Givon's new book re-casts pragmatics, and most conspicuously the pragmatics of sociality and communication, in neuro-cognitive, bio-adaptive, evolutionary terms. The fact that context, the core notion of pragmatics, is a framing operation undertaken on the fly through judgements of relevance, has been well known since Aristotle, Kant and Peirce. But the context that is relevant to the pragmatics of sociality and communication is a highly specific mental operation — the mental modeling of the interlocutor's current, rapidly shifting belief-and-intention states. The construed context of social interaction and communication is thus a mental representation of other minds. Following a condensed intellectual history of pragmatics, the book investigates the adaptive pragmatics of lexical-semantic categories — the 1st-

order framing of "reality", what cognitive psychologists call "semantic memory". Utilizing the network model, the book then takes a fresh look at the adaptive underpinnings of metaphoric meaning. The core chapters of the book outline the re-interpretation of "communicative context" as the systematic, on-line construction of mental models of the interlocutor's current, rapidly-shifting states of belief and intention. This grand theme is elaborated through examples from the grammar of referential coherence, verbal modalities and clause-chaining. In its final chapters, the book pushes pragmatics beyond its traditional bounds, surveying its interdisciplinary implications for philosophy of science, theory of personality, personality disorders and the calculus of social interaction.

Capture the surfing world through the lens of photographer Jim Russi. Over 180 warm,

dazzling photos from around the globe take readers on this surfing tour de force through Hawaii, Tahiti, California, Puerto Rico, Mexico, Fiji, Bali, Indonesia, and the islands off South Africa. The engaging text provides stories from the photographer's global travels, adding an additional dimension to the brilliant photos and fascinating encounters with celebrities in the surfing world and other realms. Learn how Jim discovered a theme that would direct his work from that point forward during a shoot in 1997: "the simple fun of surfing-showing a lifestyle that anyone could relate to, not simply appealing to hard-core surfers and dreamers alike." Give yourself a chance to dream. You will be glad you did.

Archaeological investigations, undertaken as part of a programme to restore St George's Church, Bloomsbury, to its original Hawksmoor splendour, involved the removal of 871 triple lead-lined coffins from within the crypt and monitoring works within the churchyard. The elaborate named coffins of upper middle class parishioners provided a valuable opportunity to greatly develop the new field of post-medieval coffin analysis, and to integrate historical, archaeological and osteological data in order to build a vivid picture of this population. Over 90% of coffins were named, which allowed a rare opportunity to blind test osteological methods on 72 skeletons, whilst analysis of documentary and osteological evidence has challenged some long-held beliefs in post-medieval burial archaeology. Disease patterns in the St George's assemblage were influenced by the longevity and affluence of this population, factors that also underlay the necessity for elaborate and expensive dental treatment, including very early examples of fillings, filing and dentures.
