Guide des fleurs sauvages First

Au carrefour d'influences atlantiques, montagnardes et méditerranéennes, la flore du Sud-Ouest est diverse et très riche. Ce livre se propose de guider l'amateur dans la reconnaissance des principales espèces rencontrées au cours de ses promenades. Il s'intéresse aux plantes les plus fréquentes, les plus typiques ou les plus curieuses de la région. Environ 200 espèces sont décrites et photographiées. Les espèces voisines sont brièvement présentées, ce qui conduit à la reconnaissance d'environ 750 plantes. Un classement par milieu et par couleur permet leur identification. Cécile Lemoine, ancien professeur de botanique des universités, a une longue expérience d'enseignement et de recherche. Elle a publié de nombreux ouvrages sur les végétaux de la flore de France.

Mon guide des fleurs sauvages Verso Books

Vous désirez mettre un nom sur une plante rencontrée au gré de vos balades ? Voilà une flore simple et facile d'utilisation, accessible à tous les amateurs de plantes sauvages, même s'ils ne connaissent rien à la botanique. Grâce à plus de 1 600 photographies, découvrez l'étonnante diversité de la nature qui vous entoure. Apprenez à reconnaître les espèces, si elles sont comestibles, médicinales ou toxiques, et ne manquez pas les suggestions d'associations gourmandes présentées par Sylvain Joffre. C'est au fil de ses promenades dans le Sud de la France

que Michel Laroche a eu l'idée de ce guide. Avec le souci de mettre à la portée du plus grand nombre ses connaissances, il a construit patiemment un livre pratique, dans lequel les espèces sont classées selon la forme et l'aspect des fleurs, la couleur et le nombre des pétales.

Guide des fleurs sauvages de Méditerranée occidentale Obscure Press

A LACE GUIDE for MAKERS and COLLECTORS. This book includes a bibliography and a five-language nomenclature. It is hoped that this little manual will prove of use to students of stitchery in general, - or of bobbin lace in particular, - to see how certain meshes are woven; that it may aid those planning to produce lace either by hand or machine, in comparing and judging effects, in advance, and that it may assist collectors and classifiers to identify lace: for after all, it is the actual lace which finally determines a variety, only certain meshes being used in a lace of pure type. Originally published in 1917. Many of the earliest books on weaving, textiles and needlework, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

Jardin Marisol et guide de culture des fleurs sauvages Springer
In Perfumes, Luca Turin and Tania Sanchez reviewed nearly 1,500 fragrances in their witty, irreverent and innovative handbook -

separating the divine from the good from the monumentally awful. Here in The Little Book of Perfumes the authors choose their 100 greatest fragrances of all time. Some are very famous, some hardly known, for women and men. There is Jicky (1889), unisex coeval of the Eiffel Tower and 'a towering masterpiece'; Chanel's No. 5 (1921), perhaps the world's most famous perfume, 'stretching deliciously like a sleepy panther'; Knize Ten which 'everyone should own because there is only one like it' and White Linen (1978), 'a canonical expression of the American ideal of sex appeal'. This is a perfect gift, a perfect browse.

David R. Godine Publisher

The complete monograph of the work of Yves Béhar, the world's leading product designer and design entrepreneur, prepared in close collaboration with the designer himself. Since founding his studio, Fuseproject, in 1999, Yves Béhar has redefined the role of the designer, expanding his work to include both public-sector

and entrepreneurial engagements. In doing so, Béhar has produced groundbreaking, award-winning designs that have had a positive impact on the well-being of people in developing countries and impoverished communities, creating everything from laptops and eyeglasses for children to stylish electronics. His clients have included MIT, BMW, Microsoft, Swarovski, and many more. A comprehensive retrospective of Béhar's twenty-year career, this book presents his work in thematic chapters—"Reducing," "Sensing," "Transforming," "Giving," "Humanizing," and "Scaling"—and explores over sixty projects in detail through text descriptions, sketches, and exquisite studio photography. Offering thorough insight into the conception, process, and production of some of the most recognized pieces of contemporary design, Yves Béhar: Designing Ideas illuminates the designer's particular fusion of creativity and commercial savvy, as well as his studio's expertise in combining social responsibility and entrepreneurial acumen.

