Report, 1840-1908 TheBookEdition

For several years the concept of "virtual client" or "virtual customer" has been part of the world of

libraries and information services. This publication contains the proceedings of a satellite meeting

on this topic, organized by the Management and Marketing Section of IFLA and held in Sao Paulo,

Brazil in August 2004. It contains papers from more general points of views such as the

democratization of access to digital information to more specific questions such as virtual libraries

and new services, not forgetting user and librarian education, web site design, more specialized

information, etc. The readers of these proceedings will find along these pages a very stimulating

content which will guide them towards better services for virtual clients. Papers are presented in

the original language of their presentation (Portuguese, French, Spanish and English) with

summaries in these four languages.
