Shake Up Your Home
Decor Houseplants are
more popular than ever
before—especially with

millennials, who are
setting up their homes for
the first time and
discovering that nothing
can add energy, style,
and that essential “lived-
in-ness” to their spaces
better than a little bit of
green. Whether it’s a
statement-making fiddle-
leaf fig or a tiny tabletop
succulent, a houseplant
instantly elevates the look
of your home. But where
to begin? In *Decorating*

with Plants, Baylor
Chapman walks readers
through everything they
need to know to bring
houseplants into their
home. First, there’s *Plant
Care 101*: from how to
assess light conditions to
tricks for keeping your
plants alive while on
vacation, Chapman gives
readers the simple,
foundational info they
need to ensure their
plants will thrive. Then

she introduces us to 28 of her favorites—specimens that are tough as nails but oh-so-stylish, from the eye-catching Rubber Tree to the delicate Cape Primrose. Finally, she guides readers through the home room by room: Place an aromatic plant like jasmine or gardenia to your entry to establish your home’s “signature scent.” Add a proper sense of scale to your living room with a ceiling-grazing palm. Create a living centerpiece of jewel-toned succulents for a dining table

arrangement that will last long after your dinner party. From air purification to pest control, there’s no limit to what houseplants can do for your home—and *Decorating with Plants* is here to show you how to add them to spaces big and small with style. *Remodelista: The Organized Home* Artisan Books 'Designer Matt Keightley's first book is a thing of beauty and a valuable source of design inspiration - a stylish guide to a stylish garden.'

- Gardens Illustrated Do you want your outdoor space to look as stylish and as well designed as your home? RHS Design Outdoors will give you the ideas and know-how you need to make that happen. Award-winning designer Matt Keightley has curated a collection of 35 gardens, created either by him or by other leading contemporary designers, that will provide the inspiration to transform your outdoor space. *Gardeners* features include award-winning designers Jo Thompson,

Tom Stuart Smith, Tony Woods, Charlotte Rowe and Andrew Wilson. For each case study there is a detailed plan, information on the plants and materials used and a wealth of gorgeous photography by leading garden photographer Marianne Majerus. The designs are organized into five categories: Showstoppers at Home - high-design concepts that are nonetheless achievable; Family-friendly - gardens that incorporate play areas and socialising; Minimalist

- spaces with larger areas of hard landscaping and bold, restrained planting; Plants First - gardens where more than half of the outdoor space is planted; and Other Spaces - roof terraces, basement areas and front gardens. This wide array of garden styles means that there is inspiration for all types of garden, and for all types of gardener.

“With lush photographs and spare prose” a Brooklyn blogger shares

recipes and “records her life as a gardener, a cook and an urban forager.” (The New York Times) Marie Viljoen's beautiful first book draws the reader into a world of unfolding seasons, seen from the perspective of an expert gardener, cook and photographer. Each chapter is a month, divided into three parts: New York City, the author's garden, and her kitchen, each setting the stage for a lavish seasonal menu with recipes drawn from farmers markets, wild-foraged ingredients,

and produce grown on her city terrace and roof farm. Named for the size of her tiny Brooklyn terrace, and the blog it inspired, Viljoen's book is a unique perspective of the concrete jungle, where the month is known by the flowers in bloom, the vegetable in season, and the migrating birds crossing a Brooklyn sky. Set against a backdrop of growing up in South Africa and moving to the United States, meeting her French husband, and finding a culinary and emotional home in

Brooklyn, Viljoen's book is a love letter to living seasonally in the most famous city on the planet. "If you don't think of this city as a living ecosystem, Marie Viljoen will change your perspective forever." —Edible Brooklyn
 "Offer[s] visions of growing, cooking and sharing fresh food as central to living a good life." —Seattle Times

In a time of climate change and mass extinction, how we garden matters more than ever: “An outstanding and deeply passionate book.” —Marc Bekoff, author of *The Emotional Lives of Animals* Plenty of books tell home gardeners and professional landscape

designers how to garden sustainably, what plants to use, and what resources to explore. Yet few examine why our urban wildlife gardens matter so much—not just for ourselves, but for the larger human and animal communities. Our landscapes push aside wildlife and in turn diminish our genetically programmed love for wildness. How can we get ourselves back into balance through gardens, to speak life's language and learn from other species? Benjamin Vogt

addresses why we need a new garden ethic, and why we urgently need wildness in our daily lives—lives sequestered in buildings surrounded by monocultures of lawn and concrete that significantly harm our physical and mental health. He examines the psychological issues around climate change and mass extinction as a way to understand how we are short-circuiting our response to global crises, especially by not growing native plants in our gardens. Simply put,

environmentalism is not political; it's social justice for all species marginalized today and for those facing extinction tomorrow. By thinking deeply and honestly about our built landscapes, we can create a compassionate activism that connects us more profoundly to nature and to one another.

Remodelista.com is the go-to, undisputed authority for home design enthusiasts, remodelers, architects, and designers.

Remodelista decodes the secrets to achieving this aesthetic, with in-depth tours and lessons from 12 enviable homes; a recipe-like

breakdown of the hardest-working kitchens and baths; dozens of do-it-yourself projects; “The Remodelista 100,” a guide to the best everyday household objects; and an in-depth look at the ins and outs of the remodeling process. In a world of design confusion, Remodelista takes the guesswork out of the process. [*The Herbal Apothecary*](#) Timber Press

Creative Garden

Design: Patterns Ryland Peters & Small

The Netherlands is steeped in horticultural history and its gardens have long been a place for innovation and progressive thinking, exemplified by iconic figures such as the landscape architect Mien

Ruys and naturalistic plant pioneer Piet Oudolf. In this book, Noel Kingsbury explores how the particularities of landscape, history and culture in the Netherlands have given rise to distinctive gardens and demonstrates how a new generation of Dutch designers are reimagining outdoor space in such a revolutionary way. At the heart of the story is a people intimately engaged with their surroundings, as proud of the feats of engineering used to reclaim their land

from the sea as they are passionate about nature and biodiversity. This creative tension is played out in their parks and gardens: a clean, pared-back aesthetic contrasts with billowing planting; water is managed and made accessible with boardwalks; and meandering paths lead to inviting outbuildings for work and relaxation. These inspiring examples of sustainable, modern, liveable outdoor spaces will appeal to forward-looking garden makers wherever they live.

"If the world of gardening has rock stars, Piet Oudolf qualifies as Mick Jagger, David Bowie, and Prince rolled into one."

—Gardenista The original

publication of *Planting the Natural Garden* ushered in a revolution in landscape design: the New Perennial Movement. Spearheaded by internationally renowned designer Piet Oudolf, and incisively articulated by the late plantsman and designer Henk Gerritsen, it transformed private and public spaces with its emotionally resonant, naturalistic use of hardy perennials and grasses. Now this classic has been expanded and updated to include scores of new plants and combinations.

Packed with practical information and visual inspiration, *Planting the Natural Garden* zeroes in on the New Perennial Movement's power to move us, making its distinctive plant palette available to all. For enthusiasts of these vibrant landscapes, it is an essential text; for gardeners who love the dreamy moods and colors that Oudolf and Gerritsen celebrate, it's the key to a magic kingdom of garden beauty.
