An increasing number of scholars have begun to see science and technology as relevant issues in International Relations (IR), acknowledging the impact of material elements, technical instruments, and scientific practices on international security, statehood, and global governance. This two-volume collection brings the debate about science and technology to the center of International Relations. It shows how integrating science and technology translates into novel analytical frameworks, conceptual approaches and empirical puzzles, and thereby offers a state-of-the-art review of various methodological and

theoretical ways in which sciences and technologies matter for the study of international affairs and world politics. The authors not only offer a set of practical examples of research frameworks for experts and students alike, but also propose a conceptual space for interdisciplinary learning in order to improve our understanding of the global politics of science and technology. The second volume raises a plethora of issue areas, actors, and cases under the umbrella notion techno-politics. Distinguishing between interactional and co-productive perspectives, it outlines a toolbox of analytical frameworks that transcend technological determinism and social constructivism.

"A mind-bending jaunt ... that makes clear in fascinating detail how math is more than a sum of its parts" (Publishers Weekly)

“Let no one ignorant of geometry enter here,” Plato warned would-be philosophers. Mathematician Karl Sigmund agrees. In *The Waltz of Reason*, he shows how mathematics and philosophy together have shaped our understanding of space, chance, logic, cooperation, voting, and the social contract. Sigmund shows how game theory is integral to moral philosophy, how statistics shaped the meaning of reason, and how the search for a logical basis for math leads to deep questions about the nature of truth itself. But this is no dry tome: Sigmund’s wit and humor shine as brightly as his erudition. *The Waltz of Reason* is an engrossing history of ideas as vibrant as a ballroom full of dancers, one that empowers as it entertains, following the complex and occasionally dizzying steps of the thinkers who have molded our thought and founded our world.

The Waltz of Reason McGill-Queen's Press - MQUP

Waltzing with the Dragons is the true story of a Vietnamese woman and her Eurasian daughter. Born in 1922 in the north of Vietnam, under French colonial rule, Ly was the daughter of one of the last Mandarins, a childhood friend of Ho Chi Minh. After she rebelled against her family, by refusing an arranged marriage at thirteen, she was sent to live with her father's best friends, a French couple. It was the beginning of a life-long love affair with French culture and lifestyle. At seventeen, she married a French army officer who, shortly thereafter, was killed in action. She lived through the Japanese occupation during World War II, escaped her captors and after many adventures, found her way south. From having lost everything, in Cholon (the Chinese quarter of Saigon), she established herself as a successful business-woman under the protection of the gangland bosses who dominated the city in the late forties. It was during this time that she met the love of her life, a doctor in the French army. From this passionate affair, she became pregnant with her only child: Mai-Tâm, her daughter. Her lover having returned to France, she gave birth alone amid the dawning realization that he was not going to come back. Born in Saigon in 1952, Mai-Tâm grew up in the twilight of the French Colonial era, which ended in 1954 with the defeat at Dien Bien Phu by the forces of Ho Chi Minh. A child of mixed race, she did not feel she belonged anywhere, and it was only within her Vietnamese family that she

felt loved and protected. During her childhood, she was victim of the increasingly aggressive Vietnam War as well as the disruptive and unhappy relationship of her mother with her second French husband. Her parents sent her to the safety of France in July 1967, where they joined her one year later, after the Têt offensive in 1968. Ly who became Anna and Mai-Tâm who became Juliette demonstrate how strength of character and determination can overcome all adversities.

Our colonization ship crashed, stranding us on a strange new world. To make matters worse, my best friend disappeared while scouting the area near our crash site. In my search to find her, I'm stolen by a dragon—a creature straight out of every fairy tale book I'd ever read as a child. He takes me back to his kingdom and I'm shocked when he shifts into a man—a fierce Drakarian warrior. He claims that I am his fated one—his Linaya. Despite my protests, he refuses to let me go—and I cannot deny that I'm drawn to him in ways I do not understand. The more time we spend together, I begin to wonder: what would it be like to be fated to a dragon?

In a land not so far away, and closer than one may think lives familiar friends, in familiar places, yet in a world so different from our own. It's a land where an average garden gnome may live a not so average life; where he may learn that tending gardens is by far NOT his greatest responsibility. Charlie, a 15" garden gnome takes his responsibilities very seriously, so seriously, that it leads him on an adventure of a lifetime. This is a story of good versus evil, where good may not always prevail; a story filled with

mystical creatures, living hand-in-hand with dwarves, elves, and warlocks. And, of course, no magical tale would be complete without a dragon or two, as well. This is a story of heart, a story of wonder, and a story you'll want to pass on to generations to come.

Reading selected texts by Michael Ondaatje, including the novels *In the Skin of a Lion* and *The English Patient* and the poem "Birch Bark," Annick Hillger demonstrates how his writing both answers and challenges attempts to delineate the idea of a Canadian national self. She sets Ondaatje's work within the context of theoretical and philosophical ideas, developing the notion of a "literature of silence" concerned with finding a ground for self beyond the realm of language.
