The vision of one man, Captain Sherman "Red" Crise formed the basis for what was to become the Bahamas Speed Weeks, a series of motor races held on the island of New Providence in the Bahamas. They started in the mid 1950s and continued for 13 years, before ending due to a mix of political decisions, ill fortune and a shift in the direction motor racing had taken over that period of time. These years were described by many commentators as the golden age of motor racing, where internationally acclaimed drivers attended the Speed Weeks to mix with the many amateur racers from America who came to enjoy the scenario of sun, parties and racing. For many drivers the social scene was as important as the

racing, and in latter years prize money was an extra incentive to turn up. This well researched account tracks the history of the Speed Weeks with its roller-coaster ride throughout its 13 years existence, and includes stunning photos, complete statistics, and more. With a foreword by Denise McCluggage.

At the time, little was recorded about the activities of Alfa Romeo's World Championshipwinning Sports Racing car, the Tipo 33. The model had a long career, as a factory car as well as in private hands from 1967 until 1977. Great Italian motorsport engineer Carlo

Chiti designed and ran a prolific number of different models of the Tipo.

Unfortunately, nothing of the history of these developments was documented at the time, but the author has managed, after intense investigation and numerous personal interviews, to uncover much about this marvelous sports prototype.

A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and

later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.
