme has, from its inception, emphasised the key role which general practitioners must play in the actions necessary to achieve its aim of reducing the incidence and the mortality from cancer in the European Community. General practitioners, because of their day-to-day direct and continuing contact with patients, play a role not only in primary prevention and education of patients, but also in motivating their patients to accept secondary prevention and screening, some of it carried out by general practitioners themselves. These preventive activities are in addition to their traditional role in the care and management of patients with cancer at home, and increasingly, their role in active treatment. In view of the importance of the general practitioner in the "Europe against Cancer" programme, the European Commission, with a view to providing general practitioners with up-to-date useful information, has sponsored the production of this series of publications on organ based cancers, especially written for

general practitioners. MICHEL RICHONNIER Coordinator of the "Europe against Cancer" programme, Commission of the European Communities, Brussels Preface The present textbook is the second in the series published by the Commission of the European Communities within the context of the "Europe Against Cancer" Programme. After lung cancer, it was felt that priority should be given to breast cancer, the most frequent neoplastic disease among European women.

Digital Signal Processing Laboratory, Second Edition CRC Press
 This book compiles brand new case studies on the intricacies and market entry strategies of different companies in China. The sheer speed and scope of China's growth makes it unique and investment opportunities are very attractive. Despite the potential, many western companies fail in their market entry strategies. This book traces the major sources of failure and uses cases to illustrate how firms can better cope with the challenging Chinese market. With a special focus on marketing, positioning, and branding, this book presents issues and solutions of both large multinationals and small niche market players.

Considering the rapid evolution of digital signal processing (DSP), those studying this field require an easily understandable text that complements practical software and hardware applications with sufficient coverage of theory. Designed to keep pace with

advancements in the field and elucidate lab work, Digital Signal Processing Laboratory, Second Edition was developed using material and student input from courses taught by the author. Contains a new section on digital filter structure Honed over the past several years, the information presented here reflects the experience and insight the author gained on how to convey the subject of DSP to senior undergraduate and graduate students coming from varied subject backgrounds. Using feedback from those students and faculty involved in these courses, this book integrates simultaneous training in both theory and practical software/hardware aspects of DSP. The practical component of the DSP course curriculum has proven to greatly enhance understanding of the basic theory and principles. To this end, chapters in the text contain sections on: Theory—Explaining the underlying mathematics and principles Problem solving—Offering an ample amount of workable problems for the reader Computer laboratory—Featuring programming examples and exercises in MATLAB® and Simulink® Hardware laboratory—Containing exercises that employ test and measurement equipment, as well as the Texas Instruments TMS320C6711DSP Starter Kit The text covers the progression of the Discrete and Fast Fourier transforms (DFT and FFT). It also addresses Linear Time-Invariant (LTI) discrete-time signals and systems, as well as the mathematical tools used to describe them. The author includes appendices that give detailed descriptions of hardware along with instructions on how to use the equipment featured in the book.

Breast Cancer Springer Science & Business Media

Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha

The Numinous Legacy Springer

This book presents a focused, case-oriented approach to a specific disease entity: tumors located within the spinal canal. Each tumor type constitutes its own chapter and additional chapters focus on more novel trends in the field, such as radiosurgery and minimally invasive surgical techniques. In each chapter, the authors provide expert opinions on preoperative goals, intraoperative techniques and decision-making, and postoperative paradigms, including surveillance guidelines and thresholds for initiating adjuvant therapy. The management of intradural tumors has become increasingly interdisciplinary, and one of the major goals of this text is to familiarize the treating neurosurgeon with the latest advances in both operative and non-operative strategies. The text seeks to answer two questions: 1) what are the detailed surgical steps taken by these

neurosurgeons to ensure safe maximal resection of these tumors? and 2) in cases of residual and recurrent disease, what are the most effective management options? Consensus regarding definitive management remains difficult to reach given the overall rarity of these tumors. Tumors of the Spinal Canal is ultimately a practical reference drawn from the experiences of its individual authors, a compendium of surgical pearls, pitfalls, and preferences, all steeped in the most recent and relevant literature on the subject.

Mr Tumble is funny and so are his friends! Join Aunt Polly, Grandad, Tumble and many more in this annual which is packed with silly stories, songs, puzzles, activities, character profiles and games! And while you're having fun there are some simple Makaton signs to try. It's perfect for all Mr Tumble fans.

Paul Kossoff: All Right Now Bibliotech Press

This book examines the energy dimension of the smart city from the perspective of urban planning, providing a complete overview that ranges from theoretical aspects to practical considerations and projects. In addition, it aims to illustrate how the concept of the smart city can enhance understanding of the urban system and foster new forms of management of the metropolis, including with respect to energy supply and use. Specifically, the book explores the different dimensions of the relationship between energy and the city, discusses methodological issues with a special focus on ontological approaches to sustainability, and describes practices, tools, and good examples of energy-related urban planning. The authors represent the main Italian research groups working in the field, Italy being an excellent example of a country exposed to energy problems due to, for example, vulnerability to climate change and lack of primary energy resources. This book will be valuable for students of urban planning, town planners, and researchers interested in understanding the changing nature of the city and the challenges posed by energy issues.

A little girl is introduced to racism on a visit to an aunt in 1950s Georgia. Beth Anne Crane of Illinois never heard bad things concerning blacks. She gets a lesson when a black man is murdered.

