This report is based on findings from newly-declassified decades-old Army and CIA records released under the Nazi War Crimes Disclosure Act of 1998. These records were processed and reviewed by the National Archives-led Nazi War Crimes and Japanese Imperial Government Records Interagency Working Group. The report highlights materials opened under the Act, in addition to records that were previously opened but had not been mined by historians and researchers, including records from the Office of Strategic Services (a CIA predecessor), dossiers of the Army Staff's Intelligence Records of the Investigative Records Repository, State Dept. records, and files of the Navy Judge Advocate General. This is a print on demand report.

Sound Targets Routledge
When a meteorite lands in Surrey, the locals don't know what to make of it. But as Martians emerge and begin killing bystanders, it quickly

becomes clear—England is under attack. Armed soldiers converge on the scene to ward off the invaders, but meanwhile, more Martian cylinders land on Earth, bringing reinforcements. As war breaks out across England, the locals must fight for their lives, but life on Earth will never be the same. This is an unabridged version of one of the first fictional accounts of extraterrestrial invasion. H. G. Wells's military science fiction novel was first published in book form in 1898, and is considered a classic of English literature.

Hitler's Shadow

Pantheon

The twelve years of the Third Reich casts a dark shadow over history. Fierce debates still rage over many of the hows, whys and wherefores of this perplexing period.

Leading expert on German history, Martin Kitchen, provides a concise, accessible and provocative account of Nazi Germany. It takes into account the political, social, economic and cultural ramifications, and sets it within the context of the times, while pointing out those areas that still defy our understanding. This lively account addresses major issues such as the reasons for Hitler's extraordinary popularity, his hold over the German people even when all seemed lost, the role of ideology, the cooption of the elites, and the descent into war for race and space, culminating in the horrors of the holocaust.

'A towering intellect ... powerful, always provocative.' *Guardian*'A superb polemicist who combines fluency of language with a formidable intellect.' *Observer*'Must be read by everyone concerned with public affairs.' Edward Said *Necessary Illusions* explodes the myth of an independent media, intent on uncovering the truth at any cost. Noam Chomsky demonstrates that, in practice, the media in the developed world serve the interests of state and corporate power - despite protestations to the contrary. While individual journalists strive to abide by high standards of professionalism and integrity in their work, their paymasters - the media corporations - ultimately decide what we view, hear and read. Rigorously documented, *Necessary Illusions* continues Chomsky's celebrated tradition of profoundly insightful indictments of US foreign and domestic institutions and tears away the veneer of

propaganda that portrays the media as the servant of free speech and democracy.

Strategic Influence Pickle Partners Publishing

This volume develops information strategy as a construct equal in importance to military strategy as an influential tool of statecraft. John Arquilla and Douglas A. Borer explore three principal themes: the rise of the 'information domain' and information strategy as an equal partner alongside traditional military strategy the need to consider the organizational implications of information strategy the realm of what has been called 'information operations' (IO) - the building blocks of information strategy - has been too narrowly depicted and must be both broadened and deepened. *Information Strategy and Warfare* will be essential reading for students and practitioners of information strategy, as well as scholars of security studies and military strategy in general.

Strategic Latency Unleashed Indiana University Press

In this vital book, thirteen

experts in public diplomacy, counterpropaganda and political warfare lay out the components of what the U.S. and its allies need to win the war of ideas around the world. Communicating with others has somehow become a goal in itself, when the real issue is influence - to modify the perceptions, attitudes, and most of all, the behavior of people, movements and governments around the world. This book is designed for the diplomat, intelligence officer, warfighter and policymaker.

The world is being transformed physically and politically. Technology is the handmaiden of much of this change. But since the current sweep of global change is transforming the face of warfare, Special Operations Forces (SOF) must adapt to these circumstances. Fortunately, adaptation is in the SOF DNA. This book examines the changes affecting SOF and offers possible solutions to the complexities that are

challenging many long-held assumptions. The chapters explore what has changed, what stays the same, and what it all means for U.S. SOF. The authors are a mix of leading experts in technology, business, policy, intelligence, and geopolitics, partnered with experienced special operators who either cowrote the chapters or reviewed them to ensure accuracy and relevance for SOF. Our goal is to provide insights into the changes around us and generate ideas about how SOF can adapt and succeed in the emerging operational environment.

WINNER OF THE NATIONAL BOOK CRITICS CIRCLE AWARD AN AMERICAN BOOK AWARD FINALIST Now in paperback, War Without Mercy has been hailed by The New York Times as "one of the most original and important books to be written about the war between Japan and the United States." In this monumental history, Professor John Dower reveals a hidden, explosive dimension of the Pacific War—race—while writing what John Toland has called "a landmark book . . . a powerful, moving, and evenhanded history that is sorely needed in both America and Japan." Drawing on American and Japanese songs, slogans, cartoons, propaganda films, secret reports, and a wealth of other documents of the time, Dower opens up a whole new way of looking at that bitter struggle of four and a half decades ago and its ramifications in our lives today. As Edwin O. Reischauer, former ambassador to Japan, has

pointed out, this book offers "a lesson that the postwar generations need most . . . with eloquence, crushing detail, and power."

Strategic Appraisal The New Press

A provocative and eye-opening study of the essential role the US military and the Central Intelligence Agency played in the advancement of communication studies during the Cold War era, now with a new introduction by Robert W. McChesney and a new preface by the author Since the mid-twentieth century, the great advances in our knowledge about the most effective methods of mass communication and persuasion have been visible in a wide range of professional fields, including journalism, marketing, public relations, interrogation, and public opinion studies. However, the

birth of the modern science of mass communication had surprising and somewhat troubling midwives: the military and covert intelligence arms of the US government. In this fascinating study, author Christopher Simpson uses long-classified documents from the Pentagon, the CIA, and other national security agencies to demonstrate how this seemingly benign social science grew directly out of secret government-funded research into psychological warfare. It reveals that many of the most respected pioneers in the field of communication science were knowingly complicit in America's Cold War efforts, regardless of their personal politics or individual moralities, and

that their findings on mass communication were eventually employed for the purposes of propaganda, subversion, intimidation, and counterinsurgency. An important, thought-provoking work, *Science of Coercion* shines a blazing light into a hitherto remote and shadowy corner of Cold War history.

The U.S. Army War College's Ninth Annual Strategy Conference was held at Carlisle Barracks, Pennsylvania, during the period March 31-April 2, 1998. The theme of the conference was "Challenging the United States Symmetrically and Asymmetrically: Can

America Be Defeated?" There were some 150 attendees, including active duty military personnel as well as members of academe, the U.S. Defense and service departments, think tanks, corporations, and news media. This book is an outgrowth of that conference, though it makes no effort to present a comprehensive and literal record of events in the mold of traditional colloquium "proceedings." Rather, the book is organized as an anthology of selected conference presentations, complemented by sufficient notice of roundtable and question-and-answer discussion to provide a glimpse of the vigorous interplay of ideas evoked by this most timely of topics.
