Three
thousand
people have

climbed
Everest; four
hundred and
fifty have
traveled into
space. Only
two hundred
fifty have
sailed round
the world
alone. The
youngest of
these was a

teenager.
When he set
out on his
attempt, Mike
Perham was
just sixteen
years old. At
first, his
mother was
against the
whole thing.
The experts
said it could

be suicidal. The head of Britain's venerable Royal Yachting Association told him not to go. Mike Perham persevered, and in August 2009, at the age of just 17 years, 5 months, and 11 days, became the youngest person to have sailed solo around the world. Sailing the Dream tells the story of that amazing voyage, a nine-month odyssey full of technical and navigational

challenges that would stump sailors twice Mike's age. His yacht was knocked over, battered by waves, and repeatedly damaged, but Mike battled on, at times surfing down 50-foot waves in 50-knot winds at speeds of up to 28 knots. Despite these conditions, and suffering from sleep deprivation and extreme physical exhaustion, Mike maintained a positive attitude. His cheerful resilience

continually shines through as he describes his adventures and also talks about the team behind his trips, both when sailing round the world and in his earlier journey across the Atlantic at the age of fourteen, and the stresses and sacrifices involved for his family and friends. Mike's achievement is placed in even sharper relief by another young sailor's more recent, failed attempt at solo circumnavigati

on that nearly ended in tragedy. Sailing the Dream is an inspirational as well as thrilling story, and one for all ages.

To Sail Beyond the Sunset

United States Sailing Assn Completely revised and updated to address changes in technology, this new edition is the definitive guide to the art and science of sailing. Since the publication of the widely hailed first

edition in 1983, The Annapolis Book of Seamanship has set the standard by which other books on sailing are measured. Used throughout America as a textbook in sailing schools and Power Squadrons, The Annapolis Book of Seamanship thoroughly and clearly covers the fundamental and advanced skills of modern sailing. This edition of Annapolis is a major

overhaul. Over half the book has been revised; old topics and features have been updated, and many new ones have been introduced. The design has been modernized, and many color illustrations have been added. As big and detailed as Annapolis is, the wealth of technical information (including dozens of step-by-step instructions) is presented here in a way that is uniquely

readable; it's both useful and easy to use. This is because John Rousmaniere and artist Mark Smith bring to Annapolis decades of experience both as sailors and as professional communicators. Annapolis emphasizes the standard skills and proven methods that eliminate error and confusion, ensure security in emergencies, and allow every sailor more time for enjoyment on

the water. Much has changed on the water since 1983 when this book was originally published. Black buoys are now green, the Global Positioning Satellite navigation system (GPS) is almost universally used, new types of anchors and sails have appeared, safety skills and gear are vastly improved, many more women are commanding boats, and

catamarans and trimarans are common where only monohulls used to sail. But for all these modern developments, the basic skills and spirit of sailing have not changed at all. Sail trimming, keeping up steerageway, maintaining the dead reckoning plot, heaving-to -- these fundamentals are as important now as ever and receive much attention here. Among the innovations in this edition

are: * Basic skills in early chapters: Fundamental sailing and boat-handling skills and gear, which are introduced in chapters 1, 2, and 3. * "Hands On" segments: Three dozen special sections, each devoted to a particular seamanship problem and an expert solution. * More how-to tips: Additional rules of thumb that guide a crew quickly and successfully through seamanship

problems. * New coverage of multihulls: Advice on evaluating, anchoring, and handling catamarans and trimarans under sail (including in storms). * More on emergencies: New material on emergencies, safety, and heavy-weather sailing, including a section on preparing a docked boat for a hurricane. * Equipment updates: Expanded coverage of the use and

care of modern gear and hardware, including radar, GPS, rescue devices, and asymmetrical spinnakers. * Terminology: Full definition and illustration of major terms when they're first introduced, with alternative language provided in parentheses. * Gender: The use of feminine personal pronouns, which reflect the fact that more women are captaining and sailing

boats than ever before. From navigation and seamanship to boat and gear maintenance, from pleasure cruising to heavy-weather sailing, here is the definitive, state-of-the-art guide that provides systematic step-by-step techniques to see you through every situation on deck and in the cockpit. Thoughts, Tips, Techniques & Tactics Simon and Schuster Interested in learning to sail

but feel like you're navigating in murky waters? Sailing for Dummies, Second Edition introduces the basics of sailing, looks at the different types of sailboats and their basic parts, and teaches you everything you need to know before you leave the dock. In Sailing for Dummies, Second Edition, two U.S. sailing champions show you how to: Find and choose a sailing school

Use life jackets correctly Tie ten nautical knots Handle sailing emergencies (such as capsizing and rescuing a man overboard) Launch your boat from a trailer, ramp, or beach Get your boat from point A to point B (and back again) Predict and respond to water and wind conditions Read charts, plot your course, use a compass, and find your position at sea Sailing for

