Gorillas using iPads, lemurs finger painting, squirrel monkeys popping bubbles . . . these primates are pretty smart! Could you make the grade in Primate School? Learn how diverse the primate family is, and some of the ways humans are teaching new skills to their primate cousins. Author Jennifer Keats Curtis is once again working with organizations across the country to share fun facts about primates through this photo journal.

Virtual Art MITP-Verlags GmbH & Co. KG
In the history of electronic communication, the last quarter of the nineteenth century holds a special place, for it was during this period that the telephone, phonograph, electric light, wireless, and cinema were all invented. In *When old Technologies Were New*, Carolyn Marvin explores how two of these new inventions--the telephone and the electric light--were publicly envisioned at the end of the nineteenth century, as seen in specialized engineering journals and popular media. Marvin pays particular attention to the telephone, describing how it disrupted established social relations, unsettling customary ways of dividing the private person and family from the more public setting of the community. On the lighter side, she describes how people spoke louder when calling long distance, and how they worried about catching contagious diseases over the phone. A particularly powerful chapter deals with telephonic precursors of radio broadcasting--the "Telephone Herald" in

New York and the "Telefon Hirmondo" of Hungary--and the conflict between the technological development of broadcasting and the attempt to impose a homogenous, ethnocentric variant of Anglo-Saxon culture on the public. While focusing on the way professionals in the electronics field tried to control the new media, Marvin also illuminates the broader social impact, presenting a wide-ranging, informative, and entertaining account of the early years of electronic media.

The two-volume set LNCS 8547 and 8548 constitutes the refereed proceedings of the 14th International Conference on Computers Helping People with Special Needs, ICCHP 2014, held in Paris, France, in July 2014. The 132 revised full papers and 55 short papers presented were carefully reviewed and selected from 362 submissions. The papers included in the first volume are organized in the following topical sections: accessible media; digital content and media accessibility; 25 years of the Web: weaving accessibility; towards e-inclusion for people with intellectual disabilities; the impact of PDF/UA on accessible PDF; accessibility of non-verbal communication; emotions for accessibility (E4A), games and entertainment software; accessibility and therapy; implementation and take-up of e-accessibility; accessibility and usability of mobile platforms for people with disabilities and elderly persons; portable and mobile platforms for people with disabilities and elderly persons; people with cognitive disabilities: At, ICT and AAC; autism: ICT and AT; access to mathematics, science and music and blind and visually impaired people: AT, HCI and accessibility.

The Open Access version of this book, available at <http://www.taylorfrancis.com/books/e/9781003036159>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. This book examines a variety of subjective spatial experiences and knowledge production practices in order to shed new light on the specifics of contemporary socio-spatial change, driven as it is by inter alia, digitalization, transnationalization, and migration. Considering the ways in which emerging spatial phenomena are conditioned by an increasing interconnectedness, this book asks how spaces are changing as a result of mediatization, increased mobility, globalization, and social dislocation. With attention to questions surrounding the negotiation and (visual) communication of space, it explores the arrangements, spatialities, and materialities that underpin the processes of spatial refiguration by which these changes come about. Bringing together the work of leading scholars from across diverse range disciplines to address questions of socio-spatial transformation, this volume will appeal to sociologists and geographers, as well as scholars and practitioners of urban planning and architecture.

The Social Question in the Twenty-First Century Windows Vista

Home Ausführliche Anleitungen anhand zahlreicher Beispiele sowie viele Tipps und Tricks für den optimalen Umgang mit Windows Vista, insbesondere für den Heimanwender. Windows Vista Home However, unlike conventional legal theory, this volume seeks to provide an answer in terms of a general social theory: a methodology that answers this

question in a manner applicable not only to law, but also to all the other complex and highly differentiated systems within modern society, such as politics, the economy, religion, the media, and education. This truly sociological approach offers profound insights into the relationships between law and all of these other social systems.

MCSE für Windows Server 2003 Pearson Deutschland GmbH

"The book that Microsoft should have written, but didn't." --Jeremy Allison, Samba Team "Your detailed explanations are clear and backed-up with source code--and the numerous bits of humor make a dry subject very enjoyable to read." --J.D. Lindemann, network engineer, Adaptec, Inc. The first developer's guide to Microsoft(R)'s Internet/Intranet file sharing standard For years, developers and administrators have struggled to understand CIFS, Microsoft's poorly documented standard for Internet file sharing. Finally, there is an authoritative, cross-platform guide to CIFS capabilities and behavior. Implementing CIFS not only delivers the priceless knowledge of a Samba Team member dedicated to investigating the inner workings of CIFS, it also identifies and describes crucial specifications and supporting documents. Provides essential information for designing and debugging large Windows(R) and/or Samba networks Offers clear, in-depth introductions to Server Message Block (SMB), NetBIOS over TCP/IP (NBT), browser services, and authentication Drills down into the internals of CIFS, exposing its behavior on the wire and at the desktop--and its strange quirks Presents illustrative code examples throughout Reflects years of work reviewing obscure documentation, packet traces, and sourcecode Includes

the SNIA CIFS Technical Reference Implementing CIFS will be indispensable to every developer who wants to provide CIFS compatibility--and every administrator or security specialist who needs an in-depth understanding of how it really works.

