The unfathomable rate of Black males in education should result in a national call to action. Across the country Black males represent only 2% of the teaching workforce. By the year 2024, minority students will be the majority, yet our current education workforce does not reflect this growing trend in what has been called "The Browning of America." Why is it acceptable that a

student can matriculate from Kindergarten through twelfth grade and not have one Black male as his or her teacher? Why has it been a challenge to recruit and in many instances retain Black males in the classroom? Unopened Books explains what is referenced in the book as the Five Black Male Deterrents in Education. Through the personal narrative of Jermaine D. Gassaway, a native Washingtonian, educator, and school leader; coupled with practical solutions, Unopened Books provides insight to multiply the 2%. It is intended to not only be a provocative conversation starter but an actionable approach to increase the number of Black men in the classroom.

A Spectacular Enhancement to the Skill System Mythic Skills introduces a system of skill exploits that take the basic tasks your skills allow you to perform and dials them up to amazing levels. In addition, every skill in the Pathfinder Roleplaying Game Core Rulebook also gets brand-new skill exploits, as well as greater exploits that only the most skilled masters would even attempt. This book contains rules for using these enhanced skills with mythic characters but also provides an alternative system for use in non-mythic Pathfinder campaigns! This system allows your

characters to focus on their skills as a key part of their character construction and to invest more of their character's abilities in their character itself, rather than the character's gear or magical tools. You can use these rules generally with mythic characters, allowing them to attempt all manner of skill-based exploits, or you can limit the ability to pull off these amazing skill stunts to those mythic characters that have really invested in making their skills a key part of their character's identity. The mythic rules offer an opportunity to magnify what makes a character special, and the skills they choose to hone as part of their background narrative and throughout the course of the campaign should be just as important in defining them as their marvelous magic and fabulous feats. With Mythic Skills in your hands, your skills will be just as spectacular!"

Elapsed Time Workbook contains lessons and exercises suitable for grades 3 and 4. The first lesson, "How Many Hours Pass", uses a number-line diagram to help students figure out how many complete hours pass from one given time to the other, including if there is a change from AM to PM. The lesson "How Many Minutes Pass?" encourages students to use a practice (analog) clock or visualize the minute hand moving along the clock face to figure out the elapsed time. It also explains the subtraction method for easy time intervals. The next two lessons about calculating elapsed time emphasize dividing a time interval into parts that are easily calculated. For example, to find the elapsed time from 10:30 AM to 7:00 PM, the student learns to find the elapsed time from 10:30 AM to 12:00 noon, and then from 12:00 noon to 7 PM. The same principle is followed when the time-interval seems more complex. Lastly, the lesson "Elapsed Time or How Much Time Passes", introduces the concept of adding or

subtracting hours and minutes vertically in columns.

This workbook contains a variety of exercises and activities designed to help young learners advance the fine motor skills that are essential to the handwriting process, beginning by tracing lines and curves, and then gently introducing some letter-writing practice. Several mazes are also included in the book as a fun way to promote visual motor skills, eye-hand coordination, and problem-solving skills. Young students are introduced to the letters of the alphabet in exercises that have them trace Lowercase Alphabet and then practice writing them on their own. Numbers are also presented in an engaging way, with a lesson in phonetics as well as exercises for tracing and writing numerals. A section of connect-the-dot games provides more motor skills

development along with helping children learn the order of alphabet, while fill-in-the-blank games reinforce alphabet learning in a different way and provide more practice in writing the missing letters. My BIG Book of Writing! is a versatile tool that can help children who are struggling with writing skills to work at a comfortable level, as well as assisting those for whom writing comes more easily to experience the multitrack learning their developing minds are hungry to absorb. Whatever level a child is at, the activities and exercises in this workbook will stimulate the learning process and prepare him or her for reading and other learning challenges ahead.
