Report Three Rivers Press (CA)
Handbook of Adhesives and Sealants is the most comprehensive Adhesives and Sealants Handbook ever published, with the cooperation of around 35 authors from all over the world - each one a specialist in their field. It will include 80 chapters dealing with general information, theory of bonding and sealing, design of bonding parts,

technical characteristics, chemistry, types of adhesives, application, equipment, controls, standards etc. Industrial applications such as automotive, aeronautics, building and civil engineering, electronics, packaging, wood, furniture, metals, plastics and composites, textiles, footwear etc. Over 1,000 real-life examples illustrate the do's and don'ts of using adhesives Every scientific and technical issue concerning every chemical type in every industry Designed to help solve problems quickly, the content is structured to allow

readers to navigate this comprehensive resource in 4 different ways

Astronautics International Pub Vols. 41, no. 11-v. 42, no. 5 include Space digest, v. 1-2, no. 5, Nov. 1958-May 1959.

The Mosquito was the most successful battle-winning multi-role combat aircraft of the Second World War. It was introduced by the de Havilland Aircraft Company as an unarmed, un-interceptable, long range, high speed, high altitude medium bomber. An unarmed bomber without protective armament was a concept that ran directly contrary to the tactical doctrines of both the Royal Air Force and the US Army Air Force. Notwithstanding, it was

developed to carry out almost unlimited roles including ground-attack dive-bomber, anti-shipping strike aircraft, day, and night fighter, 'Pathfinder' marking targets for a main heavy bomber force, and long-range reconnaissance aircraft. There seemed to be nothing it could not be adapted to do with unmatched success. Its most important role was as a deadly long-range, low level precision ground attack fighter-bomber, ideal for 'special duties' operations. The book examines the crucial role of designers and engineers from drawing board to production and company support. Powered by two Rolls-Royce Merlin engines it could carry the same bombload as four-engine heavy bombers but at much greater speeds and at altitudes from low-level to ultra-

high. It was the combination of this performance with its prodigious range capability that made it a truly strategic weapon in air warfare, striking precision targets in the heart of Nazi-Germany and sapping morale. The text is of full of detailed and dramatic attacks from the aircrew point of view. "It makes me furious when I see the Mosquito. I run green and yellow with envy." - Reichsmarschall Hermann Göring.

Flying Magazine Elsevier

America's antiques experts, Ralph and Terry Kovel, proudly present the 26th edition of the most popular price guide in America, with accurate, up-to-date prices for almost every category of antique and collectible. 500 illustrations. 16-page full-color insert.