Computers Helping People with Special Needs Pearson Deutschland GmbH

Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of the explicit endeavor to "Europeanize" the world. From the decline of the Roman Empire to the polycentrism of today's world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from "mare nostrum" to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.

General Ecology Pearson Deutschland GmbH

Visual Basic 2008 ist eine Programmiersprache, die von der Microsoft .NET-Umgebung unterstützt wird. Die Autoren wenden sich an Einsteiger ohne Vorkenntnisse und führen gestützt auf die kostenfrei erhältliche Entwicklungsumgebung Visual Basic 2008 Express Edition in das Programmieren einfacherer Windows-Anwendungen ein. Das vorliegende Buch ist somit eine interessante, etwas preisgünstigere Alternative zu R. Haselier (BA 5/08). Fortgeschrittene, die über Erfahrungen in Visual Basic 2005 verfügen und besonders an der Weiterentwicklung und den erst mit Visual Basic 2008 verfügbaren Funktionen interessiert sind, sollten eher auf K. Löffelmann (BA 6/08) zurückgreifen. R. Haselier berücksichtigt auch das Arbeiten mit Datenbanken. Das vorliegende Buch setzt etwas andere Akzente und betont stärker das Arbeiten mit Formularen und Steuerelementen, die Erstellung von grafischen Benutzeroberflächen für Anwendungen und das Debuggen. Viele grafisch hervorgehobene Hinweise und Tipps; am Ende eines jeden Kapitels Fragen zur Kontrolle des Lernfortschrittes (mit Antworten, bewusst auf dem Kopf stehend gedruckt). (2)

Get the definitive reference for deploying, managing, and supporting Internet Information Services (IIS) 7.0. This official Microsoft RESOURCE KIT provides comprehensive information and resources from Microsoft IIS Team experts who know the technology best. IIS, a service within the Windows Server 2008 operating system, enables users to easily host and manage Web sites,

create Web-based business applications, and extend file, print, media, and communication services to the Web. This RESOURCE KIT provides everything you need to know about IIS architecture, migrating servers and applications, capacity planning, performance monitoring, security features, top administration and troubleshooting scenarios, and IIS best practices. You also get an essential toolkit of resources on CD, including scripts, job aids, and a fully searchable eBook. For customers who purchase an ebook version of this title, instructions for downloading the CD files can be found in the ebook.

Windows Vista Home Binh Nguyen Ecology has become one of the most urgent and lively fields in both the humanities and sciences. In a dramatic widening of scope beyond its original concern with the coexistence of living organisms within a natural environment, it is now recognized that there are ecologies of mind, information, sensation, perception, power, participation, media, behavior, belonging, values, the social, the political... a thousand ecologies. This proliferation is not simply a metaphorical extension of the figurative potential of natural ecology: rather, it reflects the thoroughgoing imbrication of natural and technological elements in the constitution of the contemporary environments we inhabit, the rise of a cybernetic natural state, with its corresponding mode of power. Hence this ecology of ecologies initiates and demands that we go beyond the specificity of any particular ecology: a general thinking of ecology which may also constitute an ecological transformation of thought itself is required. In this ambitious and radical new volume of writings, some of the

most exciting contemporary thinkers in the field take on the task of revealing and theorizing the extent of the ecologization of existence as the effect of our contemporary sociotechnological condition: together, they bring out the complexity and urgency of the challenge of ecological thought—one we cannot avoid if we want to ask and indeed have a chance of affecting what forms of life, agency, modes of existence, human or otherwise, will participate—and how—in this planet's future.

When Old Technologies Were New

Walter de Gruyter GmbH & Co KG

At publication date, a free ebook version of this title will be available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Want. Disease. Ignorance. Squalor. Idleness. Taken together, these comprise the "giant evils" expressed in the Social Question—first raised in mid-nineteenth-century Europe to diagnose the crises produced by the emergence of the industrial society. Due to a globalized switch to neoliberalism in the final quarter of the twentieth century, the Social Question has made a worldwide comeback. The Social Question in the Twenty-First Century maps out the linked crises across regions and countries and identifies the renewed and intensified social question as a labor issue above all. The volume includes discussions from every corner of the globe, focusing on American exceptionalism, Chinese repression, Indian exclusion, South African colonialism, democratic transitions in Eastern Europe, and other phenomena. The effects of capitalism dominating the world, the impact of the scarcity of waged work, and the acknowledgment of how the dispossessed poor bear the

brunt of the crisis are all evaluated in this carefully curated volume. Both thorough and thoughtful, the book serves as collective effort to revive and reposition the Social Question, reconstructing its meaning and its politics in the world today.