The Geography of the Imagination DigiCat

In the 40 essays that constitute this collection, Guy Davenport, one of America's major literary critics, elucidates a range of literary history, encompassing literature, art, philosophy and music, from the ancients to the grand old men of modernism. Guide des fleurs sauvages Springer Science & Business Media The Antinomies of Realism is a history of the nineteenth-century realist novel and its legacy told without a glimmer of nostalgia for artistic achievements that the movement of history makes it impossible to recreate. The works of Zola, Tolstoy, Pérez Galdós, and George Eliot are in the most profound sense inimitable, yet continue to dominate the novel form to this day. Novels to emerge since struggle to reconcile the social conditions of their own creation with the history of this mode of writing: the so-called modernist novel is one attempted solution to this conflict, as is the ever-more impoverished variety of commercial narratives - what today's book reviewers dub "serious novels," which are an attempt at the impossible endeavor to roll back the past. Fredric Jameson examines the most influential theories of artistic and literary realism, approaching the subject himself in terms of the social and historical preconditions for realism's emergence. The realist novel combined an attention to the body and its states of feeling with a focus on the quest for individual realization within the confines of history. In contemporary writing, other forms of representation - for which the term "postmodern" is too glib - have become visible: for example, in the historical fiction of Hilary Mantel or the stylistic plurality of David Mitchell's novels. Contemporary fiction is shown to be conducting startling experiments in the representation of new realities of a global social totality, modern technological warfare, and historical developments that, although they saturate every corner of our lives, only become apparent on rare occasions and by way of the strangest formal and artistic devices. In a coda, Jameson explains how "realistic" narratives survived the end of classical realism. In effect, he provides an argument for the serious study of popular

fiction and mass culture that transcends lazy journalism and the easy platitudes of recent cultural studies.

Fleurs Sauvages. Wild Flowers. A Guide to the Wild Flowers of Great Britain and Europe ... Translated by J.G. Barton. Photographs by Marc Buzzini Profile Books

A beautifully made scent can encapsulate a particular feeling, transport you to a very specific time in life with clarity, or remind you of a special loved one or friend. And just like wearing your favorite outfit or shoes, your favorite perfume can make you feel invincible. The question is, how do you find such a creation? With the number of new releases steadily increasing, it can be bewildering even attempting to find a perfume you like, let alone love. In *Perfume*, Neil Chapman guides readers through a world that can at times seem overwhelming. Fragrances of every variety are listed 'note by note' in clearly divided categories that will steer you in the direction of a perfume you not only like, but love and cherish as 'your' signature scent. Chapters explore popular notes (for example, vanilla, sandalwood, jasmine, rose, patchouli, chocolate) or a broader identifiable group (such as 'oceanics', 'green florals' or 'anti-perfume'), giving an insight into that particular category as well as a clear sense of the similarities and differences between the scents described within it. Featuring over 700 scents, from vintage perfumes to department store classics, rarities and niche boutique fragrances, *Perfume* is a true portal into the beautiful world of perfume. The further you go on this journey, the more you will be amazed by how many beautiful creations do exist if you take the time to look.

Le petit guide des fleurs sauvages

Berbers, also known as Imazighen, are the ancient inhabitants of North Africa, but rarely have they formed an actual kingdom or separate nation state. Ranging anywhere between 15-50 million, depending on how they are classified, the Berbers have influenced the culture and religion of Roman North Africa and played key roles in the spread of Islam and its culture in North Africa, Spain, and Sub-Saharan Africa. Taken together, these dynamics have over time converted to redefine the field of Berber identity and its socio-political representations and symbols, making it an even more important issue in the 21st century. This second edition of *Historical Dictionary of the Berbers* contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 200 cross-

referenced entries on important personalities, places, events, institutions, and aspects of culture, society, economy, and politics. This book is an excellent resource for students, researchers, and anyone wanting to know more about the Berbers.

Guernsey Wild Flowers, in Spring and Summer

Covering an area of over 130 million km² spanning the Mediterranean, equator and tropics, the African continent features a spectacular geographic diversity. Consequently, it is characterised by extremely variable climatic, edaphic and ecological conditions, associated with a wide range of natural

vegetation and wildlife, as well as human population density, crops and livestock. In this book, Henry Le Houérou presents his bioclimatic and biogeographic classification of Africa. The extensive data provide the basis for comparisons between various African regions, and with regions on other continents such as Latin America or the Indian subcontinent. The results constitute a rational basis for national, regional and sub-regional rural development planning, and for agricultural research dealing with aspects such as plant and animal introductions, the extrapolation or interpolation of experimental or developmental findings, and ecosystems dynamics. Possible problems of applications are also examined.
