'A remarkable and deeply moving book' Henry Marsh, bestselling author of *Do No Harm* 'A breathtaking, extraordinary work of non-fiction' Times Literary Supplement On 11 March 2011, a massive earthquake sent a 120-foot-high tsunami smashing into the coast of north-east Japan. It was Japan's greatest single loss of life since the atomic bombing of Nagasaki. Richard Lloyd Parry, an award-winning foreign correspondent, lived through the earthquake in Tokyo, and spent six years reporting from the epicentre. Learning about the lives of those affected through their own personal accounts, he paints a rich picture of the impact the tsunami had on day to day Japanese life. Heart-breaking and hopeful, this intimate account of a tragedy unveils the unique nuances of Japanese culture, the tsunami's impact on Japan's stunning and majestic landscape and the psychology of its people. *Ghosts of the Tsunami* is an award-winning classic of literary non-fiction. It tells the moving, evocative story of how a nation faced an unimaginable catastrophe and rebuilt to look towards the future. ****WINNER OF THE RATHBONES FOLIO PRIZE****

Dear World Knopf

This novel is another thriller from the bestselling author of 'Jurassic Park' and 'Prey'. Drawing on his past as a Harvard Medical School student and his ongoing study of the world of technology, Crichton's gripping fiction is grounded in scientific fact culled from the latest academic journals.

A Crack in the Edge of the World Centre for Public Policy Research Four teens struggle to survive in an apocalyptic world gone mad in this "brilliant novel that is a fascinating blend between *I Am Legend* and *The Hunger Games*" (VOYA). Since the beginning of mankind, civilizations have fallen: the Romans, the Greeks, the Aztecs...and now us. Huge earthquakes rock the world. Cities are destroyed. But something even more awful is happening: An ancient evil has been unleashed, and it's turning everyday people into hunters, killers, and crazies. This is the world Aries, Clementine, Michael, and Mason are living in—or rather, trying to

survive. Each is fleeing unspeakable horror, from murderous chaos to brutal natural disasters, and each is traveling the same road in a world gone mad. Amid the throes of the apocalypse and clinging to love and meaning wherever it can be found, these four teens are on a journey into the heart of darkness—and to find each other and a place of safety.

An Analysis of the Expectations, Training, and Perceived Support of the Volunteers at an After-School Community-Based Reading Tutorial Program Simon and Schuster

This book reviews the war on terror since 9/11 from a human rights perspective.

Serafina's Promise Pearson UK

Students and staff from KCL's Social Sciences BA programme turn the research lens back on their own world and together explore the many challenges of 'trying to do things differently' in Higher Education. In doing so, they grapple with fundamental questions in education such as: how to meaningfully foreground democracy, partnership, and emotional care; the role and limits of free speech; and how to deconstruct enduring inequality and marginalisation. In a period of considerable change and challenge for education, there is surely no better time to be critically analysing the principles guiding our universities through the lens of real-life practice. "In a period when university arrangements are being rethought in the wake of COVID-19 and the resurgence of Black Lives Matter, this compelling text is both timely and forward looking. 'We're trying to do things differently' successfully brings together first year undergraduates and lecturers to research, analyse and document how students and staff co-create meaningful educational experiences. The authors offer a nuanced picture of the centrality of relationships and recognition to the degree course. It shows how the students foreground love, kindness and social justice, rather than curriculum and outcomes, while being alert to the politics of difference and absence in higher education classrooms. The book draws on well-worn and innovative writing styles to produce analyses and arguments that are eye-opening, persuasive and raise difficult questions for future educational practices. This book is a must for anyone interested in championing excellence and social justice in higher education." Ann Phoenix, Professor of Psychosocial Studies, UCL

Institute of Education "This is a book with a difference. It is based on critical scholarship and draws on reflexive analysis but – and this is the important and unique part - it is a book written mainly by university students about how to enact meaningful relationships in the academy. It takes as its substantive focus one new undergraduate programme but the agenda is about change, social justice and the hard work of real inclusion. This book stands as a wake-up call to all of us who care deeply about socially just education and democracy in our institutions of higher education. It is also a wonderful example of how to write something that really matters!" - Meg Maguire, Professor of Sociology of Education, King's College London

Media In Terror Nelson Thornes

A story about a boy who teleported back in time and faced a volcano eruption.

Long Way Down Harper Collins

The terrifying details of the 1906 San Francisco earthquake jump off the page! Ten-year-old Leo loves being a newsboy in San Francisco -- not only does he get to make some money to help his family, he's free to explore the amazing, hilly city as it changes and grows with the new century. Horse-drawn carriages share the streets with shiny new automobiles, new businesses and families move in every day from everywhere, and anything seems possible. But early one spring morning, everything changes. Leo's world is shaken -- literally -- and he finds himself stranded in the middle of San Francisco as it crumbles and burns to the ground. Does Leo have what it takes to survive this devastating disaster? The *I SURVIVED* series continues with another thrilling story of a boy caught in one of history's most terrifying disasters!

The Risks of Terrorism Hachette UK

When seven-year-old Bana Alabed took to Twitter to describe the horrors she and her family were experiencing in war-torn Syria, her heartrending messages touched the world and gave a voice to millions of innocent children.

Escaping the Giant Wave Muhammad Adeel Javaid

Crisis Communication in China examines crisis communication strategies taken by the Chinese government during public crises and discusses how the public react to these strategies, exploring the cultural context and the development of digital media as critical factors underlying the strategies adopted.

I Survived the San Francisco Earthquake, 1906 (I Survived #5) Scholastic Inc.

