'That which puzzled and fascinated me whenever I met Lasgush was this sensation of the impossible. It was impossible to get on with him as you did with others. The moment you were at him, or rather, the moment you knocked at his door, suddenly all became another thing. There was another logic, another code, other words, wrapped up in another meaning. .when you went to Lasgush's, it was more than going abroad. You believed you dropped somewhere beyond our time, beyond the everyday way of looking at things. One more step and it looked as if you would cross the borders of life and would find yourself in Dante's nothingness. .He was unpredictable, corrosive like acid, creepy, startling. His laugh was like as if beyond our life, mirthless, and his sadness had no grief. As for his anger, it was such as well, luxurious, cold, whereas his contempt was radiating from afar, as if adorned with silver.' (Kadare, In My Studio. pp 207, 208, 209. My translation) -All this Saussurean lava of meaning has its own matchless 'crater' from where it erupts and reaches us time and again, endlessly. Lasgush's Word has its own individual suspension, chiselled by the hand of a true master. It is breathlessly succinct and, in all probability, on a par with the best ever created. Lasgush says that his Word is: 'Mystery that burns in a thread of lightning.' (My Fiery Tongue)

 Contemporary economists, when analyzing economic behavior of people, need to use the diversity of research methods and modern ways of discovering knowledge. The increasing popularity of using economic experiments requires the use of IT tools and quantitative methods that facilitate the analysis of the research material obtained as a result of the experiments and the formulation of correct conclusions. This proceedings volume presents problems in contemporary economics and provides innovative solutions using a range of quantitative and experimental tools. Featuring selected contributions presented at the 2018 Computational Methods in Experimental Economics Conference (CMEE 2018), this book provides a modern economic perspective on such important issues as: sustainable development, consumption, production, national wealth, the silver economy, behavioral finance, economic and non-economic factors determining the behavior of household members, consumer preferences, social campaigns, and neuromarketing. International case studies are also offered.

In the early fifteenth century, as winter falls away, the people of Albania know that their fate is

sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow - of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in balance, from the Pasha himself to the technicians, artillerymen, astrologer, blind poet and harem of women that accompany him. Brilliantly vivid, as insightful as it is compelling, The Siege is an unforgettable account of the clash of two great civilisations. As a portrait of war, it resonates across the centuries and confirms Ismail Kadare as one of our most significant writers.

"This book deals with the financial side of international economics and covers all aspects of international finance. There are many books and articles by exponents of alternative points of view. I know of no other book that provides the scope, balance, objectivity and rigor of the book." (Professor Jerome L. Unwritten rules of Wall Street—what works, what doesn't, and how investors can tell the difference. Investing is governed by unofficial rules, passed to investors through brokers, the financial press, and even fellow investors. For more than a decade, in two previous editions, *Stock Market Rules* has helped investors separate the most valuable of these maxims from the meaningless and even potentially harmful. But with recent market turbulence and scandals blindsiding millions of investors, the time has come for a new, updated edition. *Stock Market Rules, Third Edition*, is that book, an in-depth, up-to-date examination of the 50 axioms that will most help investors gain the edge in today's technologically supercharged markets.

From the host of NPR's Planet Money, the deeply-investigated story of how one visionary, dogged investor changed American finance forever. Before Bill Gross was known among investors as the Bond King, he was a gambler. In 1966, a fresh college grad, he went to Vegas armed with his net worth (\$200) and a knack for counting cards. \$10,000 and countless casino bans later, he was

hooked: so he enrolled in business school. The Bond King is the story of how that whiz kid made American finance his casino. Over the course of decades, Bill Gross turned the sleepy bond market into a destabilized game of high risk, high reward; founded Pimco, one of today's most powerful, secretive, and cutthroat investment firms; helped to reshape our financial system in the aftermath of the Great Recession—to his own advantage; and gained legions of admirers, and enemies, along the way. Like every American antihero, his ambition would also be his undoing. To understand the winners and losers of today's money game, journalist Mary Childs argues, is to understand the bond market—and to understand the bond market is to understand the Bond King.

This paper reviews the World Bank's experience with community participation (CP) in a sample of its projects selected from three different sectors; urban housing, population, health and nutrition (PHN), and irrigation. The sample was chosen on a judgmental basis and consisted of forty projects which were known to have the potential for the use of CP or incorporated it in their strategies, and ten successful projects from the same sectors which did not make use of CP. The focus of the paper is on the approaches to participation employed by the first set of projects and the lessons to be learned from their experience. An analysis of the second set of projects sheds light on the reasons why community participation was neglected by them.

While US-centred bilateralism and ASEAN-led multilateralism have largely dominated the post-Cold War regional security architecture in the Indo-Pacific, increasing doubts about their effectiveness have resulted in countries turning to alternative forms of cooperation, such as minilateral arrangements. Compared to multilateral groupings, minilateral platforms are smaller in size, as well as more exclusive, flexible and functional. Both China and the US have contributed to minilateral initiatives in the Indo-Pacific. In the case of the former, there is the Lancang-Mekong Cooperation mechanism—involving China, Cambodia, Laos, Myanmar, Thailand and Vietnam—established in 2015. In the case of the latter, there has been a revival of the Quadrilateral Security Dialogue in 2017—involving the US, Australia, Japan and India. This book examines the rise of these arrangements, their challenges and opportunities, as well as their impact on the extant regional security architecture, including on the ASEAN-led multilateral order. A valuable guide for students and policy-makers looking to understand the nature and development of minilateralism in the Indo-Pacific region.