Dummies shows you that getting out on the water is easier than you think. The authors keep the sailor-speak to a minimum where possible, but give you a grasp of the terminology you need to safely and effectively communicate with your crew. A textbook, user's manual, and reference all in one, this book takes the intimidation out of sailing and gives you the skills and confidence

you need to get your feet wet and become the sailing pro you've always wanted to be. Anchors away! **Great Circle Sailing made easy; or the method of calculating with accuracy and ease the several parts required for the practice and sailing approximately to a great circle** Rowman & Littlefield
Once you have spent time under sail, you will notice that people on sailboats tend

to wave at each other. For many, sailing is a passion to be enjoyed for a lifetime. But sailing is challenging. And, in fact, at times can be dangerous. Therefore, safety at sea is a paramount importance. To maximise your enjoyment on the water, you must have confidence in yourself, your boat, equipment and crew. Basic Keelboat, help you learn to sail with all the skills

required for safety at sea. For newcomers, careful study and practice is essential. When you're prepared, life under the sail is more enjoyable. The Catamaran Book Read Books Ltd Whether humans crossed the seas between the Old World and the New in the times before Columbus is a tantalizing question that has long excited scholarly interest and tempted

imaginations the world over. From the myths of Atlantis and Mu to the more credible, perhaps, but hardly less romantic tales of Viking ships and Buddhist missionaries, people have speculated upon what is, after all, not simply a question of contact, but of the nature and growth of civilization itself. To the specialist, it is an important question indeed. If people in the Western Hemisphere and in the

Eastern Hemisphere developed their cultures more or less independently from the end of the last Ice Age until the voyages of Columbus, the remarkable similarities between New World and Old World cultures reveal something important about the evolution of culture. If, on the other hand, there were widespread or sustained contacts between the hemispheres in pre-Columbian

times, these contacts represent events of vast significance to the prehistory and history of humanity. Originally delivered at a symposium held in May 1968, during the national meeting of the Society for American Archaeology, the papers presented here, by scholars eminent in the field, offer differing points of view and considerable evidence on the pros and cons of pre-Columbian

contact between the Old World and the New. Various kinds of data—archaeological, botanical, geographical, and historical—are brought to bear on the problem, with provocative and original results. Introductory and concluding remarks by the editors pull together and evaluate the evidence and suggest ground rules for future studies of this sort. Man across the Sea

provides no final answers as to whether people from Asia, Africa, or Europe visited the American Indian before Columbus. It does, however, present new evidence, suggested lines of approach, and a fresh attempt to delineate the problems involved and to establish acceptable canons of evidence for the future. *Mirror Sailing from Start to Finish* Skyhorse Publishing Inc. "I know you'll

want to read more after you finish Sailing a Serious Ocean. And be warned, you'll very likely want to sail with John, perhaps across an ocean." -- DALLAS MURPHY, AUTHOR OF ROUNDING THE HORN After sailing 300,000 miles and weathering dozens of storms in all the world's oceans, John Kretschmer has plenty of stories and advice to share. John's offshore

training passages sell out a year in advance and his entertaining presentations are popular at boat shows and yacht clubs all over the English speaking world. John's talent for storytelling enchants his audience as it soaks up the lessons he learned during his oftenchallenging voyages. Now you can take a seat next to John-- at a lesser cost--and get the knowledge you need to fulfill your own

dream of blue-water adventure. In Sailing a Serious Ocean, John tells you what to expect when sailing the oceans and shows how to sail safely across them. His tales of storm encounters and other examples of extreme seamanship will help you prepare for your journey and give you confidence to handle any situation—even heavy weather. Through his personal stories, John

will guide you through the whole process of choosing the right boat, outfitting with the right gear, planning your route, navigating the ocean, and understanding the nuances of life at sea. Our oceans are beautiful yet unpredictable—water that is at one moment a natural mirror for the glowing sun can turn into a foamy, raging wall of fury. John knows our oceans, and he is one of the best teachers of taming and

enjoying them. Before you set off across the big blue, turn to John for his inspirational stories and hard-learned advice and discover the serious sailor in you.

The Mirror dinghy was a significant

factor in the boom of dinghy sailing in the 1960s, introducing thousands to the delights of sailing. While sailing has come a long way since then and there have been a lot of far more exotic craft launched, the Mirror remains a fantastic boat in which to learn to sail and to compete at the highest levels. With this second edition, The Mirror Book has been bought into the Start to Finish series

format alongside such revered books as The Laser Book, The Topper Book, The Catamaran Book and The Foiling Dinghy Book. Like these titles, this book tells you everything you need to know about sailing the boat (whether it be the original gaff-rigged boat or has the newer Bermuda rig). Written for those starting out through to those striving to win a championship, the book is packed with

practical advice and illustrated with step-by-step photographs. It covers: setting up the Mirror and early sailing experiences; developing skills on all points of sailing and with the spinnaker; racing & masterclasses to become a championship winner. Over 180 photographs show you exactly how it's done, and 72 diagrams illustrate key boat parts, the different points of

sailing and complex on-the-water scenarios with clarity. It is written by Peter Aitken, formerly the UK National Mirror Coach, who has coached teams to win world championships in the Mirror, Cadet and 420 classes, and Tim Davison, a successful racer and author of countless books on sailing. The UK Mirror Class Association have contributed to this update and it is endorsed by

Dave Wade, double Mirror National Champion, who says: "Armed with this book, your understanding of Mirror sailing techniques will grow, and your results will improve. I thoroughly recommend it."