The creator of the incredibly popular webcomic xkcd presents his heavily researched answers to his fans' oddest questions, including "What if I took a swim in a spent-nuclear-fuel pool?" and "Could you build a jetpack using downward-firing machine guns?" 100,000 first printing.

State of Fear Canongate Books

In the wake of the 2011 tsunami, Ruth discovers a Hello Kitty lunchbox washed up on the shore of her beach home in British Columbia. Within it lies a diary that expresses the hopes, heartbreak and dreams of a young girl desperate for someone to understand her. Each turn of the page pulls Ruth deeper into the mystery of Nao's life, and forever changes her in a way neither could foresee. Weaving across continents and decades, *A Tale for the Time Being* is an extraordinary novel about our shared humanity and the search for home.

The New Jersey Magazine Earthquake Terror

Thanks to its engaging writing style and accessible structure, Fletcher has become the ultimate one-stop text for any student studying Tourism. Its broad appeal and popularity increases with each new edition, making it excellent value for any student who wants to understand and explore the principles of the subject. Well-liked by students and lecturers alike, *Tourism: Principles and Practice* is the ultimate reference text for anyone wishing to understand the complex and varied issues involved with such a diverse and constantly changing subject.

Books Kids Will Sit Still For 3: A Read-Aloud Guide Houghton Mifflin Harcourt

After an earthquake destroys California and a tsunami wrecks the luxury cruise ship where he is a summer employee, high schooler Shy confronts another deadly surprise.

A Tale for the Time Being Springer Science & Business Media

Whether expressed in theological or secular terms, evil poses a problem about the world's intelligibility. It confronts philosophy

with fundamental questions: Can there be meaning in a world where innocents suffer? Can belief in divine power or human progress survive a cataloging of evil? Is evil profound or banal? Neiman argues that these questions impelled modern philosophy. Traditional philosophers from Leibniz to Hegel sought to defend the Creator of a world containing evil. Inevitably, their efforts--combined with those of more literary figures like Pope, Voltaire, and the Marquis de Sade--eroded belief in God's benevolence, power, and relevance, until Nietzsche claimed He had been murdered. They also yielded the distinction between natural and moral evil that we now take for granted. Neiman turns to consider philosophy's response to the Holocaust as a final moral evil, concluding that two basic stances run through modern thought. One, from Rousseau to Arendt, insists that morality demands we make evil intelligible. The other, from Voltaire to Adorno, insists that morality demands that we don't.

Ghosts of the Tsunami Ballantine Books

Blending history, science, and gripping storytelling, *Strong in the Rain* brings the 9.0 magnitude earthquake that struck Japan in 2011 and its immediate aftermath to life through the eyes of the men and women who experienced it. Following the narratives of six individuals, the book traces the shape of a disaster and the heroics it prompted, including that of David Chumreolert, a Texan with Thai roots, trapped in his school's gymnasium with hundreds of students and teachers as it begins to flood, and Taro Watanabe, who thought nothing of returning to the Fukushima plant to fight the nuclear disaster, despite the effects that he knew would stay with him for the rest of his life. This is a beautifully written and moving account of how the Japanese experienced one of the worst earthquakes in history and endured its horrific consequences.

Tourism: Principles and Practice Random House

When Jonathan and his family go camping on Magpie Island, they look forward to a fun, relaxing weekend. But their fun quickly vanishes when Jonathan, his sister, Abby, and their dog, Moose, find themselves in the middle of a natural disaster. A devastating earthquake has hit, destroying their camper, knocking out the only bridge to the mainland, and leaving Jonathan, Abby, and their dog with no food, water, or shelter. Alone in the woods, can Jonathan manage to keep calm and save Abby and Moose—and

stay alive himself?

The Mark of the Beast Simon and Schuster

The September 11, 2001 terrorism attack on the United States has led government officials to rethink anti-terrorism policies and researchers to assess the implications for the study of risk and uncertainty. This book draws on the expertise of eminent researchers in several risk-related fields to assess three substantive areas of concern - risk beliefs, insurance market effects, and policy responses. The risk belief analyses consider several key questions. How do people think about the risks of terrorism? What are their attitudes toward these risks? To what extent are these low probability and highly dramatic risks overestimated? Several chapters present original survey results analyzing these different aspects of terrorism risk assessments. These studies also begin to explore how people might be willing to sacrifice civil liberties to reduce the risk of terrorism and whether perceived terrorism risks are affected by the severity of the outcome and by proximity to past terrorist attacks. The insurance industry incurred financial losses generated by the terrorism attack. The risks had not been foreseen and were not reflected in insurance pricing. These new terrorism risks generated considerable uncertainty for insurance markets, leading to insurance stock price declines that are documented in this book. Subsequently, a stock price rebound occurred, particularly for the higher quality firms. A third pair of essays deals with policy responses to terrorism risks. A central theme of these analyses is that protective actions by one party have fundamental effects on the risks posed to others. Making airlines immune to terrorist attack may shift the terrorism attacks elsewhere, diminishing the net improvement in security. The papers included here examine how resources should be targeted given these offsetting effects. Contributors to this volume include J. David Cummins, Neil A. Doherty, Baruch Fischhoff, Geoffrey Heal, Howard Kunreuther, Cass R. Sunstein, W. Kip Viscusi, and Richard J. Zeckhauser, among others.

Human Rights in the 'War on Terror' Springer Nature

An updated compilation which offers criteria for selecting good read-alouds, indexing over 1,700 books for children by author/illustrator, title, and a wide range of subjects; it includes strategies for book selection, recommendations for struggling readers, and annotations with related titles.
