 This book is the first in a set of forthcoming books focussed on state-of-the-art development in the VLSI Signal Processing area. It is a response to the tremendous research activities taking place in that field. These activities have been driven by two factors: the dramatic increase in demand for high speed signal processing, especially in consumer elec tronics, and the evolving microelectronic technologies. The available technology has always been one of the main factors in determining al gorithms, architectures, and design strategies to be followed. With every new technology, signal processing systems go through many changes in concepts, design methods, and implementation. The goal of this book is to introduce the reader to the main features of VLSI Signal Processing and the ongoing developments in this area. The focus of this book is on: • Current developments in Digital Signal Processing (DSP) pro cessors and architectures - several examples and case studies of existing DSP chips are discussed in Chapter 1. • Features and requirements of image and video signal processing architectures - both applications specific integrated circuits (ASICs) and programmable image processors are studied in Chapter 2. • New market areas for signal processing - especially in consumer electronics such as multimedia, teleconferencing, and movie on demand. • Impact of arithmetic circuitry on the performance of DSP pro cessors - several topics are discussed in Chapter 3 such as: number representation, arithmetic algorithms and circuits, and implementa tion.

RISKY BUSINESS So what if my two biggest clients were a known mobster and a ten-year-old kid looking for his cat business was business. Until Brandon Kirkpatrick walked into my life and made business murder. The sexy detective was officially my competition, but when our cases crossed paths both our lives were suddenly dangerously in the red. Murder and mayhem were multiplying faster than the stray cats in my apartment. Working together was going to drive me to distraction, but it was the only way to figure out which one of our clients was telling the truth – and how far the other client would go to cover it up.

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.

When Frank and Kevin first met in an empty Arab airport lounge on their way to India in January 1985, it was the beginning of a friendship which would take them together across the length and breadth of the Indian sub-continent, ending up in the foothills of the Himalayas in Nepal.'Kevin and I in India' is the unexpurgated, often outrageous, diary of their travels - from the hill-stations of the deep south to the Taj Mahal in the north, from the Goan beaches of the west to the sacred Ganges and the Bodhi Tree in the east. Full of anecdotes, observations and travellers' tales, the two Englishmen weave a crazy, erratic path through a variety of adventures and misadventures, in constant battle against officialdom, insects, heat, dust, ticket-queues and mad traffic.Here is the real India - stripped of illusion, but adorned with humour and exuberance. Here is a kaleidoscopic potpourri of fascinating sights, scenes and people, with each day of the journey more exciting, more packed with incident, than the last.
