 Larger than the state of Rhode Island and laced by a thousand miles of trails, the White Mountains have long been a hiker's paradise. Here is a first-person account of the world that begins where the pavement ends. Fishermen, backpackers, trail-bikers ... gofers, peak baggers, and through hikers ... you'll find them all in the White Mountains, and you'll meet them all in the pages of this compelling book.The year is 1975, when it was still possible to find space in a lean-to shelter, when the Old Man of the Mountains still showed his splendid profile over Franconia Notch, and when hikers still smoked.

 "At the ages of 25 and 21, Lucy and Susan Letcher set out to thru-

hike the entire 2,175 miles of the Appalachian Trail--barefoot. Quickly earning themselves the moniker of the Barefoot Sisters, the two begin their journey at Mount Katahdin and spend eight months making their way to Springer Mountain in Georgia. As they hike, they write about their adventures through the 100-mile Wilderness, the rocky terrain of Pennsylvania, and snowfall in the great Smoky Mountains. It's as close as one can get to hiking the Appalachian Trail without strapping on a pack"--Back cover.

 For many people, hiking 4,600 miles in one "go" may seem like a crazy-- even foolish idea. But for some others it is an opportunity to see isolated places, to discover oneself, and of course to have fun doing it! Such is the case with me. A few years ago I had never even heard of the North Country Trail. I had no idea that such a daunting task of building a continuous footpath across seven northern states was underway, and had been for more than thirty years. I was immediately excited and fascinated with the idea. After doing a little research and finding out what the trail was all about, I began to feel a sense of longing, a desire to hike beyond Minnesota and see what else the North Country had to

offer. This is my story of that journey, filled with first-hand accounts of the trials and triumphs faced during this 6-month adventure.

Unlike counterparts on other sections of the 2,180-plus-mile Appalachian Trail who could locate the pathway within national parks and forests, builders of the 270 miles of trail detailed in *Along the Appalachian Trail: West Virginia, Maryland, and Pennsylvania* did not have vast tracts of federal lands on which to construct the footpath. Yet they succeeded in creating a trail within many of the states' scenic areas. Hundreds of vintage photographs--provided by the Appalachian Trail Conservancy, National Park Service, state archives, and local trail-maintaining clubs--present an illustrated narrative of the Herculean work and dedication it took for volunteers to plan, build, and continue to maintain the trail in these states. Included are the glimpses of American history the trail passes by, the pathway's early (and later) supporters and hikers, and original locations that have been rerouted off of today's trail.
