Antiblackness Dorling Kindersley Ltd

The first book to attempt to provide a framework for analyzing disability through the ages, Henri-Jacques Stiker's now classic *A History of Disability* traces the history of western cultural responses to disability, from ancient times to the present. The sweep of the volume is broad; from a rereading and reinterpretation of the Oedipus myth to legislation regarding disability, Stiker proposes an analytical history that demonstrates how societies reveal themselves through their attitudes towards disability in unexpected ways. Through this history, Stiker examines a fundamental issue in contemporary Western

discourse on disability: the cultural assumption that equality/sameness/similarity is always desired by those in society. He highlights the consequences of such a mindset, illustrating the intolerance of diversity and individualism that arises from placing such importance on equality. Working against this thinking, Stiker argues that difference is not only acceptable, but that it is desirable, and necessary. This new edition of the classic volume features a new foreword by David T. Mitchell and Sharon L. Snyder that assesses the impact of Stiker's history on Disability Studies and beyond, twenty years after the book's translation into English. The book will be of interest to scholars of disability, historians, social scientists, cultural anthropologists, and those who are intrigued by the role that culture plays in the development of language and thought surrounding people with disabilities.

A Cultural History of Heredity Dorling Kindersley Ltd

Grad-school dropout Matt Fuller is toiling as a lowly research assistant at MIT when, while measuring quantum relationships between gravity and light, his calibrator disappears - and reappears, one second later. In fact, every time Matt hits the reset button, the machine goes missing twelve times longer. After tinkering with the calibrator, Matt is convinced that what he has in his possession is a time machine. And by simply attaching a metal box to it, he learns to send things through time - including a pet-store turtle, which comes back no worse for wear. With a dead-end job and a girlfriend who left him for another man, Matt has nothing to lose by taking a time machine trip for himself. So he borrows an old car, stocks it with food and water, and ends up in the near future - under arrest for the murder of the car's original owner, who dropped dead after seeing Matt

disappear before his eyes. The only way to beat the rap is to continue time travelling until he finds a place in time safe enough to stop for good. But such a place may not exist...

Antiblackness investigates the ways in which the dehumanization of Black people has been foundational to the establishment of modernity. Drawing on Black feminism, Afropessimism, and critical race theory, the book's contributors trace forms of antiblackness across time and space, from nineteenth-century slavery to the categorization of Latinx in the 2020 census, from

South Africa and Palestine to the Chickasaw homelands, from the White House to convict lease camps, prisons, and schools. Among other topics, they examine the centrality of antiblackness in the introduction of Carolina rice to colonial India, the presence of Black people and Native Americans in the public discourse of precolonial Korea, and the practices of denial that obscure antiblackness in contemporary France. Throughout, the contributors demonstrate that any analysis of white supremacy--- indeed, of the world---that does not contend with antiblackness is incomplete. Contributors.