Windows Home Server Pearson Deutschland GmbH

Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

This document is designed to be a resource for those Linux users wishing to seek clarification on Linux/UNIX/POSIX related terms and jargon. At approximately 24000 definitions and two thousand pages it is one of the largest Linux related dictionaries currently available. Due to the rapid rate at which new terms are being created it has been decided that this will be an active project. We welcome input into the content of this document. At this moment in time half yearly updates are being envisaged. Please note that if you wish to find a 'Computer Dictionary' then see the 'Computer Dictionary Project' at <http://computerdictionary.tsf.org.za/> Searchable databases exist at locations such as:

<http://www.swpearl.com/eng/scripts/dictionary/> (SWP) Sun Wah-PearL Linux Training and Development Centre is a centre of the Hong Kong Polytechnic University, established in 2000.

Presently SWP is delivering professional grade Linux and related Open Source Software (OSS) technology training and consultant service in Hong Kong. SWP has an ambitious aim to promote the use of Linux and related Open Source Software (OSS) and Standards. The vendor independent positioning of SWP has been very well perceived by the market. Throughout the last couple of years, SWP becomes the Top Leading OSS training and service provider in

Hong Kong.

<http://www.geona.com/dictionary?b=>

Geona, operated by Gold Vision Communications, is a new powerful search engine and internet directory, delivering quick and relevant results on almost any topic or subject you can imagine. The term "Geona" is an Italian and Hebrew name, meaning wisdom, exaltation, pride or majesty. We use our own database of spidered web sites and the Open Directory database, the same database which powers the core directory services for the Web's largest and most popular search engines and portals. Geona is spidering all domains listed in the non-adult part of the Open Directory and millions of additional sites of general interest to maintain a fulltext index of highly relevant web sites.

<http://www.linuxdig.com/documents/dictionary.php> LINUXDIG.COM, "Yours News and Resource Site", LinuxDig.com was started in May 2001 as a hobby site with the original intention of getting the RFC's online and becoming an Open Source software link/download site. But since that time the site has evolved to become a RFC distribution site, linux news site and a locally written technology news site (with bad grammer :) with focus on Linux while also containing articles about anything and everything we find interesting in the computer world.

LinuxDig.Com contains about 20,000 documents and this number is growing everyday!

<http://linux.about.com/library/glossary/blglossary.htm> Each month more than 20 million people visit About.com. Whether it be home repair and decorating ideas, recipes, movie trailers, or car buying tips, our Guides offer practical advice and solutions for every day life.

Wherever you land on the new About.com, you'll find other content that

is relevant to your interests. If you're looking for "How To" advice on planning to re-finish your deck, we'll also show you the tools you need to get the job done. If you've been to About before, we'll show you the latest updates, so you don't see the same thing twice. No matter where you are on About.com, or how you got here, you'll always find content that is relevant to your needs.

Should you wish to possess your own localised searchable version please make use of the available "dict", <http://www.dict.org/> version at the Linux Documentation Project home page, <http://www.tldp.org/> The author has decided to leave it up to readers to determine how to install and run it on their specific systems. An alternative form of the dictionary is available at:

[http://elibrary.fultus.com/covers/technical/linux/guides/Linux-](http://elibrary.fultus.com/covers/technical/linux/guides/Linux-Dictionary/cover.html)

[Dictionary/cover.html](http://elibrary.fultus.com/covers/technical/linux/guides/Linux-Dictionary/cover.html) Fultus Corporation helps writers and companies to publish, promote, market, and sell books and eBooks. Fultus combines traditional self-publishing practices with modern technology to produce paperback and hardcover print-on-demand (POD) books and electronic books (eBooks). Fultus publishes works (fiction, non-fiction, science fiction, mystery, ...) by both published and unpublished authors. We enable you to self-publish easily and cost-effectively, creating your book as a print-ready paperback or hardcover POD book or as an electronic book (eBook) in multiple eBook's formats. You retain all rights to your work. We provide distribution to bookstores worldwide. And all at a fraction of the cost of traditional publishing. We also offer corporate publishing solutions that enable businesses to produce and deliver manuals and documentation more efficiently and economically. Our

use of electronic delivery and print-on-demand technologies reduces printed inventory and saves time. Please inform the author as to whether you would like to create a database or an alternative form of the dictionary so that he can include you in this list. Also note that the author considers breaches of copyright to be extremely serious. He will pursue all claims to the fullest extent of the law.