The Graysons Springer Nature

Edward Eggleston (December 10, 1837 - September 3, 1902) was an American historian and novelist. Eggleston was born in Vevay, Indiana, to Joseph Cary Eggleston and Mary Jane Craig. The author George Cary Eggleston was his brother. As a child, he was too ill to regularly attend school, so his education was primarily provided by his father. He was ordained as a Methodist minister in 1856. He wrote a number of tales, some of which, especially the "Hoosier" series, attracted much attention. Among these are The Hoosier Schoolmaster, The Hoosier Schoolboy, The End of the World, The Faith Doctor, and Queer Stories for Boys and Girls. Eggleston was elected a member of the American Antiquarian Society in 1893. His boyhood home at Vevay, known as the Edward and George Cary Eggleston House, was listed on the National Register of Historic Places in 1973. His summer home, Owl's Nest, in Lake George, New York, eventually became his year-round home. Eggleston died there in 1902, at the age of 64. Owl's Nest was declared a National Historic Landmark in 1971. His daughter, the writer, Elizabeth Eggleston Seelye, was married to Elwyn Seelye, the founder of the New York State Historical Association. (wikipedia.org)

to transform the rebound into recovery.

Something Special Springer Science & Business Media

This book is the first to treat the chemistry of superheavy elements, including important related nuclear aspects, as a self contained topic. It is written for those – students and novices -- who begin to work and those who are working in this fascinating and challenging field of the heaviest and superheavy elements, for their lecturers, their advisers and for the practicing scientists in the field – chemists and physicists - as the most complete source of reference about our today's knowledge of the chemistry of transactinides and superheavy elements. However, besides a number of very detailed discussions for the experts this book shall also provide interesting and easy to read material for teachers who are interested in this subject, for those chemists and physicists who are not experts in the field and for our interested fellow scientists in adjacent fields. Special emphasis is laid on an extensive coverage of the original literature in the reference part of each of the eight chapters to facilitate further and deeper studies of specific aspects. The index for each chapter should provide help to easily find a desired topic and to use this book as a convenient source to get fast access to a desired topic. Superheavy elements – chemical elements which are much heavier than those which we know of from our daily life – are a persistent dream in human minds and the kernel of science fiction literature for about a century.

Your name is Adrian? Or maybe your boyfriend husband friend dad brother son uncle grandfather or anyone else who is important to you is Adrian and you want to please him? We are convinced that it will make him happy! We cordially invite you to buy this high quality notebook / journal. Matte funny cover size 6x9 " and 120 white blank pages to write / draw. Also works well as: Christmas gift Birthday gift Graduation gift Sketchbook study book notebook for notes a notebook to record affirmations to save memories to create a list of tasks for saving songs and even for small children as a gift for their birth babyshower or just during the first visit of a baby Thank you that so many of you are satisfied with the purchase of this notebook! Let writing, drawing and painting give joy to you and your loved ones!

Ion Gauge Control

Affectionately known as 'Koss', Paul Kossoff's playing touched people. It still does today, more than forty years after his sad and untimely death at the age of twenty-five. This authorised biography pays fitting tribute to a much-loved and widely admired musician whose influence and inspiration is still very evident. It's all here: Kossoff's musical childhood, his formative years with Black Cat Bones, forming Free at seventeen, that group's dizzying success, breakup, reforming and dissolution, the solo years, Back Street Crawler - the sessions, the tours and big concerts, the triumphs, the tragedies and the heartbreak - J.P. James takes the reader right there. Over four distinct sections, Kossoff's many guitars and the equipment he used to make them sing are fully documented; a brand-new detailed analysis of Kossoff's distinctive playing style and technique is presented for the first time; a broad overview of Kossoff's creative life draws on the voices of family, friends and fellow musicians; and finally, Kossoff's musical influences, approach to playing and his wider

musical interests, hopes and dreams are explored - all drawn from his own words. Cramming so much into his short years, Paul Kossoff left a rich musical legacy, and he is indeed All Right Now. Thoroughly researched and sensitively written, given often in Kossoff's own words and packed with anecdotes from those who were there, musicians and fans alike will enjoy this authoritative and comprehensive biography.

The Chemistry of Superheavy Elements

This book constitutes the refereed proceedings of the 8th International Conference on Web Reasoning and Rule Systems, RR 2014, held in Athens, Greece in September 2014. The 9 full papers, 9 technical communications and 5 poster presentations presented together with 3 invited talks, 3 doctoral consortial papers were carefully reviewed and selected from 33 submissions. The conference covers a wide range of the following: semantic Web, rule and ontology languages, and related logics, reasoning, querying, searching and optimization, incompleteness, inconsistency and uncertainty, non-monotonic, common sense, and closed-world reasoning for the web, dynamic information, stream reasoning and complex event processing, decision making, planning, and intelligent agents, machine learning, knowledge extraction and information retrieval, data management, data integration and reasoning on the web of data, ontology-based data access, system descriptions, applications and experiences.

Black and Secret Midnight

The engineering as well as management of water resources are described in this book. Hydrology is a scientific field which deals with the processes governing the exhaustion and renewal of water resources of the earth's land areas. The aim of this book is to combine the latest advancements in hydrology and the engineering of water resources. It discusses surface water and groundwater modeling, and covers various topics related to the management of surface water and groundwater resources. Overcoming the impact of climate change on water resources is also presented in the book. Other topics discussed are the interpretation of field knowledge, advancement of models, the usage of computational models based upon analytical and numerical techniques, evaluation of model performance and their usage for predictive purposes. This book will be beneficial for students and professionals dealing with this field.

Emerging Stronger from the Crisis

There is a flourishing literature on citizenship education in China that is mostly unknown in the West. Liberal political theorists often assume that only in democracy should citizens be prepared for their future responsibilities, yet citizenship education in China has undergone a number of transformations as the political system has sought to cope with market reforms, globalization and pressures both externally and within the country for broader political reforms. Over the past decade, Chinese scholars have been struggling for official recognition of citizenship education as a key component of the school curriculum in these changing contexts. This book analyzes the citizenship education issues under discussion within China, and aims to provide a voice for its scholars at a time when China's international role is becoming increasingly important.
